INAUGURAL ADDRESS BY MAYOR THOMAS S. BURGIN

January 2, 1939

Gentlemen of the City Council:

Fifty years ago on the first Monday in January, 1889, Honorable Charles H. Porter, the first Mayor of Quincy, delivered his inaugural message to the twenty-three members of the City Council in the presence of a distinguished group of citizens. In general, the order of exercises of that day differed but little from the manner in which our program is being carried out today, except that it marked the beginning of a new city in Massachusetts and the birth of a municipal administration to guide and direct the public affairs of the former townspeople of Quincy. The solemnity of that occasion can best be visualized when we think of the tremendous responsibility facing those men through the change over from "town hall" activities to the dual responsibility of the executive and legislative branches of a city government being carried out by elected representatives. The opportunity of voting at and taking part in the discussions at town meetings was to be a thing of the past, and the business of managing and directing the public affairs of the new city would from then on pass into new hands and be a matter of delegating public trust, judgment and confidence to the Mayor and City Council members.

Only time has made it impossible for those twenty-four pioneers in city government to see the municipal structure of their city reach the half century mark after having been built on the foundation they laid so carefully and courageously back in 1889. To their memory and in appreciation of their efforts in the early establishment of what we believe to be the best city in our state, let us dedicate ourselves to honorable service in the interest of our fellow citizens upon this Golden Anniversary. How they would like to look in on us now—fifty years later—to see Quincy as it is today, with its growth in population from about eighteen thousand to eighty thousand, its residential and industrial development, its excellent standing among the other thirty-eight cities of the Commonwealth and its thoroughly modernized municipal services efficiently operating for the benefit of all our citizens from every walk of life. I need only remind you of our departments of public safety, hospital, health, library, public works, welfare, parks and education to forcibly demonstrate the number of advantages our citizens enjoy through the expenditure of their tax dollar. Without the mutual cooperation of all taxpayers the individual cost of any one of these services would be far in excess of what it is today.

While it is customary for the Mayor to review the progress of our city during the past year and outline his policies for the ensuing twelve months at this first meeting of the City Council, I trust I may be pardoned if the usual procedure is somewhat varied today. Due to the length of our planned program it will be necessary for me to confine my remarks principally to the general finan-

cial condition of the city and the immediate problems which will present themselves to us during the next few weeks. I shall, however, forward detailed recommendations to you from time to time during the year on matters requiring your attention, and particularly preceding the passage of our annual appropriation order.

It is entirely advisable nevertheless that the general financial condition be outlined at this time and certain facts reviewed briefly. No legislative body having the responsibility of making all municipal appropriations should commence its work without a clear and concise picture of the financial structure around which their program must be built. While we may well be proud of the accomplishments during the past few years, we must be mindful of the seriousness with which we should view the year ahead of us. This problem is of vital concern to you gentlemen and every citizen of Quincy. It must be given immediate and prompt attention.

PRESENT FINANCIAL CONDITION

The total funded debt of our city now stands at \$4,451,217.91, divided as follows: serial bonds \$4,321,217.91, and tax title loans from the state \$130,000. It should be noted that Quincy's debt is at its lowest figure since December 31, 1925, or for a thirteen-year period on corresponding dates. Such an accomplishment of debt reduction is worthy of special recognition, particularly in these days of greatly increased debts in our federal, state and municipal governments. During the past three and a half years our funded debt, including tax title loans, has been lowered practically a million dollars, which represents 18% of the debt of July 1, 1935, at the approximate date when I assumed office as Mayor of Quincy. During the year 1938 our tax title loans from the Commonwealth of Massachusetts were entirely paid off on June 30th. This was the first time since the tax title loan act of 1933 that our city was without such loans, and represented a reduction since July 1, 1935, of \$517,000.

While the long term borrowings during 1938 were slightly higher than I anticipated, there were two factors which prevented us from making a two hundred thousand dollar net reduction for the year. These were: the borrowings required for our share in the cost of the dredging and development of Town River and the hurricane emergency. These two loans represented \$118,000 not figured in my annual message to the Council last January.

In September, 1938, I recommended the borrowing under tax title loans of \$200,000, of which \$184,000 was for relief purposes and \$16,000 for the city's cost in connection with the State construction of a sea wall at Great Hill, Houghs Neck. While I disliked to recreate tax title loans, it was felt advisable to finance these items through short term indebtedness rather than long term bonds running over a period of five or more years. In the past four months we have reduced this loan to the extent of \$70,000, having a balance of \$130,000 which should be paid off within the current year.

Let us now consider for a few moments the debt outlook for 1939, setting forth the maturing bonds of previous years and our anticipated borrowings. According to the Treasurer's statement we will have \$880,000 coming due during the year, and at the outside figure the loans should not exceed \$600,000 for such purposes as street, sewer and water construction, land takings and relief pur-

poses. It can easily be seen, therefore, that there is every indication of a further debt reduction of well over \$200,000 in 1939, thereby continuing our policy of substantially lowering our municipal debt each year. There is no indication now that I shall recommend any borrowings this year for public buildings, inasmuch as I have been advised that under the present federal program of P.W.A. there are no funds available for new construction not already authorized by the Emergency Administration of Public Works, and I do not feel at this time that we should undertake building projects wherein the city would be obliged to assume the entire cost.

Our real financial problem for 1939 is the apparently inevitable increase in the city's tax rate which will be due almost entirely to the increased state tax of \$171,000 for the year 1938. To have successfully reduced our tax rate for three successive years, bringing it down to the fifth lowest of all Massachusetts cities, and then to find our efforts practically wiped out by an increase in 1938 of over 100% in our state tax is more than discouraging. It was anticipated that the state levy would be \$151,000 for 1938, and this amount was raised upon the estimate of our State Tax Commissioner. However, after the Legislature completed its work the previous estimate proved to be short by \$171,000, and of course this amount representing the 1938 deficit falls as an additional burden upon us, in company with similar increases for all other cities and towns in the State for 1939. Within the next few weeks I shall advocate immediate action by our state government to give relief through appropriate legislation so that the effect of this staggering blow may be alleviated.

While our city is in excellent financial condition in regard to lower debt, reduced taxes, and increased tax collections, we must look ahead to 1939 with grave concern adopting a policy of sensible economy in every city department to offset the increases in our fixed charges, such as the state levy, maturing debt obligations, and increased costs for old age assistance. It is to be regretted that we will be faced with the problem of either materially curtailing many of our normal city services in order to maintain our \$32.80 tax rate, or continuing these municipal services as they are and paying for the additional costs through an increase in tax rate of at least \$1.50 per thousand dollar valuation. Our citizens must rise up in protest against this probable increase in our tax rate which will be caused principally by the state budget of 1938 being close to 50% more than that of 1937. With our own house in good order it is indeed discouraging to have such an additional burden placed upon us, and I hope that with the support of our citizens in protest some action may be taken by the incoming state legislature to provide means so that this financial load may be materially lessened.

Assistance should also be provided by the incoming state legislature to offset the drastic increase in our maturing debt obligations for 1939. Specifically I have reference to the loan of \$50,000 incurred for hurricane emergency which under the enabling act could be written for only one year. This item, together with the first maturity on the loan for the Town River Development, accounts for the major part of the increase in the maturing debt for 1939 over that of 1938. It is hoped that the \$50,000 storm emergency loan may be re-funded to mature over a period of years under authorization of our state legislature.

Before leaving our financial condition, I feel it advisable to call your attention to our increasing relief problems which should cause

us deep concern, particularly as it relates to the expenditures for old age assistance in accordance with the state law providing for this type of aid. The approximate cost for old age assistance in 1938 showed an increase of over 20% from the expenditures for the same purposes in 1937, and 83% more than the cost in 1936. This great increase was due primarily to the lowering of the age limit from 70 to 65 years. When you realize that the gross cost for old age assistance in Quincy is almost as much as the total cost for temporary relief (city welfare) and aid to dependent children (formerly mothers' aid) you can get some idea of what such a type of assistance is costing our citizens. This appears to be a permanent social policy, and even business improvement will not reduce the cost of this type of expenditure. To be sure, however, we do receive financial help from both the state and federal governments towards meeting a substantial percentage of this expense for old age assistance.

And now let us briefly refer to

GENERAL CITY DEPARTMENTS

With our present tax rate of \$32.80 per thousand dollar valuation, the citizens of Quincy may consider themselves fortunate in comparison with many other communities that municipal services here have not had to be curtailed. Time will not permit me to mention in detail the improvements that have been made in many of our city departments. There are, however, some that do deserve comment, such as our new Municipal Stadium, enclosed baseball field and general recreational improvements throughout the city; Central Fire Headquarters building on Quincy Avenue, and the establishment of a centralized purchasing department which I am convinced has been productive of real economy. In general, our various city services are operating effectively, and such recommendations for their improvement as I have in mind will be presented to you for consideration during the current year. A detailed list of the accomplishments, recommendations and activities of these departments will be included in the annual printed city reports which you will receive at a later date.

Although my remarks to you this morning may have sounded a vibrating note of pessimism for the year 1939 in regard to additional costs, most of which we have no direct control over, and the ultimate increase to our taxpayers, let us not forget that as a city we face these problems in common with practically every other municipality in Massachusetts. We, as members of the executive and legislative branches of our city government, cannot, however, "pull the proverbial rabbit out of the hat," but we must not fail to realize that the burden of taxation falls upon our citizens and they expect us to meet existing conditions intelligently and with due regard for their general welfare. I hope it isn't asking too much of these same citizens to cooperate with us in the problem, and not demand more than what they can rightfully expect in return for what they pay in taxation. As the old saying goes, "You can't have your cake and eat it too"; so do I say to them you can't expect governmental services without paying for governmental costs.

The industrial and business outlook of Quincy is without question the best of any city in Massachusetts, and it should have a direct bearing on our general expenses, over which we do have

direct control, including welfare and the city's contribution towards the support of W.P.A. With the Procter and Gamble Company constructing a million dollar plant here providing ultimate employment for approximately 500 Quincy men and women, with the Fore River Ship Yard having reached its highest enrollment of labor since the world war and being assured of work for some six thousand men during the next five years, and with general employment and payrolls in Quincy on the increase, I am glad to strike a note of optimism for the future.

Let us be thankful that our present tax rate is the fifth lowest in the state, and even if we do have an increase this year we will still be well below the average for the state and far lower than several of our cities whose tax rates are now over \$40 per thousand.

Quincy has the strength of its granite hills, and with that strength let us look to the future having a sense of security and reliance and appreciating the judgment and foresight of our predecessors in office during the past fifty years, whose efforts have built our city structure upon a foundation well and carefully laid.

As a mark of respect and honor to those men who have served as Mayor of Quincy and who have passed into the great beyond, I feel that it would be appropriate to read their names upon this occasion so that in silent tribute we may honor their memories and the service they rendered in the growth of our city.

Charles H. Porter	1889-1890	Charles M. Bryant	1902-1904
Henry O. Fairbanks	1891-1893	James Thompson	1905-1907
William A. Hodges	1894-1895	William T. Shea	1908-1911

Harrison A. Keith	1899	Chester I. Campbell	1915
John O. Hall	1900-1901	Gustave B. Bates	1916-1923-24

*Died in office October 6, 1914.

In closing this address may I pause to gratefully acknowledge the honor of my re-election as Mayor of our city. I appreciate the confidence you have again placed in me, and I am fully cognizant of the tremendous responsibility the duties entail. Again renewing my pledge of previous years that upon my honor I will do my best to serve the people of Quincy with sincerity of purpose, I enter upon my third term as Mayor. Let us all again call to mind those members of our first City government in 1889 and, asking divine guidance from the same Almighty God, enter our second half century as a city with the same spirit of courage and determination as they showed in that year so that in the future the people of Quincy may point with pride to their government of 1939—the Golden Anniversary Year—as we have today referred to our first year as a municipality.

REPORT OF THE AUDITOR

April 29, 1939

*To His Honor The Mayor
and The Honorable City Council:*

I submit herewith the financial report of the City of Quincy for the year ending December 31, 1938.

In compliance with Section 50, Chapter 41 of the General Laws, there is appended a certificate under oath with reference to the verification of cash balances in the hands of the City Treasurer and various trustees having custody of funds.

Respectfully submitted,

LEO E. MULLIN,
Auditor of Accounts.

I hereby certify that I have verified, by actual count of the cash and verification of the bank balances, the cash of the City Treasurer, the Board of Managers of the Adams Temple and School Fund, and Board of Managers of the Woodward Fund and Property, and the Trustees of the Thomas Crane Public Library.

LEO E. MULLIN,
Auditor of Accounts.

Sworn to before me this 4th day of May, 1939.

DONALD P. CRANE,
Notary Public.

IN COUNCIL

Order No. 65

February 21, 1938

Ordered:

That the several sums named herein be and are hereby appropriated for the payment of the expenses of the City of Quincy for the financial year beginning January 1, 1938 and ending December 31, 1938, to be expended by and under the direction of the several officers or boards as herein designated.

Additional parcels Treasurer's sale Dec., 1938.....	208
Titles by foreclosure in Land Court	38
Total	1047
Area 801 parcels Jan. 1, 1938.....	8,856,312 sq. ft.
Area 208 parcels Sale Dec. 1938	1,164,590 " "
Area 38 parcels Foreclosed Land Court.....	1,196,226 " "
Total	11,217,128 " "
Last assessed value 801 parcels	\$233,560 00
Last assessed value 208 parcels	45,600 00
Last assessed value 38 parcels	124,975 00
Total	\$404,135 00
Taxes due on 801 parcels Jan. 1, 1938.....	\$ 73,689 45
Taxes due on 208 parcels Dec., 1938.....	14,026 22
Taxes due on 38 parcels Foreclosed Land Court	24,273 41
Total	\$111,989 08

Sales January 1, 1938 to December 31, 1938

Number of parcels	38
Area	198,350 sq. ft.
Assessed value	\$ 26,600 00
Taxes due	6,323 88
Sales price	8,020 00
Profit	1,696 12

Gross Receipts

Sale 38 parcels.....	\$8,020 00
Rental 9 parcels	1,030 20
Total	\$9,050 20

Net Receipts

Profit sales	\$1,696 12
Rentals	1,030 20
Total	\$2,726 32

Receipts from rentals for the year have shown a substantial increase. This has been possible by making repairs to buildings taken over and making them habitable for tenants. It has been possible to make some of these repairs with Welfare labor thus keeping costs down to a minimum.

By so doing some revenue has been derived, the City's investment has been protected and the properties saved from destruction by vandalism and exposure to the elements. As an example, by making minor and only emergency repairs to nine properties that were last assessed for \$24,825. and upon which there were unpaid taxes of \$5,717.40, rentals were received in the amount of \$1,030.20.

There is need for further repairs to these and other properties recently acquired, so as to produce revenue, in lieu of taxes and protect their value until they can be sold.

Many properties taken for non-payment of taxes include old, dilapidated buildings that have deteriorated beyond repair or redemption. These old buildings are not only unsightly but constitute a nuisance becoming fire and health menaces. Upon the recommendation of the Building Inspector and the Chief of the Fire Department, and after every effort has been made to salvage some value for the City, several such buildings have been demolished at no direct cost to the City.

In some instances we have conferred with the City Engineer with the result that while being City owned property, one street corner has been rounded and another is under consideration.

At present there are listed 1009 parcels of property, taken by the City for non-payment of taxes under Chapter 60, Sec. 79, G. L. or by foreclosure of tax titles in the Land Court.

Area 1,009 parcels	11,018,778 sq. ft.
Last assessed value	\$377,535 00
Taxes due when taken	\$105,665 20

Yours very truly,

GEORGE E. MOREY,
Property Manager.

REPORT OF THE TREASURER OF THE WOODWARD FUND AND PROPERTY

JANUARY 2, 1939.

HON. THOMAS S. BURGIN, *Mayor*
Quincy, Massachusetts

REPORT OF THE QUINCY RETIREMENT BOARD

March 1, 1939

*To the HONORABLE THOMAS S. BURGIN, Mayor:
Quincy City Hall, Quincy, Massachusetts.*

The Quincy Retirement Board submits its fourth annual report, being for the year ending December 31, 1938, with appended tables setting forth the financial and statistical results.

In his report to us, the Actuary retained by the Board comments "that the operation of the Retirement System during the past year has been very satisfactory. The only point in which the experience of the system does not measure up to the expected is in the yield on investments which was not quite as good as it was last year, and is still below the 4 per cent requirement. However, this loss from interest has been more than offset by the experience of the system in other respects which has been favorable. The favorable experience is manifested in the decrease in the accrued liability, in the change from the deficit balance to a surplus balance in the Annuity Reserve Fund, and in the fact that the normal and accrued liability rates which were certified last year continue to be adequate as a basis for determining the City's appropriations."

The problem of investing funds is one to which the Board has necessarily had to devote much attention. It recognizes the dual nature of its responsibility, as trustees to both the members and to the City. Aside from the necessity of conserving principal, it is under the obligation to make its investments earn as much as is consistent with safety, both because of the fact that accumulated interest is such an important element in the retirement allowances ultimately to be paid and because of the liability upon the City to make up any deficits in earnings. To that end, it has availed itself of opportunities both to purchase securities of higher ratings and to lower the average price at which certain of its holdings already stood.

The Board believes that the policy which it has adopted will, over a period of years, lead to an annual earning power that will assure payment of the full retirement allowances contemplated when the system was established, without the necessity of resort to City appropriations to make up deficits in income.

Respectfully submitted,

GEORGE H. BONSALE,
JOHN J. KEEFE,
LEO E. MULLIN,

Quincy Retirement Board.

TABLE XI

Valuation Balance Sheet Showing the Assets and Liabilities
of the Funds of the Quincy Retirement System as
of June 30, 1938

ASSETS

Annuity Savings Fund	\$ 51,975
Annuity Reserve Fund	1,091
Pension Reserve Fund
Pension Accumulation Fund	58,241
Total Present Assets	<u>\$111,307</u>
Present value of the prospective contributions payable by the City into the Pension Accumulation Fund	<u>252,726</u>
Total Assets	<u><u>\$364,033</u></u>

LIABILITIES

Present value of benefits on account of which contributions have been paid by members into the Annuity Savings Fund \$	51,975
Present value of benefits payable on account of bene- ficiaries or their dependents now drawing annuities from the Annuity Reserve Fund	1,039
Present value of benefits payable on account of beneficiaries or their dependents now drawing pensions from the Pension Reserve Fund	0
Present value of benefits payable on account of beneficiaries or their dependents now drawing pensions from the Pension Accumulation Fund	32,026
Present value of benefits to members with prior service to be paid by contributions of the City into the Pension Ac- cumulation Fund	218,053
Present value of benefits to new entrants to be paid by contributions of the City into the Pension Accumulation Fund	60,940
Total Liabilities	<u><u>\$364,033</u></u>

No account is taken of the future contributions of members into the Annuity Savings Fund because the benefits provided by these contributions are exactly equal to the accumulated amount of the contributions and therefore they do not affect the balance in the fund.

REPORT OF THE BOARD OF ASSESSORS

HON. THOMAS S. BURGIN, *Mayor*
Quincy, Massachusetts

RALPH G. MESSENGER,
Collector of Taxes.

REPORT OF DEPARTMENT OF HEALTH

JANUARY 1, 1939.

HON. THOMAS S. BURGIN
Mayor of the City of Quincy.

Dear Sir:—

As predicted in my last annual report, a large epidemic of scarlet fever occurred during the first half of the year. For the entire twelve months, 824 cases were reported. Of these, 543 cases were reported during the first three months, which constitutes a record high report for any consecutive three months for this city. This resulted in a greatly increased cost for contagious diseases hospitalized at the Massachusetts Memorial Hospital. During the year 140 patients were sent to this hospital, all but eight of them being ill with scarlet fever. This is an increase of 150 per cent over the number of patients sent to that institution the previous year. Fortunately there were no deaths, due largely to the mildness of the disease. However, this lack of virulence created greater problems in the control of the disease as it was very easy for cases to be undetected. I wish to thank and commend the School Department for their vigilance in checking on children returning to school and for finding many cases that would not have been discovered otherwise. The epidemic subsided in the early summer and only a normal amount is being reported at present.

At the present time, indications point to a more than normal prevalence of Measles this winter and spring. A considerable number of cases are being reported in Wards 5 and 6. We have been expecting for several years, an epidemic of Measles in Wards 1, 2, 3 and 4, because there has been a minimum of the disease in those wards since 1928, with the exception of a little higher prevalence in 1934. With the unusually large group of non-immune children in these sections it can be expected, that with any great number of cases reported from the north end of the city, that it will spread to these parts, in which event, an epidemic of considerable proportions may reasonably be expected.

Again we have had a year without Diphtheria. The last case reported was on March 16, 1936, or nearly three years ago. To the best of my knowledge, there is only one city in Massachusetts, having a population over 50,000, that can claim an equal record. This is due entirely to the splendid cooperation of doctors, parents, and the School Department, with our immunization program. To maintain the proper margin of safety we must have at least 30 per cent of the children from six months to four years old im-

munized and 70 per cent of the five to nine year group. At the present time our records show that 32.3 per cent of the younger group have received treatment and 75.7 per cent of the older group. To continue above this safety mark will require our going into the schools with the program again, this year, and an extended effort on those less than five years old.

Hospitalization of tuberculosis patients continues to grow. On January 1, 1938, we had the following number of patients at the three hospitals used by us, as compared with those hospitalized at the present time:

	January 1, 1938	January 1, 1939
Norfolk County Hospital	53	71
North Reading Sanatorium	3	4
Lakeville Sanatorium	6	12
Total	62	87

In addition we have two parties waiting for admission to Lakeville. As these are usually long term hospital cases, our only hope in staying within last year's expenditure for contagious diseases, is that we will be reasonably free from cases sent to the Massachusetts Memorial Hospital.

I regret to state, that the baby conference at Squantum had to be eliminated on account of lack of attendance, otherwise, our clinics have functioned smoothly and efficiently.

After many years of loyal service to the city, Mrs. Nettie D. Fowler was retired for disability. I have also recommended, at his own request, the retirement of James O'Dowd after 22 years of service in this department.

RECOMMENDATIONS

I. I realize that with the rising costs of government it will probably be impossible to create a health centre this year. Nevertheless, I wish to have it borne in mind by the city fathers, for possible future action. A health centre would combine all of our activities in a central location and would lend itself to more efficient and ideal programs.

II. To again call to your attention the need for a larger central office and proper equipment for same. As mentioned last year, our furniture is all antiques acquired from other departments that have been properly modernized, and give anything but the proper appearance one expects in an up-to-date health department. We have practically no filing equipment and many valuable records are simply stacked in bundles and would be a severe loss in case of fire. I have included items in our budget to take care of this, with the approval of yourself and City Council.

III. To continue the diphtheria immunization program, so successfully carried on for many years in Quincy, and with such gratifying results.

IV. To continue the effort by this city to effect the purification of our coastal waters by the elimination of discharging sewage in its present form.

V. To further improve the drainage of low spots where there is stagnant water at many times.

VI. To again urge the importance of prenatal care and instruction, and to recommend the services of the prenatal clinic to expectant mothers.

VII. To continue Dental Clinics as in the past.

VIII. To encourage and urge the voluntary annual inoculation of dogs against rabies. In case of an unsatisfactory number of animals being treated, I would recommend compulsory inoculations.

IX. For the third successive year, I emphatically urge the installation of an incinerator plant to burn the refuse collected in the city. With the unhealthy conditions and unsightly appearances that always go with public dumps, together with the ever increasing objections to such places, it is a question of only a short time when the disposal of rubbish will be a very troublesome problem, due to the objections of people in the immediate vicinity. I believe that we should take advantage of any help that we might be able to get in the way of Federal assistance, while these means are available.

Respectfully submitted,

RICHARD M. ASH, M.D.,
Health Commissioner.

JANUARY 1, 1939.

DR. RICHARD M. ASH,
Health Commissioner.

Dear Doctor:—

Attached are reports of the various activities of the Quincy Health Department.

This office has been through an exceedingly difficult year. There was a considerable amount of serious sickness in the department, that made a considerable amount of changing of duties, temporarily, on account of the Scarlet Fever epidemic. Sickness and disability required the pensioning of two of our long time employees, Mrs. Nettie D. Fowler and James O'Dowd.

As usual, in addition to my office duties, I have taken care of sanitary inspections, settlement investigations, conducting of diphtheria immunization work and other duties. I wish to thank all members of the department for their splendid cooperation during this past year.

Respectfully submitted,

HOWARD E. PORTER,
Agent.

MORTALITY STATISTICS

Number of Deaths and Death Rates. During the year of 1938, there were 652 deaths that occurred in Quincy, 39 less than in 1937. Based on the estimated population of 80,521, the crude death rate was 8.1 per 1000 population, as compared with a crude death rate of 8.7 per 1000 population in 1937.

Of the 652 deaths in Quincy, 42 were non-residents. There were 140 Quincy residents who died outside of the city; so that the number of resident deaths for the year was 750 as compared with 777 for 1937. The corrected or resident death rate was 9.31 per 1000 population, a slight decrease over last year. The tables for 1938 are based on resident deaths; the non-resident deaths being excluded and resident deaths occurring outside of Quincy included.

Sex. Of the 750 resident deaths for 1938, 389 or 52 per cent were males, and 361 or 48 per cent were females. The proportion of males in the living population shown by the United States Census of 1930 was 49.3. Based on this ratio the male resident death rate for Quincy in 1938 was 9.7 as against a rate of 8.8 for females.

Age. Of the 750 deaths in 1938, 44 or 5.9 per cent were of infants under one year of age. More detailed information of infant mortality is in a following paragraph and in Table 5. Other age distributions will be found in Table 1.

Nativity. 59.0 per cent of the decedents were of native birth and 41.0 per cent were foreign born.

Infant Mortality. The infant mortality rate for Quincy in 1938 was 37.3 as against 32. per 1000 live births in 1937. The following

figures show at what time of the first year of life these deaths occurred:

First day	19 deaths or 43.2%
Less than 1 week but more than one day	9 deaths or 20.4%
Less than 1 month but more than 1 week	3 deaths or 6.8%
Less than 6 months but more than 1 month ..	6 deaths or 13.7%
Less than 1 year but more than 6 months	7 deaths or 15.9%
<hr/>	
44 deaths or 100.%	

There were 1309 births during 1938. Resident births in Quincy 903, resident births outside of Quincy 276 and 130 non-resident births in the City.

Of these 44 infant deaths, 25 were caused by premature birth, injury at birth, and other diseases peculiar to early infancy. There were in addition 5 deaths from congenital malformation. Table 2 will show under what division these and the balance of 14 deaths were classified.

Heart Disease, as usual, was the leading cause of death, with 236 or 31.8 per cent of the total, with a rate of 293.0 per 100,000 population. In 1937 the rate was 319.2 per 100,000 population.

Bright's-Disease and Nephritis caused 49 deaths for a rate of 60.9 per 100,000 population. The rate for 1937 was 98.1 per 100,000 population.

Cerebral Hemorrhage, Cerebral Embolism and Thrombosis were the cause of 76 deaths, with a rate of 94.3 per 100,000 population, as against a rate of 78.6 in 1937.

Cancer and other Malignant Tumors caused 106 deaths or practically 14 per cent of the total. The 1938 rate was 132. as compared with 136.4 per 100,000 population for 1937.

Pneumonia accounted for 49 deaths, for a rate of 68.5 as compared with 73.4 per 100,000 population in 1937.

Tuberculosis in all of its forms was the cause of 30 deaths for a rate of 37.2 per 100,000 population. Table 4 shows vividly the declining death rate for this disease.

Maternal Mortality. Deaths from puerperal causes in 1938 totalled 3, indicating a rate of 25.4 per 10,000 live births.

Reportable Diseases. The number of deaths and death rates from epidemic and infectious diseases for 1938 are shown in Table 3. The death rates since 1878 for certain of the diseases are shown in Table 4.

Automobile Accidents and Injuries, caused 7 residential deaths for a rate of 8.7 per 100,000 population. Also 2 residential deaths occurred outside of the City, making a total of 9 for the year 1938.

JANUARY 1, 1939.

DR. RICHARD M. ASH
Health Commissioner.

Dear Dr. Ash:—

"Tuberculosis Statistics for 1938"

During 1938, for the first time, there was a decrease in the number of new cases of Pulmonary Tuberculosis reported. This may be explained, either on the basis that we have finally reached our peak in our fight against the white plague, or it may be a natural reward for the intensive efforts for the early hospitalization of all active cases. In either case it is good news and we hope it will continue.

The present regime, of having two cars for the Dispensary Nurses, will pay dividends in the control of Tuberculosis. Many more cases will be discovered, more contacts can be brought to the Dispensary for early examination and diagnosis, and proper disposition can be made, so that the spread of the disease will be checked. Also more post sanatoria visits for the ex-san cases will be made, and a better follow-up of those cases will result.

In the past this work was unsatisfactory, simply because two nurses having only one car, did not have sufficient time at their disposal for a thorough follow-up of these cases.

Last year's State Survey, removed some one hundred and forty cases from the active files and thus more time could be given to the remaining active cases. The more time you have, the more persuasion you can give to those cases needing collapse therapy and early hospitalization, and thus quickly render the sputum negative and saving all contacts from contagion. This in turn means a distinct gain in the control of Tuberculosis.

"The Children's Clinic"

The City of Quincy stands very high in the fight against Tuberculosis, and I believe, our success centers in our Children's Clinic. This clinic is fundamentally educational and all control of Tuberculosis is based on education. In this clinic we find the primary or glandular type of disease. This type, though not contagious, may become active and contagious if not treated. Hence, we cannot only prevent the activity of these cases but through investigation in their homes, we will probably find the active cases that really infected these children. Thus we have a two way attack, in one we prevent infective cases from becoming diseased or contagious cases, also discover active cases, and hospitalize them. So we protect the community from the spread of Tuberculosis and this briefly means the control of Tuberculosis.

The money appropriated yearly for this clinic is a good investment and health dividends in abundance result. Reviewed as a tax problem, it is said that it costs \$100 to prevent and \$1500 to treat and cure Tuberculosis. Expressed as a survey problem, we estimate one year to prevent and from three to five years to cure. The

right thing to do is obvious, and the City of Quincy is doing it in a very thorough manner.

As a corollary, I believe the State should re-establish the "Chadwick Clinics" in the cities and towns. Originally these clinics discovered many Hilum cases among the children and stressed the importance of carrying on the so-called "Ten Year Program."

Many of the cities and towns, since the depression, are unable to stand the expense of this work. Hence, the work is not being done. It is my belief, that the State should again do the work, and spread the expense to general taxation. After all, this problem is really a State problem and all should share in the expense. Otherwise, these primary cases will later become active Pulmonary cases and thus Tuberculosis will rapidly increase, and naturally, Tuberculosis control will be retarded. Briefly, it's the old story, prevention is always the best and cheapest method in solving all disease, and this is doubly so in Tuberculosis. During the last few years there seems to be a laxity in the reporting and handling of the primary and glandular Tuberculosis cases. Such excuses, as a refusal by insurance companies to take these cases are sad indeed, when you realize that these same children are to be the future citizens and home makers of the community. Their health should be paramount and neither expense nor commercialism should obstruct their progress. We should also remember, that usually, the most successful communities are also the healthiest.

The story of this clinic in Quincy since the beginning, has been one of progress, and a definite increase in its registration has been noted yearly. It has many times brought favorable comment from the authorities of the State Preventoria. The constant flow of cases to these institutions, has convinced them, that Quincy is very sincere in its fight to control Tuberculosis, and will not spare expense when the health of the community is at stake. Of course, all communities believe in this policy but few do so thorough a job as Quincy. Intensive fight against active cases seems to be her slogan in Tuberculosis control and let's hope that Quincy will never change it until full control is obtained.

Along this trend of thought it is certainly worth while recording, that during the past year five new cases of pulmonary tuberculosis were diagnosed in the clinic, of which four were minimal cases. This is very fortunate for the welfare of the cases, and very creditable for the dispensary.

Also, out of 163 possible contacts during the past year 147 were brought into the clinic by the nurses. This is getting 85 per cent, whereas 65 per cent has been the average of the county sanatorium. Naturally, the full regime of testing is used in these cases, that is, all are given the Mantoux skin test and are X-rayed. All our diagnosed cases are hospitalized within 48 hours to two weeks after reporting to the clinic.

"Camp Norfolk Preventorium"

Surely one of the chief reasons for the success of this clinic is Camp Norfolk. Here carefully selected contact groups are given intensive health training and come back to their homes fully restored to health. These children are not only specimens of good health on their return but they also become crusaders for good

health among their less fortunate play mates. Many a new family becomes registered in the clinic, because they see the good results obtained in the camp by their neighbor's child. Hence, as an educational source, this camp is certainly worth while in the solution of Tuberculosis control. Quincy has always supplied more than half of the camp's quota, and last year, we sent an over supply of ten children to the Prendergast Preventorium.

Quincy is certainly doing a good job in the Tuberculosis problem and should serve as a model for all other cities wishing to do the right thing for their community health.

Sincerely yours,

CORNELIUS J. LYNCH, M.D.,
Dispensary Physician.

REPORT OF THE TUBERCULOSIS DISPENSARY NURSES

JANUARY 1, 1939.

RICHARD M. ASH, M.D.
Health Commissioner.

Dear Dr. Ash:—

We herewith submit to you our annual report for the year ending December 31, 1938.

Total number of all kinds of tuberculosis on record in the city	571
Pulmonary tuberculosis	324
Childhood type tuberculosis	215
Other forms	32

New cases of tuberculosis reported during the year.....	81
Pulmonary tuberculosis	65
Childhood type tuberculosis	7
Other forms	9

Disposition of New Pulmonary Tuberculosis cases:	
Admitted to sanatoria	44
Reported by death certificate	2
Taking treatment at home and working	10
Died at Quincy City Hospital	1
Waiting for admission to sanatorium	2
Died at home	2
Diagnosis revoked	2
Children diagnosed minimal pulmonary tuberculosis and were admitted to North Reading State Sana- torium	3

Disposition of New Childhood Type Tuberculosis:	
Admitted to North Reading Sanatorium	3
At home under clinical follow-up	4

Disposition of New Other Forms:	
Admitted to Lakeville State Sanatorium	6
Discharged from Peabody Home against advice- Diagnosis being made upon discharge	1
At home and under care of Mass. General Hospital	1
On waiting list at Lakeville State Sanatorium	1

"Norfolk County Hospital"

Cases admitted to Norfolk County Hospital during the year	53
--	----

Cases discharged from Norfolk County Hospital during the year:	
Arrested Pulmonary T. B.	14
Indefinite leave of absence to report regularly to the hospital for refills and examinations	6
Left against advice "Unimproved"	5
Left against advice "Improved"—hemo-pneumothorax	1
Left against advice to take home treatment "Im- proved"	1
Discharged in "Improved Condition"	3
Quiescent	2
No Disease "Admitted on 60 day observation"	1
Bronchiectasis "Unimproved"	1

Empyema "Unimproved"—Non T. B.	1
Carcinoma "Unimproved"—Non T. B.	1
Dead	15
Pulmonary and Silicosis deaths	3
Inactive Pulmonary T. B. but active Silicosis	1
Discharged against advice and readmitted—later dis- charged to Wellington Home, negative sputum ...	1
Cases who had been discharged on "leave of absence" but readmitted during the year	3

"North Reading State Sanatorium"

Number of cases listed at sanatorium at beginning of year	6
Cases admitted during the year	7
Pulmonary tuberculosis in children.....	3
Childhood type	4
Cases discharged during the year—"Arrested Hilum"	1
Number of cases at sanatorium at end of year	12

"Lakeville State Sanatorium"

Cases at sanatorium at beginning of year	4
Cases admitted during the year	7
Cases discharged during the year	4
Condition on discharge:	
Dead	1
T. B. Hips "Arrested condition" with braces on	1
T. B. Kidney "Quiescent"	1
T. B. Hip "Arrested condition" attending school	1
Cases at sanatorium at end of year	7

"Deaths"

Total number of deaths reported during the year	26
Died at home	9
Died at Quincy City Hospital	1
Died at Norfolk County Hospital	14
Died at Boston City Hospital—auto accident	1
At Lakeville Sanatorium	1

"Adult Clinic"

Attendance	298
New cases added to clinic register	97
Number of contacts examinations made	89
Number of sputum examinations made	209
Patients X-rayed at Norfolk County Hospital	147
Number of Mantoux Tests done	112

"Children's Clinic"

Attendance	1388
New cases added to clinic register	238
Number of contact examinations made.....	618
Mantoux Tests done	225
Number of children admitted to Norfolk County Pre- ventorium for eight weeks during the summer	43

Number of children admitted to Prendergast Camp for two, three and four weeks during the summer— not eligible for Norfolk County Preventorium	8
Vaccinations done	10
Cases referred to Quincy City Hospital for T & A operations	24
Cases referred to nose and throat specialist	2
Cases referred for dentistry	14
Cases examined before admitting children to Farrington Memorial, Lexington (For Family Welfare)	20
Number of X-rays taken	142
Total number of visits made to and in behalf of tuberculosis patients	1849

Respectfully submitted,

GERTRUDE T. RUSSELL, R.N. ,
KATHERINE J. WISEMAN, R.N.,
Dispensary Nurses.

REPORT OF THE CHILD WELFARE CLINIC

JANUARY 1, 1939.

DR. RICHARD M. ASH
Health Commissioner.

Dear Dr Ash:—

The last year has seen both an increase in the attendance and in the registration at the Child Welfare Clinics.

The attendance at some of the clinics has been less, but there has been an increase in the registration in every case except the Orthopedic and the Squantum Clinics.

It is only a question of time, however, before registration at Child Welfare Conferences will become less on account of the marked drop in birth rate all over the United States. Of course, this may be completely offset if there is an industrial boom in Quincy along with the usual influx of families.

Among the registered babies, there were no deaths from nutritional diseases or other conditions that are usually considered preventable.

During the year the first Child Welfare Nurse for the City of Quincy, Mrs. Nettie Fowler, resigned. It was the writer's privilege, as Child Welfare Physician, to start work with Mrs. Fowler approximately sixteen years ago. All during that time, and for some years before, her untiring industry and cheerful tact was a welcome help to the mothers attending the Child Welfare Conferences.

Truly yours,

EDMUND B. FITZGERALD, M.D.,
Child Welfare Physician.

REPORT OF CHILD WELFARE NURSES

JANUARY 1, 1939.

DR. RICHARD M. ASH,
Health Commissioner.

Report of the Child Welfare Nurses for the year ending December 31, 1938.

Total clinic registration during year	1594
Total clinic registration active December 31	1243
Total new registrations during year	724
Total preschool registration (1938)	161
Registered over 6 years in Othopedic clinic	56
Total clinic attendance	6148
Removed from file for reason given below.....	351
Deaths	6
Broncho pneumonia	3
Suffocation	1
Lobar pneumonia	1
Drowning	1
Inactive 12 months and over	
Entered school	
Moved from city	
Number of clinics held	307
Well baby clinics	286
Preschool clinics	10
Orthopedic clinics	11

REPORT OF ORTHOPEDIC CLINIC

FEBRUARY 16, 1939.

DOCTOR RICHARD ASH, *Health Commissioner,*
Health Department,
 1305 HANCOCK STREET,
 QUINCY, MASSACHUSETTS.

Dear Doctor Ash:

Enclosed is a report of eleven Orthopedic Clinics attended by me during the year 1938.

With kindest regards, I am

Sincerely yours,

JOHN L. DOHERTY.

JLD:MY

Report of Orthopedic Clinic

The following is a report of eleven clinics attended by Dr. John L. Doherty from January, 1938, to December, 1938, inclusive.

171 children were examined—63 were new admissions and 108 were follow-up examinations.

Classification of Conditions Found in New Patients

Pronated feet	25
Knock knees	12
Bow legs	4
Flat feet	18
Poor posture	1
Curvature	1
Congenital valgus	1
Infantile	1
	<hr/>
	63

One hundred eight children reported for follow-up examination.

REPORT OF THE HABIT CLINIC

FEBRUARY 25, 1939.

RICHARD M. ASH, M.D.,
Health Commissioner,
CITY HALL,
QUINCY, MASSACHUSETTS.

MY DEAR DOCTOR ASH:

You will please find enclosed the annual report of the Quincy Habit Clinic for the year 1938.

I trust this report will be satisfactory. If you feel that further information should be included, please do not hesitate to request it.

Sincerely yours,

EDGAR C. YERBURY, M.D.,
Director.

ECY:MF
Enc.

Annual Report of the Quincy Habit Clinic

The twelfth annual report of the activities of the Quincy Habit Clinic for the fiscal year ending November 30, 1938 is herewith submitted.

This clinic has been functioning efficiently throughout the year, continually stressing the quality of work rather than the quantity.

There has been no change in the aim, service and procedure of the clinic. The policy has been to continue to give intensive treatment consistent with highest therapeutic standards to a limited number of children needing prolonged study and treatment. Every case referred has been accepted for appraisal at least, and recommendations have been made to the referring agencies as to the most practical course to pursue.

There have been minor changes in the clinic personnel, as well as changes in the manner of referring cases through the School Department. The primary change in the latter method of referring cases was brought about by the establishment of a Guidance Department in the School System. This Department has taken over the active responsibility of dealing with the problems of the children in the School System. In the past, all referrals to the Habit Clinic had been made directly by the individual school principal. Any case now needing advice or treatment is first referred to the Guidance Department by the school principal. This Department then decides whether the child is in need of study by the Habit Clinic. With the organization of the Guidance Department fewer cases have been referred by the School System, as many problems are treated by the Guidance Department.

Following this change in policy, the clinic staff was reduced and at the present time there is only the service of one psychiatrist. The case load became somewhat lighter. However, the surrounding communities have referred their problems directly to the clinic in increasing numbers, so that the actual number of new cases has not dropped as much as would be anticipated.

During the year a number of conferences were held between the clinic staff and the School Department. This service has been a very valuable one as mental hygiene education has proved helpful to those persons dealing directly with children.

The *modus operandi* is briefly described so that interested persons may be better acquainted with the procedure. Children are referred to the Habit Clinic for numerous reasons by various sources. These reasons and sources will be found in the tables embodied in this report. The clinic assumes that a child will require detailed study in order to determine the real cause of the difficulty.

This full study begins with a careful checkup of the child's physical condition, excepting where recent and adequate physical examinations have been made and results of the same reported to the clinic. In some cases where definite physical factors are presented and without doubt are the etiological bases for the child's mental problem, the Habit Clinic acts only in an advisory capacity to the pediatrician or proceeds with a cooperative therapeutic program.

The next step is the psychological study of the child and the interpretation of the results by the psychologist. An evaluation of the child's intellectual endowment, his school achievements, special aptitudes and educational possibilities is made. The psychologist's observation of the child during his period of study offers a definite contribution in a better understanding of the child's personality.

A study of the child's home, school and play environments is made by the psychiatric social worker. This information is obtained from all those having a contact with the child, as the parents, relatives, teachers, physicians and others familiar with the child's environment. A complete report of the family situation, personal and developmental histories of the child, along with a record of his adjustment in school completes the picture of his environmental background.

The clinic psychiatrist then makes contacts with the child and his parents. The psychiatric study begins with an observation of the child's behavior and reactions. This procedure is then followed by a general summarizing and coordinating of all the information and impressions obtained by the members of the staff. The case is reviewed at a conference of the staff members, a diagnostic summary is made and the treatment outlined, pointing out to the parents and other interested persons the probable causes of the child's difficulties and the mode of proceeding with treatment.

During the year, the educational program has been continued, keeping in mind the importance of interesting the community (parents, teachers, physicians and public health nursing groups) in the field of mental hygiene. The staff of the Habit Clinic has cooperated with various clubs and organizations in giving talks and lectures on the principles of mental hygiene.

The Director of the Division of Mental Hygiene and the Habit Clinic Staff wish to express their appreciation to the Health Commissioner, the School Department and the various agencies in the community who have so willingly cooperated with the clinic during the past year.

Nervous mannerisms	Showing off*

Conduct Problems

Stealing	Lying
Truanting	Sex misconduct

Scholastic Problems

Repeated school failure	Destructiveness
Reading disability	Poor teacher-child relationship
Refusal to attend school	Lazy child*
Inattention	Nervous child*
Listlessness	

*Term frequently used by persons to describe maladjusted children.

REPORT OF PART TIME PAROCHIAL SCHOOL NURSE

JANUARY 1, 1939.

DR. RICHARD M. ASH,
Health Commissioner.

Dear Sir:

I hereby submit my report for part time Parochial School Nurse from September 26, 1938 to December 31, 1938.

Number of visits made to schools	42
Number of children given vision tests	799
Number of children weighed and measured	464
Number of children examined in nurses room for various causes	42
Number of dental appointments made	10
Number completing dental work	6
Sanitary inspection of each school.	
Class room inspection of first three grades in each school.	
Records.	
Chadwick Clinic.	
Assisted Dr. Jenkins with Mantoux Test.	
Number of children tested	96
Number of arm readings	96
Moving Picture of "Behind the Shadows" was given for the seventh grade students in each school by Miss Nevers.	
Relief Work.	
Assisted Dr. Ash at Immunization Clinic —	
Number of children	13
Released scarlet fever case	1
Posted scarlet fever case	1
Office hours.	

Respectfully submitted,

KATHERINE WISEMAN, R.N.

REPORT OF PART TIME PAROCHIAL SCHOOL NURSE

JANUARY 1, 1939.

DR. RICHARD M. ASH,
Health Commissioner.

Dear Sir:—

I hereby submit my report for part time Parochial School Nurse from January 1, 1938 to October 1, 1938.

Number of visits to Parochial Schools	125
Number of children given vision examinations	1117
Number of children weighed and measured	500
Number of children examined for various causes, in nurses room	243
Number of children given health inspection	2000
Pupils were instructed in healthful living, both in groups and individually.	
Number of class talks given	80

All pupils were given health inspection after vacations, when returning to school after an illness, and at request of teacher.

Number of children referred to family doctor 106

All class rooms were inspected where a communicable disease had been reported.

Suspicious looking cases were excluded from school .

Number of house calls made to pupils absent for three days
or more 210

Number of follow-up calls made 180

Approximately 75 per cent of all defects of the pupils were corrected.

Sanitary inspection of school buildings.

Respectfully submitted,

HAZEL R. KERR, R.N.

REPORT OF INFANTILE PARALYSIS COMMISSION

300 Longwood Avenue,
Boston, Massachusetts.
JANUARY 25, 1939.

DR. RICHARD M. ASH,
Health Commissioner,
CITY HALL,
QUINCY, MASSACHUSETTS.

My dear Dr. Ash:—

During 1938 there were fifty-five active infantile cases in the Quincy district. Forty-one of these attended the local Clinic which is held each Monday at the Quincy Dispensary on High School Avenue.

There were forty-four Clinics held during the year and six hundred and twenty-six treatments were given.

Four new cases were added to the enrollment—two from Quincy and two from Braintree.

Five cases were operated upon, four of them at the Children's Hospital and two cases were sent to the Wellesley Convalescent Home of the Children's Hospital. Two cases have been for some time at the Lakeville State Sanatorium in Middleboro.

May I take this opportunity to express my appreciation of the splendid cooperation extended to the Harvard Infantile Paralysis Commission workers at the Quincy Clinic.

Sincerely,

ARTHUR T. LEGG, M.D.

REPORT OF COMMUNICABLE DISEASE NURSE

JANUARY 1, 1939.

DR. RICHARD M. ASH,
Health Commissioner.

Dear Doctor:—

I herewith submit my annual report as Communicable Disease Nurse for the year ending December, 1938.

One thousand, eight hundred and five cases of notifiable diseases were reported as follows:

Anterior Poliomyelitis	1	
Chickenpox	400	
Cat Bite	2	
Dog Bite	160	
Epidemic of Cerebro Spinal Meningitis	2	
Encephalitis Lethargica	1	
German Measles	17	
Influenza Meningitis	2	
Lobar Pneumonia	82	
Malaria	1	
Measles	205	
Mumps	52	
Para Typhoid	2	
Scarlet Fever	824	
Septic Sore Throat	3	
Suppurative Conjunctivitis	1	
Typhoid Fever	5	
Undulant Fever	1	
Whooping Cough	44	
Total number of visits		3224
Scarlet Fever— 1933 }		
By other nurses— 739 }	2672	
Measles	355	
Typhoid Fever (Cultures 89) Widal's 3	130	
Whooping Cough	52	
Anterior Poliomyelitis	3	
Influenza Meningitis	2	
V. Disease	10	
Cases sent to hospitals		150
To Haynes Memorial	140	
Scarlet Fever	133	
Measles	2	
Whooping Cough	3	
Chickenpox	1	
Strept. Throat	1	
To Quincy Hospital	10	
Typhoid Fever	5	
Para Typhoid	2	
Anterior Poliomyelitis	1	
Influenza Meningitis	2	

Anterior Poliomyelitis

One case was reported, a decided decrease as compared with eleven cases reported in 1937. This patient died at the Quincy City Hospital.

Diphtheria

For the second consecutive year, no diphtheria was reported. During the year 16 clinics for immunization were held. A total of 327 children were immunized. The various age groups are as follows:

Under 1 year	72
1 year	148
2 years	55
3 years	32
4 years	13
5 years	8
6 years	5
7 years	4

Measles

Two hundred and five cases were reported, five less than in 1937. Two cases were hospitalized.

Scarlet Fever

There were over twice as many cases reported this year than were reported in 1937. One hundred and thirty-three cases, of the eight hundred and twenty-four cases reported, were sent to the John Haynes Memorial Hospital.

Typhoid Fever

Five cases of Typhoid Fever, as well as two cases of Para Typhoid, were reported and sent to Quincy City Hospital.

As the State Department of Health recommends, home visits were made on patients having had the disease. These visits were made monthly for one year. Specimens were obtained and sent to the State Laboratory. Four contacts of Typhoid Fever were given the inoculations by the Commissioner, Dr. Richard Ash, at the Health Department Office.

Whooping Cough

Forty-four cases were reported, a decided decrease in number, as compared with 246 cases reported last year.

Clinics attended	70
V. Disease	37
Dental	12
Baby	4
T. A. T.	16
Undernourished	1

In the follow-up work, 3224 visits were made including placarding, re-visiting, investigating complaints, school visits, checking quarantine regulations, taking cultures, examination of contacts and releases from quarantine.

Office hours were held daily, children were examined and certificates for return to school given. Practically all of these examinations were for children having had mumps and chickenpox.

Respectfully submitted,

CATHERINE F. COLEMAN, R.N.,
Contagious Disease Nurse.

DENTAL CLINIC REPORT

JANUARY 1, 1939.

RICHARD M. ASH, M.D.
Health Commissioner.

Dear Doctor:—

The existence of a Dental Health Problem and its relation to the general health cannot be overlooked, and so if physical examinations reveal defects, it is obvious that something must be done to correct these defects; therefore, it is with no little satisfaction that I have noticed the remarkable results which are now evident in the mouths of the children who have attended the clinic for the last three years. More permanent or first molars have been retained, which would be missing now had these children not attended the clinic. The deciduous or temporary teeth are filled when possible, which, together with holding the normal shape of the mouth, they are needed to properly masticate his food.

The children are instructed in the proper use of the tooth-brush and are urged to brush their teeth regularly. Persistent reminders on this point cannot fail to bring results.

As in the past year, the attendance at the Dental Clinic has been very good. Clinics are held every school day from 9:00 o'clock to 1:00 o'clock, at the Coddington School, for the children of the first three grades.

I would be lacking in appreciation if I did not mention the able and efficient help I have received from Miss Eleanor Dempsey, Dental Assistant.

I take pleasure in extending my thanks to you, as Commissioner, and also to the members of the Health Department, for the cooperation I have received during the past year.

Respectfully submitted,

LOUIS E. SULLIVAN, D.M.D.,
School Dental Clinician.

REPORT OF SCHOOL DENTAL CLINIC

DR. RICHARD M. ASH
Health Commissioner.

Dear Dr. Ash:

I herewith submit to you the annual report of the School Dental Clinic for the year ending December 31, 1938.

Number of first, second and third grade children examined	3474
Number dental clinics	195
Number total attendance at clinics	2495
Number dental appointments	2840
Number dental appointments not kept	366

Number of extractions	1269
Number of temporary teeth extracted	1182
Number of permanent teeth extracted	87
Number of fillings	1268
Number of temporary teeth filled	569
Number of permanent teeth filled	699
Number of prophylactic treatments	617
Number of children refusing treatment	35
Number emergency cases	109
Number completed cases	396

Respectfully submitted,

ELEANOR E. DEMPSEY,
Dental Assistant.

REPORT OF PRESCHOOL DENTAL CLINIC

DR. RICHARD M. ASH
Health Commissioner.

Dear Dr. Ash:

I herewith submit to you the report of the Preschool Dental Clinic for the year ending December 31, 1938.

Number of clinics	98
Number total attendance at clinics	718
Number different children treated	186
Number extractions	54
Number fillings	642
Number prophylactic treatments	102
Number treatments	54
Number examinations	31
Number refusing treatment	14
Number appointments not kept	73
Number referred for gas anesthesia	19

Respectfully submitted,

ELEANOR E. DEMPSEY,
Dental Assistant.

REPORT OF MILK INSPECTOR

JANUARY 1, 1939.

DR. RICHARD M. ASH
Health Commissioner.

Dear Sir:

I herewith submit my report for the year ending December 31, 1938.

The following statistics refer to milk, cream, ice cream, chocolate milk, buttermilk and oleomargarine, produced and consumed in the City of Quincy.

Dairies in City of Quincy

1	dairy having	60	cows	•
1	"	"	37	"
1	"	"	7	"
1	"	"	3	"
7	dairies having	1	cow each	

Total number of cows 114

Total number of quarts of milk produced by dairies in the City of Quincy	1,140
Total number of cows in nearby dairies	1,141
Total number of quarts of milk produced in nearby dairies and distributed in Quincy	14,100
Milk contractors' processing plants, storage and creameries doing business in Quincy	14
Milk contractors' processing plants, storage and creameries who come from out of the City of Quincy	45
Teams, auto cars and trucks employed in distribution of milk, cream, ice cream, chocolate milk and buttermilk (All have been inspected)	211
Milk processing plants doing business in the City of Quincy	10
Amount of milk pasteurized in Quincy (quarts)	31,900
Milk consumed in the City of Quincy (quarts)	36,017
(All milk is pasteurized except certified milk)	
Ice cream manufacturers in Quincy	13
Ice cream manufactured in Quincy (gallons)	611
Ice cream consumed in Quincy (gallons per day)	1,710
Ice cream manufactured outside of Quincy (gallons per day)	1,540
(All ice cream is pasteurized)	
Certified raw milk consumed in Quincy (quarts)	149
Grade A milk consumed in Quincy (quarts)	2,473
Chocolate milk consumed in Quincy (quarts)	145
Cream consumed in Quincy—all grades (quarts)	2,683
Buttermilk consumed in Quincy (quarts)	451
Retail licenses issued in Quincy for sale of milk, cream, ice cream and oleomargarine	701
Milk samples collected	1,277
Milk samples taken from teams and trucks	740
Milk samples taken from stores and schools	168
Milk samples taken from dairies	369

1,277

Milk samples taken before pasteurization	279
Milk samples below State standard for butter fats.....	3
Milk samples with high bacteria count	9
Cream complaints investigated	1
Cream and ice cream samples collected	134
Samples taken for bacteria	67
Samples taken for chemical test	67
	<hr/>
	134
Number of stores visited and milk, cream and ice cream cabinets inspected and re-inspected	755
Number of milk rooms inspected and re-inspected	367
Number of milk processing plants inspected and re-in- spected	261
Number of ice cream manufacturing plants inspected and re-inspected	61
Special milk consumed in Quincy (quarts)	966

I take this opportunity of thanking the members of the Health Department with whom I was associated for their cooperation as well as the several Health Commissioners under whom I served the past twenty-two years.

Respectfully submitted,

JAMES O'DOWD,
Milk Inspector.

REPORT OF BACTERIOLOGIST

January 1, 1939

Plate counts (milk)	589
Plate counts (ice cream)	58
Babcock tests (ice cream)	58
Smears for pus and streptococci (milk)	589
Chemical examinations (milk)	683
	<hr/>
Total examinations	1,982

EDWIN E. SMITH, M.D.

REPORT OF VENEREOLOGIST

JANUARY 1, 1939.

Female Clinic

Treated for gonorrhoea (patients)	3
Visits for gonorrhoea	6
Contacts examined	10
Treated for syphilis (patients)	32
Visits for syphilis	634
Discharged	6
Lapsed treatment	8
Remaining under treatment	19
Total visits by females	650

Male Clinic

Treated for gonorrhoea (patients)	8
Visits for gonorrhoea	81
Contacts examined	7
Treated for syphilis (patients)	25
Visits for syphilis	473
Lapsed treatment	14
Discharged	3
Remaining under treatment	16
Total visits by males	561

EDWIN E. SMITH, M.D.

REPORT OF INSPECTOR OF ANIMALS AND
SLAUGHTERING

March 1, 1939

DR. RICHARD M. ASH
Health Commissioner.
QUINCY, MASSACHUSETTS.

Dear Sir:

I herewith submit my report for 1938.

Number of cows inspected, 95. All were in good health.

Number of dogs quarantined for rabies, 147. No positive cases of rabies developed.

Sincerely yours,

EDWARD A. DEVARENNES.

REPORT OF INSPECTOR OF MEATS, PROVISIONS AND RESTAURANTS

JANUARY 1, 1939.

To the Commissioner of Health
QUINCY, MASSACHUSETTS.

Dear Sir:

I submit the report of the work in this office for the year ending December 31, 1938.

Inspections made	3,500
Meat and Foodstuffs Condemned as Unfit for Food:	
Poultry (pounds)	65
Lamb (pounds)	32
Veal (pounds)	17
Fresh pork (pounds)	10
Frankforts (pounds)	12
Hamburg steak (pounds)	24
Corned shoulders (pounds)	6
Haddock (pounds)	63
Mackerel (pounds)	35
Halibut (pounds)	5
Lobster meat (pounds)	6
Scallops (pints)	1
Oysters (quarts)	1
Grapes (pounds)	15
String beans (pounds)	25
Shell beans (pounds)	15
Corn, sweet (dozen)	5
Blueberries (boxes)	10
Salad dressing (pints)	12
Pies	2

Food Establishments in Quincy

Markets	129
Stores	132
Restaurants and lunch rooms	124
Fruit stores	48
Bakeries and food shops	32
Creameries	15
Delicatessens	16
Fish markets	75
Beer and wine licenses serving food	78
Confectionery stores	20

Conditions in local food stores and markets have been most satisfactory, this past year. Owners, managers, and chain store supervisors have been most cooperative, with results that are most gratifying.

More inspections were made than in any other year and with this cooperation, the stores have been brought up to higher standard of sanitary conditions than ever before. On account of more frequent calls, less foodstuffs were condemned than usual.

More self-service stores have been established in Quincy and we have some of the largest retail stores in the state.

Restaurants and taverns have been regularly inspected to maintain the regulations laid down by this Department.

All markets were visited before Thanksgiving and Christmas for the purpose of inspecting poultry for sale. No complaints were made to the Health Department of poor poultry during this season, which speaks well for the quality of these birds. As a matter of fact, very few complaints were registered during the entire year, against stores and restaurants, which speaks for itself as to the conditions prevailing.

Respectfully submitted,

HOWARD ROGERS,
Inspector of Meats, Provisions and Restaurants.

REPORT OF INSPECTOR OF PLUMBING

JANUARY 1, 1939.

DR. RICHARD H. ASH,
Health Commissioner.

Dear Sir:—

I hereby submit my annual report as Inspector of Plumbing for the year 1938.

Applications filed	1611
Received for permits	\$1,488.25

The following is a list of applications filed and the amount received by months:

	Applications	Received for Permits
January	108	\$98 25
February	102	77 25
March	152	142 00
April	145	131 50
May	151	140 25
June	180	168 25
July	116	110 75
August	162	149 50
September	120	128 75
October	135	125 50
November	129	109 25
December	111	107 00

New buildings for which permits were issued	104
---	-----

Dwellings	92
Other buildings	10

Fire Station	1
Public Markets	2
Office Building	1
Library Building	1
Filling Stations	2
Mercantile Stores	2
Diner Building	1
Park Field House	
(W. P. A.—No permit)	1

Buildings connected with sewer	296
New buildings connected to sewer	92
New buildings connected to cesspool	5
New buildings connected to septic tank	6
Old buildings for which permits were issued	1508
Old buildings connected to sewer (new connections)	89
Old buildings connected to cesspool	1
Old buildings connected to septic tank	0
Master Plumbers registered	202
Residents of Quincy	53
Non residents	149

The price of permits, fixed by ordinance, as of January 1, 1937, has been generally satisfactory with one exception. The ordinance requires that the fee for the installation of a sink and tray combination shall be fifty cents, but does not specify any other fixture, therefore, it is necessary to charge one dollar for any fixture other than a sink and tray.

I would recommend that the ordinance be changed to read: Section 2, Paragraph 6, sub-division 3—Where no other plumbing work is to be done or permit issued, replacement of domestic hot water appliances, fifty cents for permit; replacement of one plumbing fixture, fifty cents.

Attention is also directed to the increasing number of permits issued by this office; 1611 for the year 1938.

Chapter 142, Section 11 of the General Laws, requires that the Inspector of Plumbing shall inspect all plumbing in process of construction, alteration, or repair, for which permits are granted within their respective cities.

It is also required that the Inspector give a certain amount of time to office consultations, office work (letters, reports, etc.), outside consultations and investigations, appearances in court, appearances before the Board of Examiners of Plumbers, and the making of innumerable extra calls where the occupants of houses and apartments in which plumbing has been done, are not at home.

It is the desire and purpose of the Inspector to comply strictly with the law insofar as I can, in the making of inspections and the fulfillment of the duties of my office, but during the past year there have been times when the ability of one inspector to make the necessary calls has been taxed to the limit.

If inspections are to be made, I believe that proper time should be given so that inspections can be made with care; large buildings with intricate systems of plumbing require many inspections, and as several large buildings are contemplated during the coming year, I believe we should also anticipate the possibility of an extra inspector on part-time, when, and if necessary.

The two Yacht Clubs, namely, the Wollaston and Squantum Yacht Clubs, which for many years discharged their sewage directly into the water within a very short distance of the Wollaston bathing beach, have been connected with the public sewer during the past year. I think that it is only fair to the officers and members of these clubs to commend them for their cooperation.

Respectfully submitted,

JERE J. CURTIS,
Inspector of Plumbing.

ANNUAL REPORT OF THE QUINCY CITY HOSPITAL

For the Year ending December 31, 1938

To His Honor the Mayor, the President and Members of the City Council:

GENTLEMEN:

The Board of Managers of the Quincy City Hospital submits its report for the year 1938, including in this report, the detailed departmental reports made by the several departments of the Hospital for the year 1938.

Progress

As a result of the tremendous progress made in medicine and surgery, statistics show that several years have been added to the average span of life. Still greater progress is being made. The Quincy City Hospital has, and is contributing its share toward this progress.

To administer to the sick most efficiently, more elaborate procedures, more costly equipment, expensive medicines and sera have been used. Hospital labor costs have increased. All in all, hospital costs are up, and we may expect further increased costs if we are going to keep up our standards with the progress of the times.

Health

The Quincy City Hospital, with its progressive Staff and modern buildings and equipment, is thoroughly up-to-date. All of our citizens, whether they be poor or rich, or in moderate circumstances, receive most adequate hospital care and treatment at the Quincy City Hospital.

The progress of our community depends on the health of our citizens. The Quincy City Hospital is the "birthplace" of our future citizens. There were 928 births at our Hospital in 1938.

During 1938, the admissions were 6,298, the discharges were 6,267, and the deaths were 262.

A hospital plays a major role in maintaining and promoting health in any city. All this costs money, and consequently, an increase in our budget.

Hospital Growth

The hospital is growing and will continue to grow with the community. In 1937 there were 233 employees, and in 1938 there were 245 employed. In 1939 there will be approximately 263 employed. Incidentally, our payroll figures an approximate average wage of \$1,000. per person per year.

Statistics

The total number of patients admitted in 1938 was 6,298. Of these, 923 were births. The total expenditures for the year were \$408,708.73 and the receipts were \$221,308.45.

Collections and Appropriations

The Hospital Administration Staff is making every effort to collect Hospital bills. All this money is turned in to the general receipts of the city. The Hospital does not receive any direct credit for these receipts or payments.

We are charged with the original yearly appropriation. Therefore, if more patients are treated, naturally our yearly appropriation must be larger. However, cash receipts to the city will be correspondingly larger.

According to Hospital statistics, the net deficit to the city for the operation of our Hospital was \$187,400.28 in 1938.

Maintenance

Maintenance costs are being kept to a minimum by the adoption of accepted and proven hospital procedures. In order to cut our overhead expenses still further, and to keep thoroughly up-to-date, the Board of Managers, after careful and painstaking investigation, recommend that certain changes be made for the coming year.

New Sterilizing Equipment

The Surgical Staff has brought to the attention of the Board of Managers the immediate need of new sterilizing equipment in our Operating Room. The present equipment, in some instances, is beyond repair and dangerous to those nurses using it.

X-Ray Therapy Machine

Tremendous progress has been made in the treatment of cancer with deep X-ray therapy. At present we have such a machine but it is not shock-proof and it is of the immobile type. It is impossible to use this machine for difficult cases; consequently cancer cases have had to be transported to outside sources for treatment. The Staff recommends the purchase of a high voltage X-ray therapy machine in order that we can perform all such work right in our own Hospital.

Oil Burner

The Board of Managers has spent considerable time and investigation regarding the merits of an oil burner. We find the installation of an oil burner will cut our fuel costs approximately \$4,800. yearly and, therefore, recommend its installation.

Increased Budget

These recommendations will cause an increase in the budget for 1939, but it seems very urgent that these additions be made.

Active Staff

The Board of Managers appreciates the whole-hearted co-operation of the Staff. We appreciate the time and energy they have given to Service patients during the year. Also our congratulations are in order for their newly formed Staff Rules and Regulations.

Administrative Staff

The Board of Managers wishes to take this opportunity to commend the excellent work of our Superintendent, Dr. Joseph P. Leone, and his capable assistants, whose loyalty and conscientious service have helped so much to make the work of the Board of Managers pleasant and easier to accomplish.

Co-operative Agencies

The Board of Managers wishes to thank the various agencies that have co-operated so effectively with Hospital Aid. We also wish to express our appreciation to His Honor, the Mayor, all Members of the City Council, all other City Departments, and to the Quincy Patriot Ledger; for the splendid spirit of helpfulness and co-operation given to the Hospital throughout the year 1938.

Board of Managers

GUY W. HART, *Chairman*,

MRS. T. NEWELL LANE,

MR. J. BROOKS KEYES,

MR. FRANKLIN S. NICHOLS,

MR. JAMES F. REYNOLDS, *Secretary*.

REPORT OF THE SUPERINTENDENT

To the Board of Managers of the Quincy City Hospital:
GENTLEMEN:

Fourth Report

It is my privilege to submit to you my annual report for the year ending December 31, 1938, this being my fourth report in a little over three years as superintendent of the Quincy City Hospital.

Hospital Work Increases

A glance at the figures of the work done at the hospital in the various departments shows an increase in every instance. More patients were admitted resulting in a greater number of treatments and examinations in the Physical Therapy, Laboratory, X-ray, and other departments.

High Lights in Hospital Activities for 1938

- | | |
|----------|---|
| January | <p>Nurses' Infirmary transformed into five single rooms for nurses.</p> <p>Completion of corridor between MS-3 and Hunting-3 by W. P. A.</p> |
| February | <p>Debut of the Nurses' Alumnae News Bulletin.</p> |
| March | <p>Establishment of a central Purchasing Department at City Hall.</p> <p>Affiliation with Butler Hospital for Psychiatric Nursing and with Massachusetts Eye and Ear Infirmary for our School of Nursing.</p> <p>Resignation of Mrs. Mollie Michelman, head dietitian, and appointment of Miss Laura Wendt to that position.</p> <p>Quincy City Hospital well represented at the Massachusetts Association and New England Hospital Association meetings on March 10, 11, and 12.</p> |
| April | <p>Second Annual Hospital Ball goes over the top with \$342.00 profit for the Social Service Fund.</p> <p>Tumbler washing machine replaced in Laundry.</p> <p>Cafeteria installed in Nurses' Dining Room.</p> <p>Sound proofing material installed in Hunting-1 and corridors adjoining Operating Room.</p> <p>Installation of ice cream freezer and storage cabinet in the Kitchen.</p> |
| May | <p>MC building dedicated as The Nathaniel S. Hunting Building in memory of the late Dr. Nathaniel S. Hunting.</p> <p>National Hospital Day observed on May 12th.</p> |

June	Attendance at the Institute for Hospital Administrators by second assistant superintendent.
July	Resignation of Mrs. Hilda LaRocca, head of Social Service Department.
August	Purchase of a short wave diathermy for Physio-Therapy Department. Installation of a new obstetric table for Delivery Room. Purchase of a new potato peeler, a new frialator, and a forty gallon soup kettle for the Main Kitchen.
September	Approval of plans for new addition to the Nurses' Home. Replacement of 1935 Ford with a 1937 Ford sedan for the Social Service Department. Approval of the Quincy City Hospital by the American College of Surgeons.
October	Members of the administrative staff attend hospital sessions held by the Massachusetts Hospital Association in Boston.
November	Appointment of a Quincy City Hospital Alumna to the School of Nursing Advisory Committee.
December	New Staff By-laws, Rules and Regulations adopted. Ground broken for new addition to the Nurses' Home.

Accident Cases on the Increase

Although the city statistics available in Quincy pointed to fewer automobile accidents for this past year, the hospital records registered an increase in the number of accident cases treated. This increase is perhaps due to accidents occurring in the home. This year completes one full year wherein the Quincy City Hospital has cooperated with the Quincy School Department in dealing with accidents occurring in the public schools and playgrounds, and accidents resulting from athletic contests. The children are now immediately transported to the hospital where first aid and emergency treatments are given, and when indicated the necessary X-rays are taken. The cases are then referred to the family physician of the patients for further treatment and follow-up work. In 1938, eighty-two school children were given treatment at the hospital costing \$505.50.

New Administration Building

The new Administration Building has been in use since April 23, 1937. Little do we realize that well over 15,000 people visited this beautiful building during the year, not including the many thousands of patients admitted and discharged through its offices, nor those admitted for X-ray, laboratory, physio-therapy and other departmental services.

Accommodations for Resident Staff

Accommodations are now available on the third floor of this building for twelve house officers and one resident physician, with comfortable bed rooms, necessary toilet facilities, a kitchenette, and a game room. Unfortunately, it is customary in many hospitals to house internes in attics, basements, and other out of the way places. Only in the past several years have hospital authorities given thought to the welfare and comfort of their resident staff. The American Medical Association has helped to promote a better understanding among hospital authorities for the need of more adequate housing facilities. We are happy to announce that the Quincy City Hospital is now among those hospitals that provide their house officers with comfortable living quarters.

On the second floor are located living accommodations for the superintendent, consisting of one bed room, guest room, combination living and dining room, and kitchenette; a two room suite for the assistant superintendent; two room suite for the two admitting officers; and a one room suite for two night supervisors. The Medical Library and Conference Room is also on this floor.

The first floor accommodates all the executive offices—superintendent and assistant superintendent's offices, admitting office, bookkeeping office, information desk and telephone switchboard, office of the School of Nursing, lobby and main waiting room, private waiting room for visitors, staff cloak room.

Alumnae Shoppe

In the basement are located patients' library, office for the dietitian, social service department, ambulance drivers' quarters, rest room for nurses, rest and locker room for clerical staff, paint shops, and the Alumnae Shoppe. The latter has met a long-felt need in rendering services to patients' relatives as well as to patients, nurses and other members of our staff, by serving noon day lunches, mid-morning meals, and providing services offered by a "general store". The profits for the first year in this shoppe more than exceeded the expectations of the officers of the Alumnae Association. These funds will furnish a scholarship for Quincy nurses.

Private-Municipal Hospital

This year it is advisable to bring to your attention and to the citizens of Quincy that we have a unique situation as far as hospitals go in the country. We have a municipal hospital in the sense that the operating expenses are paid by the city, through its taxpayers, as a city department. In other cities, only the indigent and acute infectious cases are treated at their city hospitals, the expense being met by the taxpayers, and even though patients able to pay attend private hospitals, nevertheless they must still support through taxation the municipal hospital in their community. In Quincy all citizens, paying, part-free, free and welfare cases, benefit from the services rendered at its city hospital, necessitating the support of one general hospital.

Future of Hospitals

Private hospitals report that large gifts by private individuals and organizations "are not what they used to be," consequently hospital boards are experiencing difficulty in meeting expenses in the face of greater demands for hospital services. Because of these difficulties and the fact that great progress is being made along social security lines, old age, and socialized medicine, the future of private hospitals is uncertain. Whether the hospitals of the future will be supported by the Federal Government, the state or municipality, is the question.

New Addition to Nurses' Home

For many years we have needed more housing facilities for our nursing staff. At last our need will be fulfilled since federal and municipal funds have been made available to build an addition to the present Nurses' Home. We are indebted to the Board of Managers, His Honor, Mayor Thomas S. Burgin, and all the members of the City Council of 1938 for their understanding of this problem and for their cooperation in making possible this addition.

Ample Facilities in New Addition

The new addition will be built onto the further end of the Nurses' Home on Whitwell Street, in "L" fashion in the direction towards the present hospital buildings. It will house seventy-eight nurses and will include classrooms, laboratories, laundry and kitchenette in the basement; library and study hall on the first floor; nurses' infirmary on the second floor; and administrative suites on each floor. The fourth floor will house all the night nurses. Necessary changes will be made in the present home. It is hoped to dedicate the new addition on National Hospital Day, May 12th.

National Hospital Day

Again the Quincy City Hospital received honorable mention from the American Hospital Association for its successful observance of National Hospital Day in Quincy for 1938. Well over 1500 citizens of Quincy availed themselves of the opportunity to visit and inspect our hospital.

Teamwork Between Medical & Administrative Staffs

The relationship between the medical and the administrative staffs has been a most pleasant one this past year. The revision of the staff by-laws, rules and regulations has helped considerably in the management of the hospital, especially in professional matters. The Executive Committee met regularly with the superintendent and has contributed many suggestions and recommendations to the administration and Board of Managers in matters pertaining to professional care of our patients.

Dr. MacLeod Promoted

During this past year, Dr. John M. MacLeod submitted his resignation from the Active Medical Staff in accordance with the new rules and by-laws of the staff. He completes twenty-three

years of faithful service to the hospital and to the citizens of Quincy. At this time we wish to express our sincere appreciation for this splendid service.

President of Staff Completes Two Years

Dr. Cornelius Lynch was retired as president of the staff after two years of leadership. During his regime, the attendance at staff meetings improved and the Clinical Pathological Conferences were inaugurated. Dr. Lynch will continue in his good work as a member of the Executive Committee for the coming year. His help and suggestions in the management of staff problems has been deeply appreciated.

Associated Hospital Service of Mass.

The Quincy City Hospital was the forty-second hospital in Massachusetts to join the Blue Cross. It has meant a great deal to Quincy residents who have been members of the Associated Hospital Service to come to our hospital and have their hospital bills paid by this association. This plan has meant that more hospital bills were paid. For the past several months, the hospital has received over \$1,000 a month for Blue Cross cases. A similar plan concerning ward care is about to be inaugurated which will include employees within the limited income group. Many of these patients who would ordinarily be entered as ward cases, may as members of the Blue Cross be entered as private ward patients.

Mrs. LaRocca Resigns

For five years Mrs. Hilda LaRocca served as director of our Social Service Department, during which time she was of valuable service to our hospital. Mrs. LaRocca resigned in July to take up her residence in New Hampshire. Since then Miss Ruth Darr, assistant social worker, has carried on ably as acting director.

Social Service Committee

Under the able leadership of Mrs. Malcolm Sargent, the Social Service Committee has been a great help to the hospital. As a result of the Hospital Ball, sponsored by this committee, over four hundred dollars have been raised. These funds have been used by the superintendent's office to furnish special nursing care for acutely ill ward patients. Blood donors have been made available and splints have also been provided for these patients. We hope that this committee will continue with their good work so that our hospital may render still greater services to the citizens of our community.

Donations Increase

There were a larger number of donations to the hospital during 1933. The list of donors appears at the end of this report. Especially do I wish to mention the gifts of two fracture beds, an invalid walker, several over-bed tables, a portable suction pump,

and a few bedside lamps. These articles are deeply appreciated by our patients. We hope that many more friends will present similar gifts for the coming year.

Co-operation Prevalent in All Departments

The management of a hospital in itself is a difficult task, therefore it is essential not only to have the cooperation of the Medical Staff, the hospital personnel and Board of Managers but also the sympathetic understanding and cooperation of our city officials, City Council and the citizens of Quincy. To a great extent this cooperation has been made possible with the aid of our local press, the Quincy Patriot Ledger, Quincy social and welfare agencies and the Police Department. To all these organizations, we extend our sincere appreciation.

Organizations

To the many clubs, churches and civic organizations, we express our thanks for the gifts and the cooperation they have given the hospital this past year.

W. P. A.

To Mr. Patrick Duggan, who is in charge of W. P. A. and N. Y. A. in Quincy, we express our thanks for the help he has rendered us.

Superintendent Grateful

The work entailed in sending away many satisfied patients and relatives would not be possible without the understanding and willing cooperation of the members of the Board of Managers, our doctors, nurses, and all the employees of other hospital departments. It has been a joy and a pleasure to me to be associated with them and my assistants, and to whom I wish to express my sincere thanks.

Motto For 1939

May we all prosper in good health so that we may render more and better service to all whom we serve at the hospital for the coming year.

Needs of the Hospital

1. Nurses' dining room in service building.
2. Enclosure of porches off the wards and the Children's Ward.
3. Suction therapy machine—cost \$600.
4. A resuscitator—cost \$450.
5. Establishment of a special nurses' fund for worthy patients.
6. Over-bed tables—cost \$27 each.
7. Bedside lamps—cost \$14 each.
8. Installation of modern sterilizing equipment.
9. Installation of a solution room in Pharmacy.

Respectfully submitted,

JOSEPH P. LEONE, M.D.

Superintendent.

REPORT OF THE SCHOOL OF NURSING AND NURSING SERVICE

To the Board of Managers of the Quincy City Hospital:

GENTLEMEN:

A School of Nursing has functioned in this hospital for a period of forty-nine years. The new year ahead will mark the beginning of a half century of service and growth. A comparison of the objectives of the school in its beginning with those of the present day would be of interest. Unfortunately there is little historical data available for purposes of comparison.

Changing Objectives

The objectives of a school are necessarily governed by the type of service its graduates are expected to render. In early years, private-duty nursing in the home absorbed practically all nurses who graduated from the so-called training school. Today we have two other important branches of nursing for which students must be given an adequate basic preparation. There is Public Health Nursing with emphasis upon health teaching, as well as the numerous institutional positions which also require capable teachers. Therefore, as the trend in nursing has changed, so it follows that objectives for schools of nursing have changed.

Fifty Years Ago and Now

It would be safe to assume that in 1889 only mature young women, between 22 and 35 years of age, were admitted to the school for the period of "training". This is in contrast to the young women entering our school today who, in most instances, are recent high school graduates and seldom more than 18 years of age. All too frequently they are unaccustomed to responsibilities and planning and inexperienced in the simple duties of homemaking.

In earlier years the more mature student would have demonstrated a greater degree of poise than does the average student 18 years of age. Pleasing personality and sterling character are still essential for success and leadership in nursing.

It is, therefore, evident that the faculty today must be able to recognize the needs of these younger students and be qualified to meet their needs through effective teaching and individual guidance. The head nurse and instructor, as the school teacher, has come to realize that no two students fall into the same pattern.

History indicates that the development of a high degree of mechanical skill was considered essential in nursing, and it is gratifying to note that we also place great emphasis upon the development of skill in nursing techniques. To that end we have been gradually outlining the nursing procedures so that they will be available in each ward for convenient reference.

In early years it was likely that the student nurses were responsible for all the nursing care given in the hospital. A simple program of studies was in vogue at that time, the students had a longer working day, the type of treatments for the patient were less numerous and complicated, and there were few or no students

away for affiliation. Under those conditions it is reasonable to expect that a group of more mature students could carry the nursing service of the hospital.

Nursing Keeps Step with Medicine

Today, research in medical science has brought an ever changing and more complicated type of treatment for the patient. The quantity of nursing care necessary for every department has increased and more hours of skilled nursing service must be provided for the acutely ill patient.

It follows that, if careful nursing is to be done, the planned program of studies must keep step with the new developments in medical science. Students have to attend classes or clinics at hours which are inconvenient for the ward service. The corps of graduate staff nurses is employed to supplement the student service and to cover the class periods.

Optimum Standards for Hospital Nursing Service

In staffing our wards, we endeavor to follow the recommendations of the average hourly allowance of nursing care per patient for twenty-four hours. These recommendations are based on scientific time studies and represent optimum standards for hospital nursing service. We have found that whenever we fall below the average allowance of three to three-and-one-half hours of nursing care for each adult ward patient in twenty-four hours that we do not give satisfactory service to either the patient or the doctor. The allowance for adult private patients is from four to four-and-one-half hours in twenty-four hours. These allowances cannot be arbitrary and exceptions must be made in any case where the acutely ill patient does not have his own private nurse.

A sudden and widely fluctuating patient census presents a problem in providing a balanced nursing service at all times. The past winter, a high incidence of illness among the graduate staff and students, together with the heavy vacation period in the summer, tended to throw the nursing service off balance and increase costs. These, as well as other exigencies, have to be met as they arise.

On the last day of the year, there were forty enrolled students in the school, fourteen of whom from the senior and intermediate classes were away at affiliation. There were ten preliminary students who gave approximately two hours of service to the ward each day.

Broader Clinical Experience

In April, we began a three months' affiliation in Psychiatric Nursing with the Butler Hospital in Providence, Rhode Island. We hope in the near future that we may be able to increase the appointments from four students each year to eight. In May, we sent the first senior student to the Massachusetts Eye and Ear Infirmary for a two months' affiliation in the nursing care of patients with diseases of the eye, ear, nose and throat. Heretofore, our students have had no planned clinical experience in Psychiatric Nursing and but limited experience in eye, ear, nose and throat

nursing. We are pleased to report the progress we have been able to make in broadening the clinical experience offered to senior students, believing that these young women will be better fitted for their graduate work.

Resignations and Appointments

There have been several changes among the faculty during the year. Miss Marion McManus, instructor of science, resigned in July to be married. Miss McManus made a valuable contribution to the school during the three years she was with us. In September, Miss Rita Kelleher, a graduate from Teachers' College, Columbia University, was appointed to the position of science instructor. Miss Kelleher comes to us well qualified through experience and education for this important position.

Miss Ann Holmes, after twelve years of efficient service as Head Nurse in Ward M&S-1, resigned in September to engage in private duty in Florida. Miss Martha DeCoster, a graduate of the school, was transferred from the position of Assistant Head Nurse, Private Ward, to Head Nurse in M&S-1.

Graduation

Graduation exercises were held on June 15, 1938. In the unavoidable absence of the speaker, Reverend Victor Sawyer, we were fortunate to have with us the Reverend Stuart C. Haskins. The enduring satisfactions which come to the nurse who is privileged to give skilled service to the sick was a fitting theme for the occasion. Dr. Charles S. Adams, a member of the Advisory Committee of the School, presented diplomas to the eleven members of the graduating class. The school pins were presented by Mrs. Carle Hayward. A gift from the graduating class to the school was a silver screen to be used for showing films for classroom teaching. Another gift this year has been a new microscope. This was greatly needed to supplement the inadequate number on hand and was, therefore, doubly appreciated.

New Member on Advisory Committee

The appointment of an Alumna to the Advisory Committee of the School of Nursing has set a new precedent, which should be conducive to a growing interest and a closer affiliation between the school and its graduates. We were pleased to welcome Miss Minnie Harron, the Alumnae Representative, at the November meeting.

The Alumnae continues to show its kindly interest in the school by giving a tea each month for the graduate personnel and students.

It seems fitting each year to make note of the co-operative spirit of the medical staff, and many of the internes, who give generously of their time to assist with the teaching program and with the care of sick nurses.

Progress within a department depends upon group loyalty and teamwork, and credit is due my immediate staff and co-workers who have in large measure made possible the accomplishments of the year.

The year ends with the following census in the nursing department on December 31, 1938:

Enrolled Students	40
Preliminary Students	10
Enrolled Students at Affiliation.....	14
Total Enrolled Students on Duty	26

Graduate Staff

Superintendent of Nurses	1
Assistant Superintendent of Nurses.....	1
Ward Instructor and Supervisors	3
Anesthetist	1
Night Supervisor and Assistant.....	2
Head Nurses and Assistants (Day).....	13
Head Nurse (Night)	1
Graduate Staff Duty Nurses	76

Respectfully submitted,

HELEN O. POTTER, R.N.

Superintendent of Nurses.

REPORT OF THE SOCIAL SERVICE DEPARTMENT

To the Board of Managers of the Quincy City Hospital:

GENTLEMEN:

The Social Service Department regrets to announce the resignation, on July 20, 1938, of Mrs. Hilda M. LaRocca, director of the department in the six years since its inception. Mrs. LaRocca worked tirelessly to organize and increase the efficiency and scope of the department, and her guiding hand will be greatly missed.

Miss Ruth Darr, assistant social worker, has been acting as director of the department, and Miss Muriel Brady, a recent graduate of the Simmons School of Social Work is assisting her.

We are deeply grateful for the aid given us by Mrs. Richmond Gordon, who has volunteered her services two days a week, and has faithfully carried out the assignments given her, and to Mrs. Parker Starratt who has also given generously of her time in doing occupational therapy work in the home with some of our out-patients and discharged house patients.

Increase in Case Load

In common with the other departments in the hospital, we find that the increase in the average census has caused a corresponding increase in our work. 2,086 service cases were referred to us for investigation and study, as well as 160 accident cases. 1,456 home visits were made by members of the staff, including Mrs. Gordon; 52 patients were placed in convalescent homes; 82 patients were transferred to other hospitals for special care; 22 patients were furnished with orthopedic appliances. During the year a worker has driven an average of 5 to 9 patients, two and three times weekly, to the hospital for physiotherapy treatments. There have been 339 outside settled cases referred to the Department of Public Welfare for reimbursement.

Prenatal Clinic

172 new patients were admitted by the Social Service Department to the Prenatal Clinic during 1938.

Starting in November, 1938, Miss Helen Perry, nutrition consultant, sponsored by the Junior Welfare League of Quincy, has been present bi-monthly at clinic, exhibiting foods and their relation to health, and answering the patients' questions concerning their diets.

Cooperation of Other Agencies

The department wishes to take this occasion to thank publicly those agencies which have been most helpful and cooperative throughout the year.

Outstanding among them is the Department of Public Welfare, without whose help we would be greatly handicapped. Our grateful thanks are extended at this time to Commissioner Anthony Venna and his able staff.

Miss Effie Waddell and other members of the Quincy Family Welfare Society have always cooperated to the fullest with this department, and we wish to thank them again for the services rendered during 1938.

There were almost 50 cases referred to the Visiting Nurse Association for follow-up care after discharge from the hospital, as well as all our Prenatal Clinic patients, who are visited regularly by the nurses. We repeat our thanks to Mrs. Grace Lee and her efficient assistants for their intensive follow-up and their clear-cut reports.

The Kiwanis Club has paid for 51 tonsilectomies this year, and also contributed towards the Children's Christmas party.

The members of the staff belong to and attend meetings of the Quincy Council of Social Agencies, as well as the Massachusetts Conference of Social Work. We were present at the state-wide conference in Boston in November, and the District Conference held at the hospital in October.

Rounds

For the past six months, we have been making rounds with the Medical Service, and find we have a better insight into the problems of our patients, thus enabling us to help them more.

The doctors have been most patient and thoughtful, taking care to explain the various phases of each individual's illness. May we now take the opportunity to thank the members of the Staff, and the house officers as well, for their splendid attitude of cooperation.

Social Service Committee

The Social Service Committee for 1938 included:

Mrs. Malcolm Sargent, *Chairman*,
Miss Carolyn Walker
Miss Helen Gavin
Miss Marjorie Welch
Mrs. Everett Robbie
Mrs. Earle Baker
Mrs. William Martin
Mrs. Alfred Brown
Mr. Guy Hart
Dr. Joseph P. Leone
Mrs. Hilda LaRocca, *Secretary*.

When Mrs. LaRocca resigned, Miss Darr automatically became secretary of the committee. Mrs. Martin also resigned in the summer of 1938, to the deep regret of the committee, and Mrs. F. Ramon Burke was elected to fill her place. Other new members, who were elected in November, 1938, are Mrs. Harry Dupee, Jr., Miss Gertrude Callahan, and Mrs. Paul Karcher.

On April 29, 1938, the second Annual Charity Ball, sponsored by the Committee, was held at the Neighborhood Club. Mr. Robert Faxon was chairman of the Ball Committee, and we are indeed happy to report that it was a financial and social success. The

Social Service Fund was greatly swelled, enabling us to increase our aid to needy patients in the form of nursing care and blood transfusions, especially.

The committee meets regularly and is already laying plans for the next dance.

The department is the proud possessor of a 1937 Ford, four-door sedan, purchased for us in September. For this, as well as for their cooperation and understanding throughout the year, the members of the Social Service Department wish to extend to the Mayor, the Board of Managers, and the Superintendent, Dr. Joseph P. Leone, our sincere appreciation.

Respectfully submitted,

RUTH DARR,
Acting Director.

REPORT OF THE PRESIDENT OF THE STAFF

To the Board of Managers of the Quincy City Hospital:

GENTLEMEN:

The medical program of the Staff, initiated in 1937, was continued during 1938 and was well patronized. The plan consists of having two meetings a month instead of one, and for convenience one was a day meeting and the other was held at 8:30 P. M. A most varied program embracing medical, surgical and kindred subjects was presented by well trained specialists and much knowledge accrued by those attending meetings.

To add to our enjoyment, splendid lunches followed so that the sociability among the members was enhanced. The latter was climaxed by a spirited golf contest at the South Shore Country Club during June. From all reports of the wives present, the skill shown at the meeting proved that as golfers the men were really very good doctors.

I believe this set-up should be continued. On our staff, young men predominate. They are well trained, ambitious and deserve worth-while programs. These should be well presented by high-class specialists. In this way incentive to members to improve their general medical status will result. Thus both the hospital and the community will be better served.

The present staff harmony and the cordial and cooperative interrelations of the staff, administration and Board of Managers should be fostered and jealously guarded. We should strive to preserve this all-time peak for it emphasizes service for its own sake. As no worthier goal can exist, let us make it our ambition to retain it.

During the year the Staff accepted with regrets the resignations from active service duties of Dr. John M. MacLeod and Dr. Elmon R. Johnson. Both gave long and valued service and their loss is partially made up by their continued services as staff consultants.

The recent official visit of the American College of Surgeons inspector elicited much praise for the improvement in the staff functions and general hospital management. Our recent adoption of new rules and by-laws was especially commended.

Naturally, a brief report cannot evaluate all the detail progress of the past year. However, the Staff submits this summary and hopes for similar progress in the coming year.

Respectfully submitted,

CORNELIUS J. LYNCH, M.D.,
Staff President.

REPORT OF THE INTERNES COMMITTEE

To the President of the Staff of the Quincy City Hospital:

DEAR SIR:

During the year 1938, the Internes Committee met on four different occasions.

Two of these meetings were devoted to the subject of "Instruction for House Officers", following which the suggestions made by the committee have been carried out through the aid of our Resident Physician and superintendent's office.

Candidates for internship and Resident Physician were elected and recommended to the Board of Managers for appointment.

Upon a motion duly made and passed at the November meeting of the Staff, each member of the Active and Courtesy staffs was requested to contribute two dollars yearly to the Internes' Fund. To the Internes Committee was relegated the authority to make such collections for the purpose of presenting each graduate interne with a gift upon the completion of his internship at this hospital.

On June 30, 1938, Dr. Michael M. Ross completed a one year internship and Dr. George W. Davis completed one year as Resident Physician. Dr. Henry Rosen served as Resident from July 1 to December 31, 1938.

On December 31, 1938, the following house officers completed an eighteen months' rotating internship: Dr. Vincent D'Elia, Dr. Sylvio B. Remy, and Dr. Appleton Woodward.

Respectfully submitted,

WILLIAM R. HURLEY, M.D.,
Chairman,
CHARLES S. ADAMS, M.D.
RICHARD M. ASH, M.D.
WILLIAM J. McCAUSLAND, M.D.
F. RAMON BURKE, M.D.
JOSEPH P. LEONE, M.D., *Secretary.*

REPORT OF THE RECORD COMMITTEE

To the President of the Staff of the Quincy City Hospital:

DEAR SIR:

The Record Committee has had several meetings with the superintendent of the hospital and the superintendent of nurses in an attempt to improve the material in bedside notes and to have the ward records kept in a systematic form. This has met with universal approval.

The records as a whole are somewhat improved but presumably there will always be opportunity for further improvement.

The Standard Classified Nomenclature of Disease, which is on each ward, should be used by each man in signing the diagnoses for his patients in conformity with the suggestions from the American College of Surgeons.

The committee believes that the Record Committee in future years will find that many helpful suggestions with reference to the quality of records come from the head nurses on the various wards. These people are obliged to answer many questions which arise with reference to patients that would never be brought to the attention of the doctor, otherwise.

Respectfully submitted,

FRED A. BARTLETT, M.D.,
Chairman,

FRED N. MANLEY, M.D.
HENRY H. A. BLYTH, M.D.

REPORT OF THE STAFF PROGRAM COMMITTEE

To the President of the Staff of the Quincy City Hospital:

DEAR SIR:

In general, the staff meetings were better attended during the year 1938 than at any previous year. A large portion of the meetings were addressed by prominent members of the profession out of Quincy.

The Clinical-Pathological meetings were carried on as in the previous year, the cases presented and the general program having been somewhat extended, a broader and more complete discussion followed their presentation.

Respectfully submitted,

J. EDWARD KNOWLTON, M.D.,
Chairman,

ROBERT O. GILMORE, M.D.
WILLIAM L. KRIEGER, M.D.

REPORT OF THE AURAL SERVICE

To the President of the Staff of the Quincy City Hospital:

DEAR SIR:

In the year 1938 there were 426 aural cases admitted, 379 of which were tonsil cases. Six mastoid operations were performed, one antrum operation, one resection of nasal septum, one incision and drainage of peritonsillar abscess, two operations for nasal polyps, one bronchoscopy, and two operations suturing conjunctival flaps and one suturing tonsillar fossae. Including private cases there were 1099 aural cases discharged, two of which were deaths. There were 59 consultations on aural cases.

In the year, as in previous years, the members of the Aural Service enjoyed excellent cooperation, and I feel that their work was very conscientious.

At this time I would like to announce the appointment for 1939 of Dr. Walter McClintock to the Aural Service, who will fill the vacancy occurred by Dr. Elmon Johnson's resignation.

Respectfully submitted,

WILLIAM J. HARKINS, M.D.,
Chief of Service.

REPORT OF THE OBSTETRIC SERVICE

To the President of the Staff of the Quincy City Hospital:

DEAR SIR:

The following is a report of the Obstetrical Service for the year 1938:

Number of Service Deliveries

Caesarian section	3
Normal deliveries	154
High forceps	1
Mid forceps	2
Low forceps	13
Internal Podalic versions	5
Breech extractions	3
Total number of deliveries	181
Twins, 2 sets (1 breech, 1 normal)	2
Total number of babies born	183

Respectfully submitted,

RICHARD M. ASH, M.D.,
Chief of Service.

REPORT OF THE PEDIATRIC SERVICE

To the President of the Staff of the Quincy City Hospital:

DEAR SIR:

In reviewing the work of the past year it becomes increasingly apparent that the City of Quincy is sufficiently supplied with beds for sick babies and children. The census of the Quincy School Department shows that the registration has begun to decrease as a result of a diminishing birth rate. Therefore, it seems reasonable to assume that the present Children's Ward will be adequate for some time to come. Add to this the fact that the morbidity rate in children has, in common with the rest of the country, dropped to an even lower point than that of 1937.

The Pediatric Service would still like to see a Convalescent Home for Children attached to this hospital. Some children are sent to the Wellesley Convalescent Home.

The statistics for the Pediatric Service are as follows:

Discharges	177
Deaths	22
Autopsies	13
Consultations	80

Respectfully submitted,

EDMUND B. FITZ GERALD, M.D.,
Chief of Service.

REPORT OF X-RAY DEPARTMENT

To the Board of Managers of the Quincy City Hospital:

GENTLEMEN:

I herewith submit a report of the work done in the X-ray Department during the year 1938.

Approximately 10% Increase For Year

A comparison of the number of patients radiographed during 1938 with the number radiographed in 1937 shows an increase of approximately 10%. The bulk of the X-ray examinations were done for the members of the hospital staff, as very few cases are referred to the laboratory by outside physicians. The fluoroscope was used more this year than at any previous time, in localizing foreign bodies and in the reduction of fractures.

One Volunteer Worker

Mr. John Beauregard of the Yale Medical School, returned for further instruction in X-ray diagnosis and therapy, and spent July and August in the laboratory. By his enthusiastic and painstaking application, he not only increased his own knowledge but

lightened the work of the regular technicians, Rebecca Philbrick and Constance Larkin. The technical work done by these young women has shown continued improvement. They made every effort to give the best possible service to both doctors and patients, and one or the other is available for emergency work during the twenty-four hour period.

Clerical Work

Evelyn Hartford, who for two years has done most of the clerical work, resigned in July, and her place was taken by Phyllis Acebo, who has shown praiseworthy enthusiasm for her work and is already able to take medical dictation with commendable accuracy.

New Equipment

The only new equipment purchased during the year was a hand fluoroscope to be used in conjunction with the shockproof portable outfit, and used primarily for the fluoroscopic work in other parts of the hospital other than the X-ray laboratory.

New Equipment Recommended

I recommend the purchase of a high voltage X-ray therapy machine, having the flexibility to enable us to approach a deep seated tumor from any useful angle. The specifications for this machine have already been given to Dr. Joseph Leone and members of the staff committee. This machine, if purchased, will provide an up-to-date and much needed therapy unit.

The following is a statistical report of the work done in the laboratory from January 1, 1938 to December 31, 1938:

Examinations

Gastro-intestinal tract	198
Barium enema	54
Gall bladder	143
Kidneys, ureters and bladder	210
Pyelogram	91
Chest	833
Spine	385
Teeth	97
Ankle	200
Knee	111
Leg	324
Ribs	91
Shoulder	345
Pregnancy	48
Wrist	166
Elbow	133
Arm	190
Feet	101
Hands	195
Skull	239
Nose	29

Sinus	46
Jaw	43
Mastoid	47
Total Examinations	4,319

Treatments

Including both high and low voltage	112
---	-----

We wish to express to the Administration and the Staff our appreciation for their continued cooperation.

Respectfully submitted,

CHARLES WHELAN, M.D.
Radiologist.

REPORT OF LABORATORY DEPARTMENT

To the Board of Managers of the Quincy City Hospital:

GENTLEMEN:

The following is the report of the Clinical and Pathological Laboratory for the year 1938.

23,000 tests performed during the year represents an increase of 3,000 tests over the previous year and includes a very wide range of examinations.

The Laboratory, serving as a Pneumococcus Typing Station for Quincy and the South Shore district, has shown a still further increase in the service. 155 sputum specimens were typed during the year.

There has been a steady increase in the number of specimens examined from outside sources justifying the Laboratory's place in the community as an important diagnostic laboratory center.

We are pleased to state that the post-mortem percentage is the highest since the establishment of the Laboratory ten years ago. This reflects the scientific interest of the Staff and the splendid cooperation of the people of Quincy in granting permission for these examinations.

The technical staff, Miss Frances K. Morris, Miss Elinor D. Rich and Miss Ruth H. Kuhns have continued to work as a cohesive team of trained technical experts and their work is appreciated by the department head and the hospital staff.

The following is a detailed report of the examinations made by the Clinical and Pathological Laboratory of the Quincy City Hospital for the year 1938:

State Laboratory Reports

Wassermann, Blood	23
Wassermann, Spinal Fluid	43

Respectfully submitted,

FRANCIS P. MCCARTHY, M.D.,
Pathologist.

REPORT OF PHYSICAL THERAPY DEPARTMENT

To the Board of Managers of the Quincy City Hospital:

GENTLEMEN:

During the year 1938 the Physical Therapy Department functioned smoothly and a great deal of work was done. The addition to existing equipment of a short wave diathermy machine was a great help in taking care of an increasing amount of work. This addition was a much needed step in the necessary equipment to meet the changes that have taken place in the development of modern physical therapy apparatus. There were no changes in personnel during the year.

The following schedule indicates in terms of figures what has been done for our patients during 1938.

Examinations and Treatments in 1938

Consultations	1
Short wave diathermy	73
Examinations	119
Auto-condensation	54
Diathermy	1,561
Electric saturation	163
Fulguration	14
Galvanism	45
Hyperprexia	4
Sinusoidal electrotherapy	369
Static electrotherapy	6
Vibration	19
Infra-red	239
Radiant light	2,748
Ultra violet, air cooled	1,464
Ultra violet, water cooled	518
Cabinet bath	8
Colonic irrigation	31
Scotch douche	7
Sitz bath	3
Shower	8

Whirlpool bath	375
Exercises	89
Manipulation	296
Massage	296
<hr/>	
Total number of treatments	9,563
Patient visits	6,334
Individual patients	432

Respectfully submitted,

CLAUDE L. PAYZANT, M.D.,
Director, Physical Therapy Department.

REPORT OF MAINTENANCE DEPARTMENT

To the Board of Managers of the Quincy City Hospital:

GENTLEMEN:

The following is an itemized report of the work accomplished by the Maintenance Department for the year 1938:

1,409 requisitions for repairs from various departments in the hospital.

Changing and reconnecting kitchen equipment and connecting new equipment.

Changing Dietitian's Office to storeroom and the latter to an ice-cream freezing room.

Installing and connecting new washing machine.

Installing new water valve and altering piping to small washing machine.

Installing and connecting new booster pump for water service in boiler room.

Retubing one-thousand gallon water heating tank in boiler room.

Constructing pole and installing parking lights in front of Faxon Home.

Installing annunciator at new nurses' station on MS-3 with necessary alterations in piping and wiring.

Installing new stop valves before reducing valves and alterations in piping.

Construction of two peri carts for Hunting-2.

Repair of old section of main steam line to Faxon Home.

Making and installing moisture producing attachment for Fever Therapy Cabinet.

Installing new window in Linen Room.

Sound proofing corridor to Nurses' Dining Room.

Making two incubators for Children's Ward.

Suction line carried to the Caesarian Delivery Room.

New pipe and fittings installed on water column to #1, 2, 3 boilers.

New pipe fittings and valve installed in water feed lines to #1, 2, 3 boilers.

One painter continually on buildings.

One man continually painting equipment.

In July, 1938, Mr. Oscar Swanson was retired on pension. Mr. Swanson was employed in the hospital for seventeen years as houseman, maintenance man and relief-fireman and was most cooperative and faithful in carrying out his responsibilities.

Respectfully submitted,

CARL ERIKSSON,
Chief Engineer.

REPORT OF THE DIETARY DEPARTMENT

To the Board of Managers of the Quincy City Hospital:

GENTLEMEN:

There have been a few changes in the Dietary Department during the year 1938.

Mrs. Mollie Michelman, head dietitian, resigned and was replaced by Miss Laura Wendt on April 1, 1938.

Two new eight-gallon coffee urns replaced the two six-gallon urns in the kitchen. A sixty gallon steam-jacketed kettle and a hundred pound Frialator were added to the kitchen equipment.

The steam table in the serving room was changed to make cafeteria service possible for nurses, office staff and house officers. There was cafeteria service for the three meals until December 1, 1938, after which time the evening meal was served.

For eight weeks during the summer months an opportunity was given to Miss Marjorie Cantoni, a student at Simmons College, to work in our department to observe the dietary department of a general hospital.

The total number of special diets for the year was 6,126, making a daily average of 17.

Respectfully submitted,

LAURA WENDT,
Head Dietitian.

REPORT OF HOUSEKEEPING DEPARTMENT

To the Board of Managers of the Quincy City Hospital:

GENTLEMEN:

During the year 1938, two new machines were added to the laundry equipment, namely, a starch boiler and a washing machine, both of which have increased the efficiency of the department. The starch boiler is a definite improvement as it is more adapted to this laundry, and the washing machine has a greater capacity and is a time saver.

A great improvement has been made in the patient's clothes room with the addition of a large encasement window which makes it possible to work by sunlight, without the use of artificial overhead lights. Two similar windows are soon to be added to the linen room.

The employees of the Housekeeping Department attended and greatly enjoyed the annual Christmas party for hospital employees.

Respectfully submitted,

CATHERINE LAUDER,
Housekeeper.

REPORT OF THE HOSPITAL LIBRARY

To the Board of Managers of the Quincy City Hospital:

GENTLEMEN:

The Thomas Crane Public Library has just completed its thirteenth year giving service to the hospital patients and staff.

For five afternoons a week, the library is open from 1-2:30 P.M., 5-6 P.M., for the hospital staff to select their books. The librarian visits the patients from 2:30-5 P.M. Three visitations to each ward are made during the week, affording ample time for the librarian to help each patient select interesting reading material.

There are 379 books in the juvenile collection and 1,115 books in the adult collection, making a total of 1,494 books. Ten magazines are subscribed to annually and other copies are donated by friends.

Books from the Main Library continually augment the permanent collection.

The total circulation figures for this year show a gain of 1,025 over 1937. The number of books circulated during the year 1938 is as follows:

Fiction

Adult	8,074
Juvenile	2,272

Non-fiction	
Adult	4,899
Juvenile	480
Total	15,725

Respectfully submitted,

RUTH MACDOUGALL,
Hospital Librarian.

REPORT OF WOLLASTON HOSPITAL AID ASSOCIATION

To the Board of Managers of the Quincy City Hospital:

GENTLEMEN:

The Wollaston Hospital Aid Association will close its 1938-1939 season on the first Thursday of June, 1939.

Meetings have been held the first Thursday of each month with an average attendance of eleven members. At two o'clock a short business meeting is held and the time from 10 A. M. to 4 P. M. has been spent in making supplies for the hospital.

Respectfully submitted,

MRS. R. EDWARD MARTEL,
President.

QUINCY CITY HOSPITAL GENERAL INFORMATION

The Quincy City Hospital is a city institution supported by the city of Quincy and the receipts from patients.

Private patients, as well as part-pay and free patients, are admitted to the hospital upon recommendation of any physician.

Only those unable to pay a doctor's fee will be admitted to the ward service.

Application for admission should be made at the Admitting Office on Whitwell Street between the hours of 9 A. M. and 4 P. M. Maternity cases are admitted at any time. Accident or emergency cases are received in the Accident Room at any time.

Patients suffering from mental or chronic diseases are not admitted to the hospital.

RATES

1. General

Service—\$3.00

Ward Private—\$3.50

Semi-private—\$4.00

Private rooms—\$5.00, \$6.00, \$7.00 a day.

2. Maternity

Service—\$24.50 per week.

Ward Private—\$4.00 a day.

Semi-private—\$5.00 a day.

Private rooms—\$6.00, \$7.00 a day.

These charges include board, general nursing care, and ordinary medicines. An operating room fee of \$5.00 for minors and \$10.00 for majors is made. A laboratory fee of \$5.00 is made on all specimens obtained from operations in the operating room. This examination is required by the American College of Surgeons. Extra charges will be made for X-ray examinations, special medicines, Physio-therapy treatments, special laboratory examinations, apparatus, board of special nurses, oxygen, professional blood donors, and ambulance service.

Private patients are required to pay one week's board and the operating room fee or delivery room fee on admission. Patients coming from outside of the city are expected to have a private physician, a member of the Quincy City Hospital Staff. Patients must arrange with their private physicians regarding their fees. The physicians on service receive no remuneration for their services to the ward patients.

The hospital reserves the right to move to the open ward a patient occupying a private or semi-private room who fails to pay his bill for hospital service within seventy-two hours of presentation.

VISITING HOURS

1. Adults

Service: 2-3 P.M., daily, 2 visitors only.

7-7:30 P.M., daily, 1 visitor.

Semi-private: 2-3:30 P.M., daily, 2 visitors.

7-8 P.M., daily, 2 visitors.

Private Rooms: 11 A.M.—8 P.M., daily, 2 visitors at a time.

2. Children

2-3 P.M., Wednesdays and Sundays, 2 visitors on each of these days.

Patients who are dangerously ill may have two visitors at any time. Children under 14 years should not be brought to visit patients.

Visitors may bring only fruit, flowers, and reading matter to adults. These gifts must be left at the Information Desk or with the nurse on the ward, and must not be given to the patients. Only toys may be brought to the children's ward, and must be given to the nurse in charge.

At 3 P.M., on inquiry at the Information Desk, the relatives of patients may talk with the physician in charge.

Patients may be visited by clergymen of their selection, and, so far as possible, the hospital will grant the performance of any desired religious rites.

PRIVATE NURSE

Arrangements for special nurses should be made through the Admitting Office upon consultation and advice of the attending physician. The salary of the special nurse is paid direct to her by the patient or relatives. The hospital makes a charge of \$.50 a day for her board. Quincy City Hospital graduates, when available, are given preference.

Miscellaneous Information

TELEPHONES

There are telephone connections in all private rooms. Instruments may be installed with the permission of the attending physician. There is an extra charge for this service.

RADIOS

In order to promote quietness for the patients in the hospital, only ear phones and magic ears are allowed for use in the hospital. These can be obtained at a nominal fee from the Admitting Office.

WHAT TO BRING

Private patients entering the hospital should bring with them nightgowns, bathrobe, slippers, comb, tooth brush, and tooth paste. Maternity patients are requested not to bring clothing for the baby to wear in the hospital.

VALUABLES

Money and other valuables must be deposited with the Admitting Office upon admission; otherwise no responsibility will be assumed by the hospital.

LIBRARY

The Thomas Crane Public Library maintains a branch at the Quincy City Hospital. Books are obtainable from the librarian, who visits each floor between 2:30 and 5 P. M. daily except Saturday.

SUGGESTIONS

It is requested that any suggestions for improvements of service be made at the Superintendent's Office before the patient leaves the hospital.

WITH SERVICE FOR ALL

The Quincy City Hospital is a health Institution; its duty is to care for the sick in our community, in order that they may live and enjoy their life, their work and their home.

Can anyone imagine our community without a hospital? We defy the mind to conceive such a nightmare.

We ask your support and in return we give you our solemn assurance that you may be confident that every dollar given us will be carefully expended in order that life and happiness may be prolonged.

REPORT OF THE PUBLIC WELFARE DEPARTMENT

February 28, 1939.

HON. THOMAS S. BURGIN, *Mayor of the City of Quincy*:

The Department of Public Welfare respectfully submits the following report for the year ending December 31, 1938:

At the beginning of 1938 it appeared that our case load on Outside Aid would be considerably greater than for the year 1937, due to business conditions and a lowered quota in W.P.A. employment. This increase materialized and continued until August, when the W.P.A. increased the quota for this city, and permitted us to place practically every employable man at work. The result of this was a reduction in our case load below that of the previous year, and this continued during the last few months of the year. In spite of the increased case load for eight months of the year, we have been able, through constant re-investigation, to keep the total cost of our Outside Aid, of which aid to aliens still constitutes a great part, at a comparatively low figure. The outlook for 1939 appears favorable, providing general conditions continue to improve, and there is no drastic curtailment of the federal works program.

There was a natural increase in Old Age Assistance of 267 cases, caused, in part, by a change in the law regarding the amount of equity in real estate, and the increase in life insurance allowable to applicants; but mostly due to continued adverse business conditions which affected the ability of the children to assist their parents, and the employability of the aged applicants, themselves. There is bound to be a continued upward trend in Old Age Assistance during 1939, particularly if the minimum age requirement should be lowered.

Aid to Dependent Children was set up as a separate division of the Welfare Department in 1938. There has been a marked increase in the number of applications received during the latter part of the year, because of the following reasons: the State adopted the same definition of "relatives" as the Social Security Board, which increased the number of "blood relations" eligible to apply as "parents" from 11 to 28; also, in April of 1938, the Temporary Need clause was changed from a requirement of at least one year's need of aid to six months. It has been indicated by the Federal Government that the W.P.A. workers who are eligible for Aid to Dependent Children will be discharged, and forced to apply for this form of aid. Under these circumstances, it is certain that there will be a large increase in the number of new cases in the coming year.

We have continued to improve general living conditions at the City Infirmary during the year, in an endeavor to make living a little easier for the unfortunates who are obliged to go there. The number of inmates increased to almost the Infirmary's capacity during the last few months of the year.

We wish to extend our sincere thanks and appreciation to the many charitable organizations of the city for their splendid co-operation during the past year.

For details of expenditures, reference is made to report of the Auditor of Accounts.

Respectfully submitted,

ANTHONY J. VENNA,
Commissioner of Public Welfare.

REPORT OF CITY PHYSICIAN

March 3, 1939.

HIS HONOR, *Mayor Thomas S. Burgin*
Quincy, Massachusetts

DEAR SIR:

I wish to submit the annual report for the year 1938 as follows:

Number of home visits	1313
Number of patients treated at clinic	1446
Number of patients referred to hospital for operation, X-ray, treatments, etc.	193
Number of patients referred to Dentists	21
Number of patients referred to Eye, Ear, Nose, Throat Specialist	78
Number of minor operations and special treatments	90
Number of Vaccinations	75
Number of Police Calls	15

During the past year we experienced an increase in the number both of house calls and of patients treated at the clinic. This is largely attributed to the increase in the number of patients on Old Age Assistance.

At the present time our drug department has been transferred to the Welfare Building on School Street, and in the near future the clinic itself will be transferred there, a move which will undoubtedly benefit those in need of treatment.

To the W. P. A. nurses and to Mrs. Grace M. Lee of the Quincy Visiting Nurses I wish to extend my thanks for their invaluable assistance.

Respectfully yours,

ASTRO A. DI BONA,
City Physician.

REPORT OF POLICE DEPARTMENT

January 1, 1939,

HON. THOMAS S. BURGIN, *Mayor of the City of Quincy:*

DEAR SIR:

Report of the Bureau of Photography

Prisoners photoed and printed	140
Accidents and street scenes	415
House and store breaks	81
Deaths	7
Miscellaneous photos	18

CONCLUSION

As the Inspectors' branch of the Department now has a Captain in charge of all investigations received by me, I believe the best interests to bring about more efficiency in numerous cases involving statements taken from defendants, also witnesses in numerous important cases, require the services of a male stenographer, preferably a member of the Department.

To persons not familiar with Police Department duties, there is little chance for them to pass fair judgment as to the justification of our claim for additional officers. I can only urge the necessity of the men, believing that the last half detail should be of the same numerical strength as the first.

I also recommend that the six motorcycles, now four and five years old respectively, be turned in and five new ones bought to replace the old cycles now in service. I believe that the life of any automobile in the Police Department used continually as radio car patrols is one year, and recommend the replacement of all seven autos used in that line of work.

I recommend the purchase of a Homelite 2000 Watt. A.C. Generator as a reserve lighting unit to be used to supply current to our radio; also to furnish lights in the station. We saw the need of such a unit to be used in emergency cases such as occurred during the hurricane of September 21st, 1938, and other severe electrical storms when the local electric light lines were out of service. Only by the use of a radio car, that acted out in the station yard as a headquarters unit, were we able to send and receive messages from any of the cars that night. The purchase of such a generator would eliminate any future suspension of current from the local electric light company.

In conclusion I wish to thank Mayor Burgin, the City Council, the heads of the various City Departments for their assistance given me. I am also grateful to the District Attorney and members of his staff, to the Justices of the Court, the Probation Officer and members of his staff, to the Clerk of Court and his office staff for their consideration and advice.

To all members of the Department who have worked to reach and maintain a high standard of efficiency, I am sincerely thankful and to assure my appreciation that our best efforts to merit their confidence in the future will be given.

Respectfully submitted,

JOHN J. AVERY,
Chief of Police.

REPORT OF FIRE DEPARTMENT

February 27, 1939.

(This total includes 13 reported fires which were investigated by the department and are included in the annual fire loss.)

Cash received from—sale of old tires	
recharging extinguishers	
fireworks permits	
alcohol permits	
sale of old junk	\$147 60
	(Paid to City Treasurer)

The fire loss for the year showed a decrease of \$35,003.03 or a decrease of more than 24% under the previous year. This reduction is a tribute to the excellent work of the newly organized Fire Prevention Bureau under the supervision of Captain Timothy O'Connell. Captain O'Connell was appointed Head of the Bureau as a full time Captain in charge. His annual report to the Chief of Department showed his untiring efforts and the low fire loss for the year is due in no small part to his inspection work.

The number of alarms for the year showed an increase of 30 over 1937. This was due to the mild open winter which increased the number of grass and brush fires.

The number of false alarms increased 33 over 1937. A number of these were sounded by a mentally deficient youth who was apprehended after he had sounded 10 in one afternoon.

The City Council created new company officers and on March 19th last, the following men were promoted: To Captain—Avery, Barry, Cain, Curtin, Della Lucca, Fenby, Gorman, Kinniburgh, and Wholey. To Lieutenant—Dorlay, Gerry, Maloney, Mullaney, Nickerson, Nimeskern and Walsh. This places an officer on all but three companies and also places a Captain in charge of Fire Prevention.

On September 6th the Fire Department opened their new Fire Headquarters although the fire alarm wing was not complete and the drill tower was still under construction. The quarters are the most complete and practical of any in New England. Every modern improvement necessary for an efficient fire department has been installed.

A new hose repairing machine was purchased. This machine enables the department to accurately repair its own hose at practically no expense. Sound and serviceable fire hose is the most essential item for an efficient fire department.

Four belt type wheat lights were bought and placed in service on Engine 3. It is my desire to have a belt wheat light as standard equipment for each man on duty, and I have made provisions in the budget to purchase additional ones.

The order for the new West Quincy Station was passed by the City Council and signed by the Mayor and work has already begun on its construction.

One retired member of the department, John Curry, died during the year. The late Private Curry had a long and excellent record as a fireman and his death was noted with sorrow and regret. Two veteran members of the department, Frank Genero and James Connell, were retired from the department on a pension. Both men were the oldest in point of service on the department and had excellent records as firemen from the horse drawn apparatus days to the present modern department.

The apparatus of the department is in excellent condition although the Seagraves, all from 12 to 14 years old, are becoming more costly annually to maintain.

Recommendations

I wish to make the following recommendations and strongly urge that they be adopted as soon as possible.

That a mechanic be appointed to maintain the apparatus in perfect condition. Under the present system a mechanic is called in when repairs are necessary; with a mechanic on hand at all times his duties would be to keep the apparatus in perfect running condition at all times.

That an aerial ladder be purchased and placed in the new fire headquarters. A modern fire department can not be operated efficiently without an aerial.

That a building program be mapped out to replace the following stations: Quincy Point and Hough's Neck. They need not both be built this year but should be done within the next two years. Quincy Point Station is in poor condition and needs immediate attention.

That the three firemen detailed to Fire Alarm as operators be returned to fire duty and regular fire alarm operators under the Superintendent of Fire and Police Signals, be appointed.

That another Special Service Truck be purchased and placed in service at Atlantic Station to cover the north portion of the city. The number of alarms received yearly and the distance of response from Fire Headquarters warrant this second truck. The number of special calls and inhalator calls make the need of another truck urgent.

In conclusion I wish to express my sincere thanks to His Honor, the Mayor, the City Council, the various city departments, and to the officers and men of the fire department who, through their zealous and untiring work have earned my sincere gratitude.

Respectfully submitted,

WILLIAM J. SANDS,
Chief of Fire Department.

FIRE AND POLICE SIGNAL DEPARTMENT REPORT

January 1, 1939

HONORABLE THOMAS S. BURGIN
Quincy, Massachusetts

Dear Mayor:

I respectfully submit the annual report of the Fire and Police Signal Department for the year ending December 31, 1938.

Personnel of Department

Thomas J. Smith, *Superintendent*

Maintenance Men

George N. Leonard
Richard Williams

Patrick Reddington
George B. Howie

Fire Alarm

Eleven miles of overhead construction in various portions of the city were completed during the year.

Four thousand five hundred feet of multiple conductor lead and loom covered cables were drawn in at various locations to enlarge and diversify our circuit distribution.

Eleven new boxes were added to the system, all of the master box type at school house locations replacing regular street type boxes that have since displaced obsolete boxes in various districts. This change was made possible through the cooperation of the Federal Government with W.P.A. labor, the School department with the purchase of ten of these boxes, the Public Works Department and the Fire Alarm Department sharing the balance of the cost of equipping ten schools with modern fire alarm systems throughout.

Seventy-two battery units were replaced with new type trickle float charge batteries. All boxes were tested periodically and painted, cleaned and lubricated. The other school systems were maintained efficiently with no outlay of funds.

Although the new Fire Alarm building has been completed, only one-third of the necessary equipment has been supplied to date.

The department is still stifled as to expansion until the rest of the equipment is supplied.

Police Signals

The signal system has been kept in first class condition throughout the year. More boxes are needed as well as a new receiving register at headquarters. The present one has been in use since the station was opened.

Traffic Signals

Four new type controllers were added to the system during the year and more are needed the coming year.

Every change made was with the future needs of the city in mind and all construction was of a permanent character. The problem of traffic control is largely a matter of common sense and a thorough knowledge as to the peculiarities of the intersection involved. No hard and fast rules can be applied to any one location.

Our cycle of colors will work reasonably well at one point and yet the same set up at another point would work a hardship on certain motorists or pedestrians. One length of timing at one intersection will pass a larger number of vehicles than another, through a difference in the topography of the street surfaces. Time of day and weather conditions all enter into the problem. I do not believe that signals will solve traffic congestion, neither will theory based on mathematical computations. Congestion of traffic, both pedestrian and vehicular, at certain points, in my mind is a healthy sign as far as business is concerned.

The hurricane of last fall caused heavy damage to all our outside construction and will be a source of trouble for some time to come, due to strains on aerial construction that will show up from time to time. Therefore, I should recommend for your approval a larger appropriation for maintenance in the annual budget and hope for favorable action by the City Council and your Honor upon it.

Very truly yours,

THOMAS J. SMITH,
Superintendent Fire and Police Signals.

REPORT OF INSPECTOR OF BUILDINGS

January 3, 1939.

HON. THOMAS S. BURGIN,
Mayor of City of Quincy.

DEAR SIR:

I herewith submit the thirty-second annual report of the Building Department for the year ending December 31, 1938.

TABULATION OF BUILDING OPERATIONS FOR 1938

16	Miscellaneous	271,942 00	
<hr/>			
1,486			\$1,416,994 00

Statement

Cash received each month for permits issued from January 1, 1938 to December 31, 1938 and paid to the City Treasurer is as follows:

January	\$ 36 00
February	52 00
March	182 00
April	169 00
May	150 00
June	148 00
July	179 50
August	167 00
September	219 00
October	327 50
November	222 50
December	104 00

\$1,956 50

There were 128 family dwelling units provided through new construction, 37 through alterations and 15 demolished, leaving a total of 150 additional family dwelling units.

During the month of April all fire appliances of hotels and lodging houses in the City of Quincy were given an inspection as required by the Department of Public Safety of the Commonwealth of Massachusetts under Section 47, Chapter 143 of the General Laws.

Respectfully submitted,

ALRICK A. WEIDMAN,
Inspector of Buildings.

REPORT OF INSPECTOR OF WIRES

January 3, 1939

HONORABLE THOMAS S. BURGIN
Mayor of Quincy, Quincy, Massachusetts

Dear Sir:

I respectfully submit my annual report as Inspector of Wires for the year ending December 31, 1938.

Inspection in Buildings

The following specified schedule of electrical inspections made of lights and other appliances installed.

Number of permits issued in 1938.....	1,717
Fees received for the above	\$984.00
Inspections made as per permits issued.....	1,835
Number of unfinished installations	12
Number of old installations—reinspected	112
Number of defects in installations	245
Reinspections after fires	178
Total inspections made during the year.....	2,125
Total amount of permits issued to Quincy Electric Light and Power Company to install service and electrical appliances	450
Electric ranges installed	68
Refrigerators wired for—permanent wiring.....	30
Number of lights wired for	6,830
Signs — wired for	85
Motors — wired for	1,120
Total horse power of above	318

Number of Old Buildings Wired

One family houses	10
Two family houses	3
Three family houses	1
Miscellaneous	2
Total	16

Number of New Buildings Wired

One family houses	100
Two family houses	5
Three family houses	1
Four family houses	3
Mercantile buildings	8
Miscellaneous	6
Total	123

Additional Wiring in Old Buildings

One family houses	1,061
Two family houses	25
Three family houses	5

Four family houses	1
Mercantile buildings	287
Manufacturing buildings	4
Garages	11
Miscellaneous	189
Total	1,583

With the increasing introduction of new and improved types of appliances and equipment in the rapidly expanding field of electricity, the demands on this office have increased to such an extent that I feel it necessary to add these further details as a supplement to our yearly report in order that you may have a more complete understanding of the added duties of this office.

The use of lamps of a much greater intensity for lighting has resulted in overloaded service facilities with attendant fire hazards, particularly along the retail section of Hancock Street. Constant reinspection must be made in this section and a personal check up is made of every circuit where a blown fuse has been reported by the Quincy Electric Light and Power Company. In many instances, facilities have been found inadequate and the necessary changes ordered.

Oil burners for domestic and industrial use have presented an emergency problem. Since their function is almost wholly for heating purposes I have deemed it necessary for the convenience of the public to attend all fires that have been called to my attention by the Fire Department when the wires have been involved, and they have had to open the main switch. I have authorized, after an examination, the continued use of such heating systems, if, in my opinion, they are in good condition. In cases where illness prevails, temporary repairs are made to at least one lighting circuit. The Fire Department has rendered splendid co-operation in fires of this nature.

It has been the practice in the past for Wire Inspectors to make rules governing the installation of wires and conduits as conditions in their opinion warranted. As a result, considerable confusion is caused to the trade because of conflicting opinions of Inspectors. The Massachusetts Master Electricians Association through its local unit of the Quincy Master Electrical Contractors Association has requested a uniform set of rules governing such installations. To this end I have become a member of, and am working with the International Inspectors Association and the Municipal Inspectors Association of Boston. Considerable progress has been made along these lines and I anticipate a favorable report in the near future.

During the past year considerable electrical work has been performed in the following schools by the W.P.A. In each case the installations were laid out and supervised by this office.

Squantum School
Coddington School
Willard School
Adams School
Quincy School
Cranch School

Hancock School
Lincoln School
Wollaston School
Woodward Institute
Washington School
Gridley Bryant School

Very truly yours,

FRANK LINTS,
Inspector of Wires.

REPORT OF SEALER OF WEIGHTS AND MEASURES

January 3, 1939.

HONORABLE THOMAS S. BURGIN,
Mayor of Quincy, Quincy, Massachusetts.

DEAR SIR:

I submit herewith the annual report of the Department of Sealer of Weights and Measures for the year ending December 31, 1938.

JAMES M. CANTFILL,
Sealer of Weights and Measures.

REPORT OF ENGINEERING DEPARTMENT

January 3, 1939.

HON. THOMAS S. BURGIN, *Mayor of the City of Quincy*

DEAR SIR:

I herewith respectfully submit the fortieth annual report of the Engineering Department for the year ending December 31, 1938.

This department was called upon by every department connected with the City for engineering service or drafting work to be done. It would be impossible to itemize each project or request, as the work done in this department during the year was so varied. I am, therefore, giving a brief review of the more important requests.

City Council

All meetings of the City Council and Finance Committee were attended by the City Engineer and all information requested was furnished. Plans and estimates were prepared for land takings, sewers, drains, acceptance of streets and hearings of various kinds. Many requests that came directly from a Councillor and not necessarily from a Council Order were given immediate attention.

City Clerk

The City Clerk was furnished with all plans for the acceptance of streets and land takings, which were recorded by him with the Council Order in the Norfolk Registry of Deeds. All reports of accidents received by the City Clerk were investigated and surveys made when necessary.

City Solicitor

At the request of the City Solicitor this department prepared plans for releases with descriptions of land takings, sewer and drain easements. The City Engineer also interviewed individuals whose property was affected, and appeared in court to testify in his capacity when action was brought against the City.

Tax Collector

During the year the department was called upon to furnish 5,901 descriptions of parcels of land to be sold for unpaid taxes, an increase of 218 over 1937. There were 573 requests received by the Tax Collector from attorneys and individuals asking for information regarding outstanding betterments or liens. These were referred to, and filled by this department.

Assessors Department

There were 1,963 transfers of property as against 1,983 in 1937, 2,393 in 1936, and 4,970 in 1935. There were 100 tracings made during the year, to replace some which were old and worn out.

Upon request, surveys and plans were made for Tax Appeal Cases.

Building Department

During the year, 213 applications for permits to build or move buildings were referred to this department. The City Engineer personally visited each site and established the grade. A grade fee of \$2.00 must accompany each application. A total of \$426 has been turned over to the Treasurer as receipts from this department.

Cemetery Department

It is vitally important that the City consider the acquisition of new land for cemetery purposes. In one of the previous reports of the City Engineer, attention was called to this important need. During the year, under a W. P. A. Project, a survey was made throughout the City to find a new location for cemetery purposes. The information and plans compiled under this survey are now filed in this office.

The granite wall inclosing the cemetery is progressing satisfactorily and it is expected that it will be completed during 1939.

Park Department

Due to the numerous W. P. A. Projects carried on in the various Parks and Playgrounds of the city, much work was done in laying out these improvements. Rather than give even a brief description of the many projects, I will refer you to a complete report by the Park Board, which carries a detailed description.

Sewers

During the year 1.94 miles of main sewers were constructed. All sewers that are constructed in the City are planned and laid out by this department. The large 300 feet to 1 inch scale plan showing all sewers, man-holes, etc., was found so satisfactory by the Sewer Department that an additional one is being made for the City Engineer's office.

Walter S. McKenzie, Superintendent of Sewers, is in charge of all construction work.

For list of Sewers constructed, see attached schedule.

Surface Drains

The work of cleaning, straightening and widening the Furnace Brook and Town Brook was continued under a W. P. A. Project. During the year, the lower end of Town Brook between Washington Street and Bigelow Street was about 75% completed. Work will continue throughout 1939 on these and other W. P. A. Projects.

The survey of the drainage system which was completed in 1937 under a W. P. A. Project has been found very helpful in the laying out and designing of new systems as was the 300 feet to 1 inch scale plan showing the entire drainage system in the City of Quincy.

For schedule of locations, with length and sizes of drains built, see attached list.

Accepted Streets

The City Council accepted a number of streets during the year. As some of these streets were accepted too late for construction they are being held over until 1939.

See schedule for accepted streets and accepted streets constructed.

Street Construction

The amount available for Rebuilt Streets was \$270,875.61, which was divided as follows: Street Loans, \$200,000.00; Budget, \$32,000; Chapter 90, \$13,771.11; Balance, \$25,104.50. Of this amount \$270,865.33 was expended.

The program was laid out at the beginning of the year and was carried on with very few changes.

Again this year, the City was able to receive from the Commonwealth of Massachusetts, under Chapter 90, money for the construction of a part of Centre Street from the Braintree Town Line, northerly toward Copeland Street. The work was not completed and will carry to 1939.

Willard Street, which was built under Chapter 90, was completed during the year. The Town of Milton constructed their portion of Willard Street from the Quincy Line to the East Milton Railroad Station. With this construction completed the City has a fine Artery in the western part of the City, which, when Centre Street is completed, will furnish a much needed highway.

Curbing

Most of the curbing laid during the year was done by the W. P. A. Curbing Project and will be carried over into 1939. Both granite curb and concrete curb was built. The granite was supplied by a W. P. A. Project operating from the Hitchcock Quarries. During the year 6.67 miles of curbing were laid in various parts of the City.

For locations of concrete and granite curbing placed, see attached schedule.

Granolithic Sidewalks

For the seventh consecutive year there was no appropriation for this type of work. There was, however, some granolithic sidewalk laid under W. P. A. Sidewalk Projects.

For locations, see attached schedule.

Asphalt Sidewalks

In conjunction with the street rebuilding program, as well as accepted streets already built, many feet of this type of sidewalk were constructed, work being done by W. P. A. \$47,741.53 from the City's W. P. A appropriation was spent for this type of sidewalk.

**Streets Rebuilt
W. P. A.**

Many unaccepted streets were built during the year by W. P. A. labor, for which the City spent \$16,995.75 as its share for material and equipment.

For itemized list, see attached schedule.

Conclusion

It has been most unfortunate that the Engineering Department has lost through death, Andrew S. Odom, who has been a faithful and industrious employee in this department for forty-two years.

On March 5, 1938, Fred J. Kiley applied for his pension which was approved by the City Council. Mr. Kiley started work with this department on August 1, 1924.

May I take this opportunity to express my appreciation for the co-operation I have received from His Honor the Mayor, Members of the City Council, Department Heads and W. P. A. Officials, also for the loyalty shown, and co-operation extended to me by the personnel of this Department.

GERHARD F. SCHAFFER,
City Engineer.

ANDREW S. ODOM

In Service

September 1, 1896	—	May 20, 1907
April 18, 1909	—	November 19, 1938

A faithful and loyal servant
who will be missed by his fellow employees.

REPORT OF THE CITY PLANNING BOARD

January 3, 1939

HON. THOMAS S. BURGIN
Mayor of the City of Quincy

Dear Sir:

We herewith submit the twenty-fourth annual report of the City Planning Board.

During the year numerous plans and studies made by the W. P. A. were received, discussed, and placed in the files of the City Engineer's office.

One of the studies submitted was a parallel route to Hancock Street starting at the Atlantic railroad bridge, and running westerly of the N. Y., N. H. & H. Railroad to Granite Street, thence underpassing the railroad, through the Edwards Meadows to the junction of Water Street and Quincy Avenue.

An extensive study of a proposed new cemetery location was also submitted.

The Board wishes to thank W.P.A. officials for their co-operation and interest in submitting these studies to the Board.

Respectfully submitted,

WILSON MARSH, *Chairman*,
WALTER W. HOLLAND,
ROBERT A. ZOTTOLI,
JOHN A. SANDISON,
GUSTAF E. WESTHRIN.

GERHARD F. SCHAFER, *Clerk*.

REPORT OF THE BOARD OF SURVEY

January 3, 1939

HON. THOMAS S. BURGIN
Mayor of the City of Quincy

Dear Sir:

We herewith submit the twenty-third annual report of the Board of Survey.

During the year hearings were held on the following petitions: Matti Siitonen, Finland Street; Edward Payson, Extension of Governors Road; Walter H. Sealund, Sealund Road; Braintree Realty Corporation, Golf Court. The petition of the Braintree Realty Corporation for Golf Court was given leave to withdraw in favor of the petition of Walter H. Sealund for the same location, to be called Sealund Road.

All petitions were given tentative approval, subject to proper execution of the necessary work required by the Board.

Final approval was given on the petition for a layout on Morley Road and George Road Extension, Ward One.

Respectfully submitted,

LOUIS F. R. LANGEЛИER, *Chairman*,
SAM WOOD,
JOHN J. MANNING.

GERHARD F. SCHAFER, *Clerk*.

REPORT OF THE HIGHWAY DIVISION

May 8th, 1939.

HONORABLE THOMAS S. BURGIN, *Mayor of Quincy,
Quincy Massachusetts.*

Dear Sir:

I respectfully submit the report of the Department of Public Works for the year 1938.

Respectfully submitted,

EZEKIEL C. SARGENT,
Commissioner of Public Works.

ECS/RE

ANNUAL REPORT OF THE DEPARTMENT OF PUBLIC WORKS

The appropriations for Highway Maintenance have been as follows:

	Appropriated	Expended	Balance
General Maintenance	\$233,000.00	\$232,158.16	\$ 841.84
Pensions	11,996.00	11,946.79	49.21
Garage and Stable	7,500.00	7,365.80	134.20
Street Lighting	113,000.00	112,722.30	277.70
Highway Equipment	2,000.00	1,127.76	872.24
Miscellaneous Activities ...	25,000.00	24,984.90	15.10

The General Maintenance appropriations has been expended as follows:

Street Cleaning	\$41,810.29
Snow Removal	72,678.48
Surface Treatment of Streets	13,373.46
Sidewalks	10,058.77
Street Patching	21,037.03
Street Repairs	2,884.45
Drains	22,344.98
Maintenance of Equipment	10,419.71
Vacations	13,382.39
Tools	4,923.02
Miscellaneous	19,245.58

Total	\$232,158.16
-------------	--------------

The expenditure for Snow Removal has been larger than last year but all streets and sidewalks have been well cleaned and very few complaints have been received. The two four wheeled drive trucks were very useful.

The policy of surface treatment of Highways has been continued this year with favorable results. This policy should be continued.

Quincy streets were kept reasonably clean during this year. This work is done by regular crews in each Ward of the City, while one Elgin Sweeper cleans the main streets during the night-time.

Another mechanical Sweeper is badly needed in this department.

GARAGE AND STABLE

All City owned automobiles and trucks (with the exception of those in the Fire Department) have been serviced and repaired at the Municipal Garage. This arrangement has been satisfactory and economical.

The City Stable was closed during the summer, but used during the winter months to stable horses loaned to the City for use on sidewalk plows.

There are no City owned horses at the present time.

The elevated sand bin located at the garage has been of great service during the winter months.

MISCELLANEOUS ACTIVITIES

All activities not chargeable to Highway Maintenance are covered in this item.

About seventy (70) street parks and flower beds including the traffic circle at Fore River Bridge have been maintained at a cost of \$7,037.45. Brooks have been cleaned, and parking areas cared for. All traffic signs and directional lines have been painted and maintained at a cost of \$8,060.70.

Highway fences have been painted and repaired.

In cooperation with the Chamber of Commerce about ninety (90) standards for Christmas tree decorations were made and erected by this department on Hancock Street from School Street to City Hall.

The Chamber of Commerce have requested that an additional ninety (90) be constructed for use in 1939.

STREET LIGHTING

Improvements in street lighting have been made this year in accordance with the survey made for that purpose.

There are at present the following street lights:

Overhead

274—600 C. P.
143—400 C. P.
623—250 C. P.
2,250— 60 C. P.

Underground

109—1,000 C. P.
93— 600 C. P.
13— 400 C. P.
12— 250 C. P.

NEW EQUIPMENT

Very little new equipment has been purchased this year. The appropriation of \$10,000.00 made in the budget was later transferred by the City Council to other accounts.

STORM EMERGENCY

The disastrous hurricane which occurred September 21st momentarily plunged this City into chaos.

The storm struck this City at about 4:30 P.M. and continued long within the night. All electric lights and fire alarm circuits were broken and upward of 1,500 trees on city streets, 1,800 on private property, 534 in Merrymount and Faxon Park and 108 in Mount Wollaston Cemetery were uprooted and destroyed.

Through the efforts of His Honor, Mayor Burgin, a radio broadcast brought the firemen, police and City employees, who were off duty, back to their respective headquarters, and by midnight this department had upwards of 300 men at work clearing streets.

The work was efficiently done and by noon the next day, only a few short streets were closed to traffic. Fortunately no fires or serious accidents occurred.

To provide funds for this work the City Council appropriated the sum of \$53,000.00, of which \$51,870.13 was expended, leaving a balance of \$1,129.87, which will be used for this work the coming year.

The department was greatly aided in this work, by the W. P. A., they contributed generously in clearing the City of fallen trees and debris, and approved a project for Rehabilitation. This project is in effect at present and will carry well into this year 1939. About 2,000 trees will be furnished and planted under this project.

STREET CONSTRUCTION

This year the department has expended the sum of \$270,865.33 for the construction of new streets and rebuilding of public highways. Of this, the sum of \$13,771.11 has been contributed by the Commonwealth of Massachusetts for the rebuilding of a portion of Willard Street and Centre Street under the provision of Chapter 90.

I believe that the street construction this year has been well done and is a credit to the department. In most cases streets have been finished with a mixed asphalt wearing surface.

Streets upon which betterments will be assessed are Delano Road, southerly end of Green Street and Pontiac Road.

A complete list of streets constructed will be found in the report of the City Engineer.

MUNICIPAL BUILDINGS

	Appropriated	Expended	Balance
Maintenance	\$19,264.06	\$19,240.37	\$23.69
Salaries and Wages	6,936.20	6,920.70	15.50

The appropriation for maintenance has been expended on the following buildings.

City Hall and Rental Offices
 Six Fire Stations
 Police Station
 Community Building, Ward six (6)
 Commissary and Welfare Office
 City Home
 Dispensary

Salaries and wages have been expended for Janitor service at City Hall, rented offices and Atlantic Community Building.

CENTRAL FIRE STATION

The construction of a new Central Fire Station was begun this year and is practically completed. The building is located on the site of the old building on Quincy Avenue, but this land area has been increased by the acquisition of the Desmond property on Quincy Avenue, southerly of the present lot.

The plans for the building were prepared by Mr. George E. Robinson, Architect, and the contract for construction (exclusive of grading) was awarded to R. R. Jacobucci, Inc., of Quincy.

The building is of colonial design well planned, and ably constructed. It is a credit to the ability of the architect, the contractor and the craftsmen employed on the work.

The building will cost, when completed, including land required and grading, approximately \$159,000.00.

NURSES' HOME

Plans for an addition and alteration to the Nurses' Home on Whitwell Street were prepared by Hutchins and French, Architects, and a contract for the construction awarded in December to M. S. Kelleher Co. of Boston. Through a 45% grant of Federal P. W. A. funds the cost to the City will be but 55% of the total to be expended.

WEST QUINCY FIRE STATION

In December, the City Council took by right of eminent domain the land at the corner of Willard Street and Copeland Street, West Quincy, for the purpose of erecting a Fire Station. A Federal P. W. A. grant for 45% of the cost was procured. Plans for the building were drawn by Mr. George E. Robinson, Architect, and the contract for construction was awarded to John Hamre & Sons of Quincy. Work has been started and the building will be completed by June, 1939.

FORESTRY AND GYPSY MOTH

	Appropriated	Expended	Balance
Salaries and Wages	\$14,650.00	\$14,641.96	\$ 8.04
Supplies and Expense	2,500.00	2,322.45	177.55
Equipment Maintenance	1,250.00	1,099.09	150.91
New Equipment	1,000.00	947.85	52.05

This department has been particularly busy this year. In addition to the regular work of caring for the City trees, it has maintained seventy (70) street flower beds in all sections of the City. All the plants for this work have been raised at the City Greenhouse.

The traffic circle at the entrance of the Fore River Bridge is a credit to this department.

The work of clearing the City of stumps and fallen trees after the hurricane placed a heavy load on this department, but the purchase of a new truck equipped with winch and hoist has greatly aided this work.

A new and modern greenhouse would be of great service to this department.

SANITARY DIVISION

	Appropriated	Expended	Balance
Salaries and Wages	\$119,350.00	\$119,064.86	\$285.14
Pensions	5,431.75	5,389.25	42.50
Equipment Rentals	4,000.00	3,999.64	.36
Equipment Maintenance	9,450.00	9,415.57	34.43
New Equipment	2,000.00	1,934.95	65.05
Care of Dumps	9,000.00	8,931.47	68.53

The expenditures in this department have increased during the past year. The increase was due to the inability to obtain suitable dumps, to the large amount of refuse following the hurricane and the five day week during the summer months.

Collections of garbage have been made twice a week (with the exception of Squantum and Houghs Neck) during the year.

The price of garbage to farmers has been reduced from \$1.00 per cubic yard to \$.75 per cubic yard, due to prevailing price of pork. The receipts from the sale of garbage for the year amounted to \$12,955.00.

The purchase of a new garbage collection unit was made this year. This type of body has been very satisfactory and a recommendation has been made for the purchase of six additional units for the coming year. I am of the opinion that the purchase of these units will reduce the cost of collection and will be sanitary.

The receipts for cleaning of cesspools this year was \$1,458.00. The cost of this work has exceeded the receipts by about \$460.00 and efforts have been made to encourage owners to connect with the City Sewer where possible.

WORKS PROGRESS ADMINISTRATION

	Appropriated	Expended	Balance
Administrative Salaries	\$15,389.97	\$15,312.71	\$77.26
Expenses	398.58	186.98	211.60
Material and Equipment ..	190,015.28	185,509.91	4,505.37

The administration of W. P. A. for the City has been carried on by the following organization:

Patrick J. Duggan, Coordinator
Rudolph Lofgren, Asst. Coordinator
John Keefe, Supervisor of Streets and Sidewalks
Oscar Hallquist, Supervisor of Buildings
Knut Lundquist, Supervisor of White Collar Projects
Frederick MacDonald, Supervisor of Parks and Playgrounds
Everett Foster, Cost Accountant
Edna Anderson, Typist

The Federal Government during the year has expended the sum of \$1,074,755.00 for wages and the purchase of materials during the year. The City has expended the sum of \$185,509.91 for the purchase of materials and hire of equipment for this work. The Municipal Stadium at Merrymount Park has been completed this year, and an enclosed baseball field has been constructed in the so-called middle field at the same park.

A new field house and tennis courts have been built at the Ward 4 playground.

Tennis courts have also been constructed at the Montclair playground.

Town Brook at its outlet has been widened and greatly improved. Work will be continued on this brook the coming year. The improvement of Furnace Brook has been continued and walls have been constructed from the outlet for a distance of about one and one quarter miles. The Quarry project, operated at the Hitchcock Quarry, has furnished stone for many projects. The granite wall around Mount Wollaston Cemetery is nearing completion and is a credit to W. P. A. and the City.

Bituminous and concrete sidewalks have been constructed on portion of about forty-five (45) streets. Granite and concrete edge-stone have been laid on fourteen (14) different streets throughout the City.

Gravel streets have been constructed in all sections of the City.

Repairs and painting to school buildings has been continued. The Woodward Institute and Adams Academy have been renovated. Materials for this work have been furnished from their respective funds.

The aid furnished by W. P. A. at the time of the Hurricane and the later work of rehabilitation have been of great value in the City.

Many other projects have been in operation during the year, a few of which are as follows: Women's Sewing Project, Card Record and Book Mending at the Public Library, compilation of records in the Assessors' office, the Fire Department, the Police Department, the Mount Wollaston Cemetery and the District Court.

The Fire Alarm system has been extended into all school buildings in the City.

A project to repair toys for the needy children has been operated in the basement of the Coddington School. Other projects have been completed or are now in operation.

ANNUAL REPORT OF THE SEWER DIVISION OF THE PUBLIC WORKS DEPARTMENT

February 28, 1939.

HON. THOMAS S. BURGIN, *Mayor*,
Quincy, Massachusetts.

Dear Sir:

I am submitting herewith the Annual Report of the Sewer Division of the Public Works Department for the year 1938.

Very truly yours,

EZEKIEL C. SARGENT,
Commissioner of Public Works.

For Financial Statement see Auditor's Report.

The tabulation in connection with this report will show the location and other particulars about sewer construction accomplished during the year 1938. A record of the Particular Sewers or house connections is also shown. A schedule of surface and storm drainage work performed by this Department may be found with the report of the City Engineer.

Construction

Approximately two miles of sanitary sewers of various sizes were built this year including the completion of the Barham Avenue sewer which will make the sewers in Holbrook Road, Clement Terrace, Hamilton Avenue and Elliot Avenue available for use.

Particular Sewers

During this year there were 296 buildings connected in 293 connections with the sewer in wards as follows:

Ward 1	108	Ward 4	42
Ward 2	24	Ward 5	38
Ward 3	10	Ward 6	71

The total number of feet laid in these connections was 13,762.70 at a cost of \$16,115.47, thus making the average cost per foot \$1.17. Average length per connection 46.98 feet
Average cost per connection \$55.00

Buildings were connected as follows:

Single houses	248	Stadium	1
2-family houses	17	Yacht Clubs	2
3-family houses	2	Fire Station	1
4-family houses	5	Theatre	1
Church	1	Recreation Bldg. ..	1
School	1	Business Bldgs.	16

Maintenance

On account of the limited funds for Sewer Maintenance, sewer cleaning and flushing was confined to those sections of the system absolutely requiring attention.

Respectfully submitted,

WALTER S. McKENZIE,
General Foreman, Sewer Division.

REPORT OF CEMETERY DIVISION

January 3, 1939.

HONORABLE THOMAS S. BURGIN, *Mayor of Quincy,
Quincy, Massachusetts*

Dear Sir:

The Commissioner of Public Works respectfully submits the following financial report of the Cemetery Department for the year ending December 31, 1938.

Receipts

Care of lots	\$ 1,499 00
Sale of lots	7,580 00
Interments	9,283 00
Foundations and Grading	2,436 64
Perpetual Care	9,835 00
Perpetual Care Fund—Interest	8,527 68
Other Trust Funds—Interest	79 22
	<hr/>
	\$39,240 54

Expenditures

Clerk—Salary	\$700 00
Supplies and Expense	2,397 37
Equipment—Maintenance and Operation	892 69
Labor—Including Foreman	37,180 50
New Equipment	591 27
	<hr/>
	\$41,761 83

In 1938 there were five hundred and twelve (512) burials and nine (9) removals.

A statement of the Perpetual Care and other trust funds investments will be found in the City Treasurer's report.

Very truly yours,

EZEKIEL C. SARGENT,
Commissioner of Public Works.

ECS—D

HARBOR MASTER'S REPORT

February 5, 1939.

HON. THOMAS S. BURGIN, *City Hall, Quincy, Massachusetts*

Dear Sir:

The report of the Harbor Master of the City of Quincy for the year ending December 31, 1938 is herewith submitted.

Receipts by water for the year were as follows:

City Fuel Company	17 Barges, 14,981 tons coal
Fore River Coal Company	7 Steamers, approximately 23,300 tons coal
Standard Oil Company	52 Steamers and Barges carrying 1,288,834 bbls. gasoline and fuel oils
Quincy Lumber Company	3 Schooners, 658,823 ft. lumber, approximate cost, \$24,000

The waters of the Fore River Plant were patrolled during the following launchings at the request of the company officials:

Sept. 24	S.S. Panama
Oct. 8	Trawler Harvard
Nov. 10	Trawler Princeton
Dec. 10	S.S. Ancon

The Quincy Dry Dock & Yacht Corporation had 300 Steamers, Barges, Fishermen and Yachts in for overhauling and repairs.

There were 263 Yachts stored in the boat yards on Town River besides many others stored on Neponset River and elsewhere in the City.

The Fore River Bridge had 344 openings.

Made 19 trips with power boat going to aid of yachts in distress, aground and capsized; picked up 3 rowboats adrift, all claimed.

August 15th picked up the body of Ernest Blanchard of Weymouth off Pig Rock.

Reported various beacons extinguished and buoys out of position.

Called Coast Guard several times through the winter while boat was hauled up.

Attended hearings in the State House on Breakwater off Hough's Neck and the Sewage in Quincy Bay.

June 2nd, J. F. Sheppard & Sons Coal Storage buildings torn down.

Procter & Gamble, soap manufacturers, bought the property of J. F. Sheppard & Sons and Boston Edison Company to build a factory.

December, Trimount Dredging Company awarded the contract for dredging Town River to 24 ft.

Respectfully submitted,

JAMES A. M. NASH,
Harbor Master.

REPORT OF CITY SOLICITOR

December 31, 1938

HONORABLE THOMAS S. BURGIN
Mayor of Quincy, Massachusetts

Dear Sir:

During the past year the City Solicitor has carried on the work of the Law Department of the city in accordance with the requirements of the statutes and ordinances in relation thereto.

Respectfully submitted,

JOHN D. SMITH,
City Solicitor.

REPORT OF CITY CLERK

To HIS HONOR, *the Mayor of the City of Quincy*:

I have the honor to submit the fiftieth annual report of the department, being for the year ending December 31, 1938.

REPORT OF THE PARK DEPARTMENT

Quincy, Massachusetts

March 1, 1939

To the Honorable Mayor, THOMAS S. BURGIN

DEAR SIR:

We have the honor of submitting to you the fiftieth annual report of the Park Department, which is accompanied by our recommendations for further development and activities.

The Board assumed office in the last months of the year 1938; therefore we have had the cooperation of William J. Spargo, Manager of Parks and Playgrounds, in compiling the activities of the past year for this report. The year has been a most successful one, marked by an increase in activities and facilities for recreation, which can well be assumed by Your Honor. Your foresight and interest in the youth of the city and your willingness to seek and obtain the necessary funds to reach this objective can well be classed as one of the highlights of your administration of city affairs.

Let us state that the three members of the new Board appreciate the fine program carried out by the previous Board; it will be our constant endeavor to maintain that standard and our ambition to improve it.

We have arranged the report of the various recreation centers by the wards in which they are located, with the work accomplished in each and our recommendations to assist each councillor to better familiarize himself with their needs.

In closing, the Board is ever mindful of Your Honor's splendid cooperation. Your faith in us will react in accomplishments that will in no small measure be a credit to your administration.

FRANK G. PRAY,
Secretary.

WARD 1

Alfred N. LaBrecque Park

This is an ideal playground, but considerable damage was caused by the hurricane to the pavilion, backstop and bleachers. A W. P. A. Project is pending to erect and relay outfield and construct double tennis courts. Twenty-four plots of land, a total of 135,000 feet, were taken to complete the field, which when finished will be classed as one of the city's best. Two instructors are provided during the playground season, which is well attended, many activities being carried on.

Manet Lake

The grass and rubbish have been cleaned out here and the area flooded for skating. A hockey rink was erected and lighted for night skating and hockey.

William Cushing Baker Park

This Park was graded and seeded down. It contains a popular bathing beach, and has one instructor during the playground season. A chain link fence was erected during the past year.

Sea Street Skating Pond

This area was flooded for skating and was well attended by the small children of the district.

Perkins Playground

The bleachers and backstop at this location were damaged by the storm. A hockey rink equipped with nets was provided during the winter season and was well used and appreciated by the youth of this section. The playground has two instructors during the summer season and is well attended. Under a W. P. A. Project a softball diamond will be constructed this spring, with backstop and bleachers, and two tennis courts.

Adams Shore Playground

This is a popular play area, fully equipped. Two instructors are in attendance during the season.

Faxon Field

This field is in constant use for football, soccer, softball, High School football practice, and outdoor gym activities for the High School. We recommend that a skating rink be provided on the Coddington Street side next winter.

Faxon Tennis Courts

These tennis courts are in use during the season and are very popular among the better tennis players. The City Tennis Tournament was conducted here for cups offered by Mr. Henry M. Faxon. William Bowyer was supervisor.

Cranch School

A well equipped playground is provided here, with a full program during the season under the supervision of two instructors. It is a safe and popular place for small children to play.

WARD 2

Fore River Club House

This club house is one of the community buildings of the city and is under the supervision of the Park Board. It was used a great deal during the past year for a W. P. A. Center and local activities, as well as for dances, whist parties, banquets, weddings, and socials. Dressing Rooms are provided for baseball and soccer players who use Fore River Field. A full time janitor is in charge. The interior has been painted, the floors refinished, and the plumbing and heating system overhauled. Tables and chairs were purchased. The building serves also as a comfort station during field activities.

Fore River Field

Last year this field was graded and rolled, a fence was erected to enclose the field, the bleachers were repaired, and a chain link fence was constructed around the tennis courts. This year new bleachers will be built. This field was one of the most used in the city by baseball teams in the Park, South Shore, and Industrial Leagues, plus many independent teams. A soccer field was laid out for use during the fall and winter months. The tennis courts were put in good condition and were very popular among tennis lovers in this section.

Avalon Beach

At this location is the only city supervised beach. Two rafts are furnished, the seats and shelter are kept in repair, and the beach is cleaned daily during the season; a fully equipped playground is provided with two instructors. We recommend that a life guard be furnished during the bathing season as a safety measure.

Munroe Playground

This area is under construction, but is used for softball, football, and as a practice field for Junior High School football. A W. P. A. Project is planned to fill and grade the low land, and in time the field will make an ideal center for various athletic activities.

Daniel Webster School Playground

A chain link fence was erected during the past year at this location. The playground is well equipped and ideal for small children; two instructors are provided during the season.

Whiton Park

This is a popular breathing spot for the people of this section. The shrubs and grass plot are cared for by Park workers.

Pollard School Playground

During the past year walks were laid out by the N. Y. A. at this fully equipped playground. It is a naturally shaded spot ideal for small children, and has two instructors during the playground season.

Elm Street Playground

This is one of the most popular playgrounds in the city, with three instructors in charge. It is well shaded, fully equipped, and well attended. A comfort station is needed.

WARD 3

Bradford Street Playground

The playground apparatus here was repaired and replaced. A fine program is carried out, with three instructors in charge of the large number in attendance. Tennis courts are a great asset to the field. A comfort station is also needed here.

Henry L. Kincaide Park

The largest attendance in the city is at this playground, which is well equipped to serve the children of this section and carries out a complete program. Two tennis courts are in use at all times. The baseball field is used by teams in the Park, South Shore and Industrial Leagues, as well as by local teams. It is also used as a football practice field by the Junior High School and for their outdoor program. A W. P. A. Project is recommended to re-grade the land recently taken from the Quincy Column Turning Company, to erect a stone fence on the Water Street side, and to construct a field house.

WARD 4

William T. Shea Park

This beautiful spot was re-graded, walks were laid out, and a boulder and bronze plate placed in memory of ex-Mayor William T. Shea. New curbing and shrubs add to the effect, and the whole receives weekly care by Park workers.

Joseph O'Rourke Playground

At this location are a well equipped playground, with two instructors in charge during the season, and a field used for baseball by the Park, South Shore, and Industrial Leagues and independent teams. The outfield was filled in, a fence erected, and new bleachers and backstop built last year by the Park Department, and a Field House and Tennis Courts constructed under a W. P. A. Project which will be ready for use this year.

St. Moritz

The Park Department cooperated with the Metropolitan District Commission and took over the full maintenance of the skating ponds at this location. This included scraping off snow after storms and putting the ice in shape for the winter carnival. There were twenty-five skating days during the past winter. The Board sponsored a resolution by the City Council and met the Metropolitan District Commissioner to present him with a proposition that his department take this work over in the future.

WARD 5

Merrymount Park

This is the recreation center of the city, where during the past year considerable work has been done.

Stadium. This fine project was completed, with a seating capacity of 5500, and used for many purposes during the past year, including a Memorial Service by the Quincy Veterans Council, an Amateur Boxing Tournament under the auspices of the Quincy Chamber of Commerce, and football games of the Quincy High School, Park League, and Fore River Apprentices, with two games played at night under floodlights. A custodian will be required during the next season.

Charles Francis Adams Baseball Park. This baseball field was constructed under a W. P. A. Project, and will be dedicated this year to Charles Francis Adams, a member of the Adams Family,

who deeded this fine park to the City of Quincy. An enclosed baseball park will fill a long felt want of the baseball teams and fans, and it will be the purpose of the Board to keep and maintain it for this use only. Teams holding permits will be allowed to use the field, but during off times the field will be locked.

Pageant Field. This large area is used for picnics, band concerts, Fourth of July celebrations, and a playground. It is connected to Wollaston by a 750-ft. bridge with entrance on Florence Street, which was reconstructed during the past year.

Pine Island. This part of the Merrymount Park system has been separated by the creek the past nine years, but during the winter months a 70-ft. span was built by Park workers and placed over the creek to connect the island with the Park again. Pine Island will be used by Boy Scout Troops, Camp Fire Girls, and Girl Scouts, and for picnics and family gatherings. The underbrush will be cleaned out and fire places built to provide an excellent addition to the Park System.

Bowling Green. This is located on the Pageant Field and is used by the older men of the city for the game known as "Bowling on the Green." It is used daily and lighted for use at night. One Greenskeeper is in charge.

Playground. One instructor is in charge of this playground, conducting a regular program. The apparatus is left up over week-ends for the use of people who bring children on picnics.

Considerable damage was done to the park during the hurricane. Trees have been removed and three thousand seedling pines (scrub type) have been set out. The cinder track at the Stadium will have to be resurfaced this year.

Safford Park

A retaining wall was built at this beautiful part of the Park system, and the whole received regular maintenance during the season.

Wollaston School

A fully equipped playground is maintained here, which is well attended and has two instructors who provide a fine program.

Massachusetts Field Playground

This is a regularly equipped playground which conducts a fine program under the supervision of two instructors, and has additional facilities for softball playing. A Pet Stock Show is one of the features here each year.

Stoney Brae

There are excellent possibilities here for a hockey rink and a skating area, as it can be naturally flooded. Development is planned this year.

Sailor's Home Pond

At this pond a hockey rink was erected, flood lights furnished, and a skating area maintained, giving twenty-eight skating days during the past winter. A first aid ladder and life preserver were placed near the pond.

Fenno Street Tennis Courts

During the past year the fence was rebuilt and minor repairs made to the surface of the tennis courts at this location. It is a popular place for Wollason tennis enthusiasts.

WARD 6

John Wendall Moses Playground

At this location the field was graded, new backstop provided, and bleachers built. Under W. P. A. a concrete skating rink was completed and used during the winter, providing a welcome addition to the facilities of this section. Two instructors are in charge of the Playground during the season. Twelve lots have been taken to enlarge the playground and provide space for a field house.

Welcome G. Young Playground

A fully equipped play area is provided for this thickly populated section, with two instructors in charge. It also contains two tennis courts, horse shoe courts, and a soft ball field, where bleachers are to be erected to serve the many soft ball fans.

Dennis O'Neil Playground

At this field bleachers and backstop have been erected and 1490 feet of six-foot chain link fence erected. It is used by North Quincy High School, Park, South Shore, and Industrial Leagues. A W. P. A. Project constructed two tennis courts and graded the field and playground. A fully equipped playground is maintained, with two instructors in charge. During the past winter the field was flooded for skating. The Board intends to construct a skating area in the clearance at the left field.

Montclair Field

Nothing in the way of development was accomplished on this field during the past year, with the exception of the erection of two tennis courts. The field, however, is to be closed this year to permit the W. P. A. Project to construct bleachers, backstop, and regrade the field. A skating pond was created in the rear of the Montclair Community Building, which was ideal for small children.

SPORTS

Baseball

No city in the Commonwealth of Massachusetts, outside of the City of Boston, has better facilities for playing baseball than the City of Quincy, with eight first-class regulation baseball fields, plus a new enclosed field which has been added for the coming season. All are under the constant care of department workers, lined off before games, and furnished with bases and pitcher's rubbers. Every ward in the city has its own field and representative teams.

The Park Board sponsored a Park Baseball League. The West Quincy Pals were the winners in a close series of 2 out of 3 games. The South Shore, Industrial, Church and Junior Leagues, with many independent teams, used the fields, as did the Wol-

laston Post American Legion Junior Baseball Team, which played its home games at Merrymount Park, including games in the state finals. North Quincy and Quincy High Schools used O'Neil and Merrymount Parks respectively.

Football

This great American game for rugged youth was encouraged in every way possible by the Board. Floodlights for night practice were erected on several playing fields and goal posts furnished. The Park League was sponsored and directed by the Board, all games being played in the Municipal Stadium on Sundays. Two games under floodlights were tried, and they were successful ventures. The League was composed of six teams, and the North Quincy Alumni were the winners in the series of very close and interesting games. The Park Board awarded a suitable trophy.

Soccer

Provision was made for soccer during the early spring and fall on Faxon, Merrymount, Fore River, and Munroe Fields. Goal Posts were furnished and the fields properly lined off. Quincy boasts several soccer teams, and the Junior High Schools all include this sport on their athletic programs.

Swimming

One of the most enjoyable and healthful recreations for all is bathing. Our city beaches at William Cushing Baker Playground, Avalon Beach, and Merrymount Park were under constant supervision, and everything was done to make bathing safe and enjoyable. Every child and grown person should be able to swim; it will be the aim this year of the Board to see that some program along this line is carried out at our city beaches.

Winter Sports

The Board encouraged winter sports this year by making it possible in many sections of the city through the flooding of areas for skating. This proved very successful, as there were listed twenty-eight skating days. Considerable work was done at St. Moritz, and it was deemed advisable by the Board to try to discontinue this in the future and devote the time to perfecting areas in all sections of the city for this popular winter sport. Sailor's Home Pond, Manet Lake, O'Neil Field, Sea Street, Montclair, Stoney Brae, Perkins Playground, and Squantum all had excellent skating during the winter season. We hope to develop this further next winter.

Tennis

Tennis enthusiasts are indeed fortunate in the extraordinary development of facilities for this sport. The coming spring and summer will see the opening of many new double courts in West Quincy, Hough's Neck, Atlantic, and Montclair, in addition to those now at Merrymount Park, Bradford Street, Squantum, Faxon Field, Fore River, and Welcome Young Playground, giving every ward in the city a double court. This offers a fine opportunity to conduct a city-wide tennis tournament, with eliminations at each court and the winners of each meeting in a final tournament.

Horse Shoe Pitching

Interest in this popular barnyard sport was keen this year—so much so that the Board encouraged it as one of the regular playground features. Competition was conducted on an inter-playground scale, with finals played at the end of the season. Clay courts will be built on several playgrounds this year.

Bowling on the Green

The Bowling Green has proved to be a popular city investment. It gives the men of mature age a chance to exercise in keeping with their age. The green was in use during pleasant weather and also during the evenings under floodlights.

Basketball

The Park Department-W. P. A. Basketball Program composed of seven leagues enjoyed a successful season. Games were played from December 2, 1938, to March 25, 1939, in the School gyms.

With participants composed of boys of out-of-school age, three senior circuits were operated and known as the City, Park, and District Leagues. A total of 140 league contests were held with 60 exhibition games. An average of 168 players and 800 spectators took part each week, with the season totals showing 2,688 participants and 12,800 spectators.

One league composed of boys above elementary school age was conducted with seven teams operating. All games were played at Atherton Hough Auditorium on Friday and Saturday nights. A schedule of 42 league games was played, with the average weekly participants numbering 26 and attendance 150. One girls' league (4 teams) played 12 games scheduled Saturday afternoons at Atherton Hough School. Average participants, 24. One boys' league averaging 12 to 14 years played games at Atherton Hough Auditorium. There were 4 teams in the league playing a 12-game schedule with the average participants 76 and attendance 500.

W. P. A. instructors were present and in charge of all contests.

Liveableness An Asset

The absence of parks and playgrounds is a blow to the financial future of any city. Our Chamber of Commerce in its efforts to secure more industries for Quincy could find no more persuasive argument than the progress we have made in this direction. It might well be said by industries that "We find it was the liveableness of your city that decided the issue; nowhere did we find the qualities of good living as highly developed as they were in Quincy." Keep Quincy a good place in which to live and our future is assured.

Recommendations

Field House, Merrymount Park; Comfort Stations where needed; Field House, O'Neil Playground; Floodlighting equipment for Municipal Stadium; Field House, Kincaide Park; Purchase of O'Brien lot adjoining O'Neil Park; Abandonment of the upkeep of St. Moritz skating area; Provision of facilities for mass recreation for women and young women as outlined by the Playground and Recreation Association of America; Cooperation with National Youth Administration to develop Pine Island as a center for outdoor activities; Encouragement of a year-round program at all playgrounds.

Permits

During the year the following number of permits was issued for various activities.

	Permits	Estimated Attendance
13 Tennis Courts	3,821	9,648
8 Baseball Fields	740	200,000
School Baseball	240	2,400
14 Softball Fields	345	30,000
10 Football Fields	120	45,600
School Football	15	60,000
North Football Stadium	Unlisted	Unlisted
4 Soccer Fields	66	3,000
1 Bowling Green	180	9,000
Field Days and Picnics	110	45,000
Fore River Club let other than to W. P. A. Recreation	48	5,040
Total	5,685	493,738

Expenditures

The expenditures of this department may be found in the Auditor's Report.

Vandalism

As in years past the havoc wrought by vandalism has been one of our major expenses in the spring. Locks broken, doors kicked in, windows broken, plumbing wrecked and torn out, wire ripped off backstops, flag halyards cut, and drinking fountains damaged, all necessitated the expenditure of money that could well have been used for real playground activities. It is hoped that in time the public can be educated that to destroy city property is a move against their own pocketbooks. With all this going on it seems impossible to catch the culprits and bring them to justice.

Conclusion

We acknowledge the magnificent spirit of cooperation evidenced by His Honor, the Mayor, the City Council, the Quincy Patriot Ledger, the Police and Fire Departments, the City Engineer's Department, Public Works Department, Manager of Parks and Playgrounds, Foreman of Parks, Park workers, Supervisor of Playgrounds, W. P. A. Recreation Project, Playground Instructors, members of all leagues sponsored by the Board, referees and umpires of all leagues, and any one who by act or deed has made the work of 1938 a pleasure. It is fitting that we should here record our appreciation and gratitude.

We are proud of our city, our citizenry, and our parks, and earnestly hope that this, the 50th Annual Report, will mark another milestone in the upward path.

Respectfully submitted,

BOARD OF PARK COMMISSIONERS.

WILLIAM M. TRUSSELLE, *Chairman*,
FRANK G. PRAY, *Secretary*,
EDMUND J. SAUNDERS.

Open Saturday, 9-12 A.M., 1-6, 7-9 P.M.

HOSPITAL SERVICE, Quincy City Hospital

Daily except Saturday, 1-6 P.M.

REPORT OF THE TRUSTEES

To His Honor, the Mayor of the City of Quincy:

The sixty-eighth annual report of the Trustees of the Thomas Crane Public Library is submitted herewith.

It is gratifying to report that there has been during the year 1938 an increase over the preceding year in the use made of the facilities offered our citizens by the library. As will be seen from the annual report of the librarian, there has been a decided gain in circulation. An increase of \$2,000 in the appropriation for books was doubtless a factor in bringing about this result.

Reference may also be had to the annual report of the librarian for the other routine work of the library and also to that part of his report which deals with the plans for the new building.

During the year the time, thought and energy of the trustees has been given chiefly to the new addition to the main library building. A very brief outline of the history of the library may be of interest at this time. Thomas Crane, for whom the library was given as a memorial, was born October 18, 1803 and died April 1, 1875, leaving his widow Clarissa Starkey Crane who died April 22, 1895 and his son Albert Crane who died September 21, 1918. The widow and son presented to the then Town of Quincy the main library which was dedicated May 30, 1882. In her will Clarissa Crane bequeathed to the library the Thomas Crane Endowment Fund. In 1908 Albert Crane, seeing that the original building was becoming crowded, caused to be constructed a substantial addition thereto which met the needs of the library for a good many years to come. In his will he bequeathed to the library the Crane Memorial Fund, part of which was used for the construction of the Parkway Branch at West Quincy and the Wollaston Branch at Wollaston. Other funds were also left in his will which in the last year or two have come into the possession of the library. These various funds are now being used towards the cost of construction of the new addition. The citizens of Quincy will always feel a deep sense of gratitude to the Crane family.

Quincy has been a fast growing city of homes and business activities and of late years, because of the ever growing needs of our patrons, the facilities of the library have been greatly congested and outgrown, thus making the additional building an absolute necessity. When the trustees had under consideration this addition, it was determined that it would be advisable to build on a larger scale if possible than that which the Crane family funds would provide for. Accordingly, it was decided to make application for an allotment of additional funds from the Federal Emergency Administration of Public Works. In due time this grant was made. Subsequently, the plans were enlarged to meet contemplated additional requirements and an additional grant was made by the Federal government. We now have under construction a \$200,000 building, 55% of the cost of which is paid out of Crane family funds and 45% by the Federal government. The trustees of the library and our citizens are deeply appreciative, not only for the grant of government funds, but also for the splendid co-operation and valuable assistance of all government officials and engineers in the efficient carrying out of the work. It is expected that the laying of the corner stone of the new building will take place this coming spring and that the building itself will be completed and be dedicated by October, 1939.

Henry H. Richardson was the architect of the present main library. The trustees commissioned Messrs. Paul A. Coletti and Carroll Coletti to draw the plans for and superintend the construction of the new building. They have devoted much thought and study to this important task in order that the new addition may harmonize with the Richardson structure in design and materials. Tornabene Brothers, the general contractors, are proceeding with the construction work in an efficient and expeditious manner. The trustees are especially grateful to Mayor Thomas S. Burgin for the kind interest and co-operation he has shown them.

A few words might be in order at this time as to the legal status of the library. It was incorporated by special act of the legislature on April 17, 1880, Chapter 202 of the Acts of 1880. Under the original act it was provided that the trustees should be elected in town meeting and that the town meeting should make an appropriation annually for the maintenance of the library. Under our city form of government, the Mayor appoints the trustees and the city council makes the annual appropriation.

The trustees take this opportunity to acknowledge again the efficient and loyal work of the librarian and members of the staff, and to thank the Mayor and members of the City Council for their valued support and co-operation.

Respectfully submitted,

GEORGE E. ADAMS, *Chairman,*
GEORGIANA CUSHING LANE,
Secretary.

REPORT OF THE LIBRARIAN

To the Trustees of the Thomas Crane Public Library:

During the past year, naturally much of the time of the librarian has been given to the plans for the New Adults' Reference and Children's Library now under construction, plans not only relating to its physical features, but also for its coordination into our present activities and their extension. Later on in this report, I intend to share with you some of my thoughts on this subject.

First, however, in regard to the work of the library for 1938, I am glad to report that the bottom of the steady decline in circulation since 1933 seems to have been reached. During 1938 we apparently started what we hope is the beginning of a steady upswing. The gain in home loans of books amounted to nearly 30,000 volumes and was shared by the main library and every branch. There was a gain of 380 in the number of borrowers registered. In connection with both circulation and registration, it is interesting to note that these increases were wholly in the adult departments. The reason for the falling off in use in the juvenile department is probably the same one which accounts for the noticeable decrease in enrollments in the elementary schools,—the fall in birthrate during the early depression years.

There were no changes in the location of branches during 1938. While all branches showed increased use, the gain at the Manet Branch at Houghs Neck has been so marked for the last few years that it was felt desirable to increase its hours open. This was done by adding five hours each on Tuesday and Thursday afternoons to the schedule. Miss Keniley, the Manet librarian, reports that this move has proved popular and is much appreciated. I sometimes wonder if the citizens of Quincy are sufficiently aware of the character and extent of the work done by the Thomas Crane Public Library in carrying on its library service at the Quincy City Hospital. The library provides all books, subscribes to a number of current magazines and employs the librarian who makes the rounds of the wards daily except Saturday; also issues books to nurses and members of the hospital staff. In 1938 a total of 15,725 books was loaned at the hospital, a gain of more than 1,000 over the previous year. The hospital board and superintendent cooperate by furnishing an adequate room for the librarian and are enthusiastic about its practical usefulness.

Mention was made in last year's report of some changes in the reference and information service which came about largely from suggestions made by Miss Callahan as a result of her attendance at the Adult Education Institute for Librarians in Chicago. Another similar institute was held at Simmons College last fall and was attended by Miss Callahan, Miss Gow and the librarian. From the knowledge gained there of the practical work done in this field in other libraries, it was felt worth while to experiment to the extent of instituting a readers' advisory service to take care of the needs of borrowers who desire more than simple information or references to books. Since October, Miss Callahan, Miss Gow and Mrs. Wilford have been on schedule during busy hours at a special desk located between the stacks and as far as can be judged in a three months' experiment, this new service is meeting a real need. Special lists of books have been prepared for borrowers and readers have been assisted in finding the exact books required. In addition, Miss Gow is attending meetings of the Quincy

Woman's Club with exhibits of books on the subjects of the programs.

It has been necessary during the past year to anticipate the opening of the new addition by preliminary work in the form of making a duplicate catalog of the books of non-fiction for use in that building. Miss DiBona and Miss Newton, both technically trained in this field, have thus been engaged since June and advantage is being taken of this opportunity to make desirable revisions in subject headings and to prepare a much needed authority list.

Changes in the personnel of the staff which come about through matrimony are always accepted with mingled feelings of regret and congratulation. It was for this reason that we lost the good service in the fall of Miss Mary Mills, librarian of the Mabel S. Baxter Branch, since 1933. Her successor, Miss Charlotte Stone, had been Miss Mills' assistant for an equal number of years. In order to take care of the extra amount of work necessitated in the building project, Miss Martha Mattson was added to the staff as typist and stenographer. Each year the Carnegie Institute School of Library Science, a graduate school, admits to its courses *one* student who may not be a college graduate, but whose experience, qualifications and recommendations indicate her to be worthy of the honor. Applications for the appointment come from all over the country. Last spring, Miss Dorothy Henrikson, hospital librarian on our staff, was notified that she had been selected as the special student for 1938-39 and, appreciative of the distinction of having this appointment come to a member of our staff, the trustees granted Miss Henrikson a year's leave of absence. Reports indicate that she is doing excellent work and meantime her place as hospital librarian is being taken by Miss Ruth Macdougall who is carrying on the work with enthusiasm.

The most outstanding feature in the progress of the library during the past year has been the actual start on the construction of the new addition to our main library building. Because the possibility of this enlargement has heretofore seemed indefinitely remote, I have purposely refrained in my annual reports from even mentioning how much it has been needed or how much of a handicap an outgrown building has been to our work. Now that the completion of the addition is only a few months away, I feel that it is desirable to point out some of the difficulties under which the library has been operating and to indicate how the old and the new buildings can be coordinated into one unit to more completely meet the requirements of a modern public library service and to provide for its future growth.

The Crane Memorial Library is generally accepted as the supreme achievement in the library field of one of America's greatest architects, Henry Hobson Richardson. To design the new addition to harmonize in treatment with this masterpiece presented a very interesting and somewhat difficult problem for the architects. How well they have solved it, I believe the general public will appreciate when the building is completed. The problem posed the librarian has been different but equally interesting and was concerned with plans for an interior arrangement to the end that an equally harmonious coordination of the various activities of the library might be effected.

I am certain that any professional librarian going over our building would immediately notice three obvious defects, — in-

adequate reading room and reference department facilities, an insufficiency of book shelves and stacks and the lack of any opportunity to increase them, and the wholly unsatisfactory and almost disgraceful congestion of the working quarters in an artificially lighted and poorly ventilated room in the basement. There is also the situation of the Children's Department. The purchase of the Dana house on Spear Street in 1932 and the removal of the Children's Department into it, did not mean that it was expected that that house would be its permanent home. While it served somewhat to relieve the situation and has provided an unusual and attractive library for the boys and girls, it is, naturally, not designed for the purpose for which it is used, has already reached its shelving capacity and has the disadvantage of being under another roof.

Taking it for granted that the new addition would provide sufficient space to overcome these drawbacks, the problem has been to decide what features of our work should go into the new building, what should be retained in the old, and how to coordinate these activities to secure the maximum of efficient service to the user of the library with the least possible interference with the functions of administration. Before any plans were drawn it was decided to carry over into the new building what may be called the specialized features of our work and make the main floor of the old building a general circulating library and to utilize the entire basement for working quarters.

Before describing the floor arrangement of the new building I want to say that while the plans carry out the ideas of the librarian, assisted by Miss Callahan, Miss Kingman and other members of the staff, in detail and finish they are entirely the work of the architects Paul and Carroll Coletti who have worked in closest cooperation and harmony with us and to whom most of the credit belongs.

On the main floor to the right of the lobby will be the large, well lighted Adults' Reference and Reading Room with shelving capacity for all of our reference books, including bound periodicals, and ample provision for future growth, with tables and chairs giving accommodations for eighty readers. This separation of the reference work from the circulation department is a consummation we have devoutly wished for, who have for so many years had to contend with the confusion incident to their being together in one room. In the rear of the lobby is the Art and Technical Room in which will be found an open shelf collection of books on these subjects and seating accommodation for twenty-four readers. The lobby will contain the catalogues and charging desk and on its left a stack room for the overflow of books on art, technology and the like and for other books not needed on open shelves. This floor will also contain the offices of the librarian and assistant librarian and a special Historical Room, with a fireproof vault for the preservation of important research material impossible to replace.

Directly under the Adults' Reference Room and of the same size, but with the entrance from Washington Street, will be the Children's Room, separation of the older from the younger children being effected by sections of seven feet high shelving down the center. The loan desk is well placed to be out of drafts and to give adequate supervision. Provision has been made on this

floor for an office and a work room for the children's librarian and for a modern staff room, something long needed.

The innovation which will perhaps be of greatest interest to many people is the combined Lecture and Exhibit Room on the ground floor. This is a popular feature in many public libraries and the scarcity of any halls or rooms in Quincy suitable for group meetings or for exhibits make the inclusion of this room desirable. It will also afford the library opportunity, never before available, for carrying on story hours, book talks and other programs of an educational nature.

At the left of the entrance to the main floor will be a stairway leading to another "consummation devoutly to be wished", the Music Room, which will contain not only our excellent collection of books of and about music, but has provision for sound-proof booths for phonographs and shelving for records.

In rough outline I have indicated the main features of the new addition. Except for a necessary relocation of the catalogues and magazine cases, the main floor of the old building will remain unchanged. The removal of the Art and Technical Departments will provide in the so-called X room not only more hygienic working quarters, but permit a more efficient routine in the various processes of preparing books for the shelves. I should add that the two buildings will be connected by corridors on both the main and ground floors.

While we have been working on the plans, we have not been unmindful of the responsibility which the enlarged library building entails, nor of the opportunity it presents. In the report of the first Board of Trustees for 1871, the year the library was founded, occurs this sentence "whether it (the library) will prove the blessing anticipated by its friends will depend upon its proper use." Ten years later when Mr. Albert Crane and his mother erected the Crane Memorial Building, they must have had faith that this anticipation was being realized. That Mr. Crane still believed in it, he showed by providing the funds for its extension in 1908. That he never lost that faith, he proved by providing in his will that eventually a very considerable part of his estate should come to the Thomas Crane Public Library. It is these funds supplemented by those of the Federal Government which are making possible the enlargement of the library. It is the responsibility of the trustees, librarian and staff to see that that faith will be justified, to give their best thoughts and efforts that it may continue to be the "blessing anticipated" by its founders. And it is the responsibility of the citizens of Quincy to accept the obligation and justify the faith of Mr. Crane by providing the books and the service (and again I quote from that first report) "to keep the library on a line with the requirements of the time."

The opportunities which the enlargement of the building will afford are many. Some of them can be read between the lines in my description of the plans. While the "blessings" of the library are often intangible, incapable of being mathematically demonstrated, many times they do have a practical dollars and cents value, capable of being proved. It is along that line that we expect the extension of our facilities to provide opportunity for better service. We have in mind the acquisition of more material in our reference department on business, industry and investment, the strengthening of our collection on technical and scientific sub-

jects, adding more books on trades, and other occupations,—all this to make the library more useful to business man and worker alike. To enumerate other opportunities would carry this report to an unreasonable length.

Before closing this report, I want to suggest an opportunity that is open to interested public spirited citizens to assist in increasing the usefulness of the Thomas Crane Public Library through gifts or endowments. The beneficence of Mr. Albert Crane, to whom we owe not only the Crane Memorial Building but also the Wollaston and Parkway Branches, has made the city an eternal debtor to his memory. Are there not some citizens in Quincy who would like to perpetuate the memory of some revered member of their family by establishing a fund for the purchase of books on some particular line. We have the Alice G. White Fund, the income only of which is used to purchase books on music. I can think of several libraries which have funds for art books and another library in a city, the chief industry of which is shoes, has an endowment fund for the purchase of books on that subject. Books on shipbuilding are most useful here, but they are usually expensive and the annual book appropriation does not allow more than a minimum allotment to such purchase, and there are other special fields for which funds would be most helpful. If there are any persons who are interested in this suggestion, the librarian would be pleased to discuss the matter with them.

The year 1938 has been a very busy one for the trustees, librarian and staff. Much important work has been done by all in connection with the new building, but no one is in a better position than I to testify to the heavy burden which necessarily fell on the shoulders of your Chairman, Colonel Adams. He has given freely an immense amount of time and thought to the many problems which came up both before and after construction started, and it is largely due to his foresight, his tact and good judgment that the whole project is on its way to successful achievement.

In conclusion I want to thank you all for help given and confidence manifested during the year and to express to the members of the staff my appreciation of their devotion to the library and their cooperation in the year's work.

Respectfully submitted,

GALEN W. HILL,
Librarian.

Statistical Summary

Population served, 71,956 (1930 census).	
Free for lending and reference.

REPORT OF THE SCHOOL COMMITTEE

To the Citizens of Quincy:

Your School Committee submits the following report for the year 1938.

The first business that engaged the Committee was the preparation of its budget for 1938, and in this connection, the Committee, taking cognizance of the probable effect of the business recession on City Finances, resolved that no increases be made in salaries except regular automatic increases. The budget submitted to the Mayor amounted to \$1,274,772.

Several important improvements were made in the school plant during the year:

The locker rooms and shower facilities in the North Quincy High School were extensively altered, the work being done under the direct charge of the School Committee with most satisfactory results.

The general shops in the Central Junior High School were completely renovated and much new equipment installed.

New portable bleachers were installed in the gymnasium at the Quincy Point Junior High School.

The yards at the Squantum and Montclair Schools were completely resurfaced with ameisite.

A complete check-up was made of safety and fire prevention devices in all of the schools, and substantial improvements were made to the fire alarm systems with the result that these are now thoroughly modern.

Various items of new equipment were installed for the Home Economics courses in the various schools.

Other customary repairs necessary for the upkeep of the school buildings were made.

As there was an overcrowded situation in the Trade School, and the Administration quarters were also inadequate, with a need for more satisfactory office facilities for the supervisory staff, the Mayor was requested to obtain preliminary plans for both these projects and to obtain from the City Council authorization to make application for a P. W. A. grant.

The Rules and Regulations of the School Committee were amended to the effect that the "No School" signal should apply to teachers in the schools affected by the "No School" signal.

The Committee adopted a plan for Cumulative Sick Leave Allowance for the custodians similar to that already allowed for the teachers. ,

The School Committee also voted that under the supervision of Miss Howes emblems be awarded to the members of the High School bands and orchestras.

On February 18 appropriate and impressive exercises were held dedicating the Nathaniel S. Hunting School in honor of the late Dr. Nathaniel S. Hunting, for thirty-six years a member of the School Committee.

Plaques were unveiled at the Quincy School in memory of Miss Ellen D. Granahan, and at the John Hancock School in memory of Miss Mary Parker, both of whom served loyally as teachers in their respective buildings.

The construction of the Municipal Stadium at Merrymount Park has provided increased facilities for the more largely attended athletic contests. The splendid facilities of the stadium will permit, and we hope encourage, a larger interest on the part of the community in the athletic activities of the schools.

Pursuant to an act of the Legislature, plans have been adopted which will permit teaching the Italian language in the Quincy Schools upon a suitable request and the enrollment of not less than twenty-five properly qualified pupils.

An additional instructor in Sheet Metal Work was added to the teaching staff of the Trade School.

We wish to thank Mr. Muir, Miss Nilsen, and the school staff for their assistance to the Committee. The splendid results obtained are due to their efficient co-operation. We wish, also, to commend the Mayor and the Vice-Chairman for their courtesy and tact in presiding at the meetings of the School Committee.

We cannot conclude without a word of appreciation to the loyal teachers and principals, not forgetting the custodians, who have made our system one of which we are duly proud.

The foregoing report was prepared by a special committee consisting of Mr. Joseph J. Kendrick and Mrs. Esther V. Purcell and was adopted as the report of the School Committee for the Year 1938.

REPORT OF THE SUPERINTENDENT OF SCHOOLS

To the School Committee of Quincy:

In keeping with our usual custom, the Superintendent has endeavored over a period of twelve years to bring to the School Committee and citizens of Quincy the broadest possible understanding of the present day practices and problems of the school system. The annual report is one of the mediums serving this purpose. In doing this it should serve the interest of all.

At the outset permit me to quote the first two paragraphs from my annual report for the year 1937:

"It has been my personal desire to organize, coordinate and harmonize every unit of the Quincy school system into a united whole. Eleven years ago sectionalism in the Quincy school system was strong. I did not hesitate to emphasize that I knew no section; I knew no Wollaston or Adams Shore or Quincy Point or West Quincy, or South Quincy, as such. It was all Quincy to me. At the general teachers' meetings as well as principals' meetings, I stated that we must look at the school system in its entirety, and toward that end the school system has been set up and directed. The policies and procedures, the program of studies, the special provisions and services have all been established on a school system basis. This makes for fairness in the community and for efficiency in the educational administration. Individual school units and individual members of the school system are encouraged by the Superintendent of Schools to make the greatest possible contribution.

"There are those on the staff who want to work, to create, to do, to inspire, to initiate constructive school work. There is abundant initiative and energy ready to assume any intelligent step forward which contributes to the progress of the entire school system. Men and women of unusual ability are willing to assume the risk to continue to blaze the trail if their initiative, energy, vision and industry, which have resulted in the progress of the entire school system, are given recognition. We should take care to reward the faithful, conscientious, energetic workers rather than those who strive for popularity."

The building of a real school system is the result of positive thinking and constructive action. It requires positive thinking, constructive planning, genuine initiative and personal energy, with a will to act and to do something positive. The Superintendent has given freely of these qualities. It has been done without fear or favor during the past twelve years. In no case did he consider what was the popular thing to do providing he was convinced it was the right thing to do.

When we speak of art, music, visual aids, guidance and research, health education, college preparatory courses, commercial courses, we say that they are outstanding. They are so recognized by educators who visit the school system and are in a position to know. All of these have received their impetus and backing from the same source.

The departments of music, art, home economics and physical education were terribly handicapped twelve years ago because they were not sufficiently staffed and organized on a school system basis. The health department, so-called, was a disorganized unit. There was no tie-up between medical service and physical education. There was no health education as it is now known in its modern sense. There were no visual aids, no guidance and research. Now we have all of these comparable with the best in America.

The value of the above is rendered evident by the character and type of young man and young woman that we are attempting to produce, which is the only antidote for this troubled world.

Were it not for the children, we would need no school janitors, no teachers, no principals, no supervisors, no superintendent, no school committee. Every activity carries its own virtue and its own value. There may be relative values. Basketball is no more a character-building sport than is track or hockey or soccer or tennis and other activities I could mention, and for any group to single out any activity for popular acclaim from a great school system is unethical, and demoralizing to the esprit de corps of the whole school system. Let us not forget that the Superintendent represents all the children of all the people, but no more so than you do. You are the chosen representatives of the people, the friends of education. If you are friends of education—and you have told the voters that you are—you will permit those that are trained in their several fields to administer these fields in education. If their policies are sound, they should be upheld by this committee for the general welfare of the entire school system; if they are unsound, we should have a chance to know why. What I am trying to do is to ask the School Committee to permit the outstanding features of public school education to go forward rather than to be hampered.

Net Enrollment

I am submitting to you the net enrollment as part of my report. I consider this information of great value to the Committee and to the school officials. It shows the exact enrollment for the past twelve years on the first Monday after the opening of school, or a week after Labor Day. If you scrutinize it closely, it will answer many questions for you. It shows you the shift in school population. It will permit you to compare the school population for the past twelve years for any school in the system, and should offer data to you to answer a great many questions that are asked by parents and others interested in our schools. You will also note that the Quincy High School reached its peak in 1931, that North Quincy reached its peak in 1934, and that the junior schools remained fairly constant after their organization. There is a marked decrease in the elementary schools. This will in a few years' time show up in the junior and high schools, all other factors being equal. That is, as these grades move to higher levels, the enrollment will be less.

Meetings

It may be of information to you to know that there were thirty-two School Committee meetings held during the year 1938—eleven regular meetings, sixteen special meetings, four conferences and one organization meeting, and a great many sub-committee meetings. These meetings entail a great deal of detail work for the Superintendent of Schools because, as you will see from a resume of your

minutes, most of the meetings were taken up with practically everything but education, that thing for which the schools really exist. I realize that some time must be given to the various business items, but some of the time should be given over to education.

In addition to the meetings of the School Committee, the Superintendent has held a great many meetings with the principals, teachers, various groups of committees of teachers, dietitians, librarians, the supervisory force, many individual conferences, and has appeared at parent-teacher and other meetings. These are some of the extra activities that take up the Superintendent's time and attention, and rightly so.

Let me give you a few excerpts from the notes of one of the meetings of the principals at which we took up the achievement tests and the use of test results:

"All principals should see that maximum use is made of test results; that is, teachers of arithmetic not only should know the ratings of all their pupils in arithmetic reasoning and fundamentals and see these against a background of their total grade placement, but the teacher should study the arithmetic section of the test in detail and determine wherein the specific arithmetic difficulties lie in the individual cases.

"All teachers should familiarize themselves with the mental ratings in order to determine the extent to which pupils in their classroom performances are measuring up to their several abilities.

"If our teaching is to be economical and effective, the teacher must make use of all available information relative to the present status of the pupils in the subject which she is to teach them.

"If we are to develop proper work habits, we must begin in the primary grades."

The subject of test results was also emphasized at the fifth and sixth grade meetings to which the principals were invited.

The emphasis at the present time is largely on correcting the weaknesses of certain children, but the results of the tests are also an exceptionally fine thermometer to show principals and teachers that we are not sufficiently challenging the ingenuity and building up the work habits of the brighter children; that is, we believe that every child should be trained to work to the maximum of his several abilities, and these test results are a means of getting at the facts.

These tests show invariably where we are weak and where we are strong. They also help us to know what we should do. The tests have helped us to increase our efficiency in the fundamentals, so much so that there is a gradual increase in the norm of the city as a whole.

Here are a few facts taken from Mr. Cochrane's report to me after the achievement tests were given this fall that must of necessity be of interest to you. These tests have been given to the pupils for the past decade and have been the means of the school system securing some pertinent facts.

"It is now possible for us to compare the relative rank of the schools as they were in grade 1 in 1933 and as they are in grade

5 in 1938. One of the astonishing facts for the city as a whole is that only 47.2% of the present pupils in the fifth grade were members of the group in the same school when it was the first grade in 1933. For most of the schools the per cent of pupils in the fifth grade who started in the same school in grade 1 is in the vicinity of fifty per cent. The highest percentage of pupils who started with the grade in its first year of school life was in the Quincy School which has retained 66.2% of its 1933 first graders. In the Coddington School only 30% of the present fifth grade pupils were members of the class as first graders in 1933. Such a shifting of the school population greatly handicaps the best educational handling of the children, particularly in the field of educational guidance."

Speaking of the extra-curricular activities at a principals' meeting, the Superintendent made the following statements:

"The fundamental principle underlying all school activities is that they must definitely contribute to the educational program and that there must be obtained from each activity maximum educational values, otherwise we are not justified in maintaining them.

"Our total expenses represent the cost of the entire school program. It is essential that one part of the program be as economical and as effective and as carefully supervised as the other."

We are now studying this phase of our school program.

During the month of October, we held grade meetings in all of the elementary grades. At these meetings we discussed the daily preparation of all subjects and emphasized the fundamentals — reading, penmanship and arithmetic. We laid particular stress on the use of the dictionary as the guide to pronunciation and meaning of words in the fourth, fifth and sixth grades. In the sixth grade we emphasized that the teachers should use the test results, otherwise the tests would be of little or no value.

At these meetings I emphasized the importance of getting a standard of good habits of work into the minds of the children from the very beginning.

Permit me to bring to your attention a special conference held at the North Quincy High School, at which were present the principal, the head counselor, dietitian, and several heads of departments. I emphasized that the school is not a college preparatory school, a commercial school, or a home economics school, as such; that it is a cosmopolitan high school in which various courses are offered, and that any child who lives in that district, of the proper age, who has passed through the sixth grade, is entitled to enter that school. It is the business of the school officials to employ teachers to teach children. I definitely stated that we must adapt our work to the ability of the children. We should see that the pupil with ten talents works to the maximum of his several abilities and that we are just as much obliged to see that the child with six talents works to the maximum of his abilities. We cannot exclude the child with six talents and select the child with ten talents. This is a public school system. The only remnant of democratic society that is left is the public school.

American Education Week

The program this year centered around the general theme—*Education for Tomorrow's America*. The twentieth anniversary of the signing of the Armistice and the fiftieth anniversary of the founding of the City of Quincy gave an unusual setting for patriotic and historical programs. There were some very unusual and outstanding programs during the week. The parents, the teachers and the pupils joined in consideration of their schools. Approximately 8,000 people visited the schools during that week; that is, the parents and their friends responded exceedingly well to the call of the principals to visit the schools. Commander Powers of the American Legion together with the vice-commander met with the Superintendent of Schools and outlined a method of procedure whereby a few speakers would go to the junior and high schools. This was a great improvement over last year's program. They sent us good speakers. Each speaker had something to say and knew how to say it. They had a good message for the pupils.

Combined Commencement

On the evening of Tuesday, April 24, 1934, the matter of high school commencement was discussed by the School Committee. It was the sense of the Committee at that time that there should be a change in the type of commencement. The Committee favored a combined open-air commencement of the graduates of the two high schools. On motion by Mrs. Nichols, seconded by Mr. Robert Foy, it was voted unanimously that two members of the Committee be appointed by the Chair to confer with the Superintendent and the principals of the North Quincy and the Quincy High schools. The Chair appointed Mr. Kendrick and Mrs. Nichols from the School Committee.

On Tuesday evening, May 29, 1934, Mrs. Nichols reported for the sub-committee regarding the commencement plans and stated that the schools felt, after consulting the pupils, that they would prefer separate commencement exercises. The special committee recommended that two commencement exercises be held as is the custom up to the present time.

I have been asked several times concerning an open-air and joint commencement of the two high schools. I proposed then and I am proposing now that the School Committee consider a joint commencement. If you wish me to set the stage for a new, modern commencement to take the place of the traditional, I am perfectly willing to accept that responsibility. I am offering this to you in plenty of time that you may discuss the pros and cons before finally voting.

Home Economics

Improved processes and swiftly changing public tastes impose new problems upon the public schools. The Superintendent is the responsible person to whom the public looks to keep awake and alive to the public demands. His only salvation is an open mind. The closed mind is a tomb in which hope and progress are both buried. He who would keep alive must keep the windows of his mind open. There is nothing more hopeless than a method that has ceased to get results. We are constantly widening our services by adapting our offerings to individual needs. We as individuals must yield to progress if we are to survive.

The work in home economics in the Quincy public schools compares most favorably with that of other school systems. We have done many fine things in this department and much remains to be done. In the newer buildings we have splendid equipment. Central Junior High School, being the first to take up home economics, the equipment is old and much of it is worn out and needs replenishing. The home economics department in the Quincy High School needs additional equipment if we are to serve the needs of the young women who are now taking that work and many others who should and would take the courses under better working conditions. Some of the equipment is old and some obsolete and should be replaced with new and up-to-date equipment. We must see the situation as it is and meet the growing needs of the pupils.

The courses of study are modern. To keep them so changes are constantly being made. The work cannot be properly taught without the necessary equipment. One of our great dangers, and it confronts us daily, is the lure of the "good enough". Another problem confronting the school system is the cafeteria situation at the Central Junior High School. This has been brought to the attention of the Committee on several occasions. If we cannot have new quarters for the cafeteria at that building, we should give our best efforts to improving the old. The equipment is inadequate and obsolete and should be replaced by new and up-to-date equipment.

Shop Work for Boys in the Quincy High School

The shop work for boys at the Quincy High School is outmoded. Both the equipment and program needs our immediate attention. The junior schools which feed into Quincy High School have modern shops and splendid equipment. The elements of several trades are taught in the junior high schools which give the boys an opportunity to explore their talents. When these same boys come to the Quincy High School and select the Civic curriculum their shop work is confined largely to woodwork. This is dull and uninteresting unless they have a liking for woodwork. Many of the boys at the Quincy High School would take greater interest in shop work, in fact they are eager to get it, but before they do we must modernize the shop facilities.

I recommend that the School Committee give these items their earnest consideration.

I would like to put out an annual report depicting the school life, this report to be an entirely separate report from the traditional and statistical. It would have suitable illustrations for popular consumption. It would serve the same purpose that the film, "The Quincy Schools at Work" has served. I am asking your consideration on this project.

Commercial Work

There are 316 typewriters in the Commercial Department as of December, 1937. The life of the typewriter which is used six or seven periods a day by a different pupil each period is three years. At the end of three years we make an exchange. The exchange price in this time limit is \$30 a machine. It costs \$10 a year to keep typewriters in good condition and without extra expense during the three year term after the original machine has been purchased.

Some of the larger machines are becoming obsolete and need to be replaced. This costs money, but it costs more money to continue to repair worn-out machines, such as calculating, billing and transcribing machines. These have been in use in Quincy High School for the past ten years and some were second-hand when we purchased them. In addition to this, to do efficient work in this department, we need additional and new machines.

At the present time our commercial department is rated as one of the very best. Let us continue to keep it so. It is not only economical, therefore, but good business to keep our equipment up-to-date. I commend this to your careful consideration.

Improvements

The School Committee has made several improvements during the year in the school plant which have meant much for the health, protection and safety of the children of the public schools.

The renovation of the showers and locker rooms at the North Quincy High School, the fixing up of the large ground floor room for the new body mechanics room, and the remodeling of the health service room have made for greater efficiency.

The bleachers that the Committee installed at the Quincy Point Junior High School were a great improvement in that school.

Many of the playgrounds were surfaced and some resurfaced and fenced.

The remodeling of the shops at Central Junior High School was a great improvement. It has given us an opportunity to modernize the shop work and has given the boys at Central Junior High School an equal opportunity with boys in like courses in the other junior high schools. They now have an up-to-date equipped shop comparable with the other junior high schools of the city.

The report of the Director of Health Education contains valuable data and will be printed in full in the Annual Report.

Conclusion

We continue to be grateful to all those who have done their work well and have helped to make the year a successful one.

Respectfully,

JAMES N. MUIR

Superintendent of Schools.

Jan. 31, 1939

REPORT OF THE ASSISTANT SUPERINTENDENT OF SCHOOLS

MR. JAMES N. MUIR, *Superintendent of Schools,
Quincy, Massachusetts*

MY DEAR MR. MUIR:

I submit the following report on the Trade School, Continuation School, Evening Classes, Evening Vocational Classes, Standardized Tests, Mentally Retarded Children and Special Classes.

The Day Trade School

Vocational Education is moving forward with great rapidity all over the United States. Quincy shows the general trend. The number of students enrolled in the Trade School would have been much larger had there been available space to accommodate the pupils who desired to enroll and teachers to take care of them.

The cooperative efforts of the Advisory Committee and the School Committee to obtain an addition to the Trade School building are greatly appreciated. If Quincy is to meet the demand for vocational education, more room must be provided.

By using federal funds a new teacher was employed in the machine department beginning February 1, 1938 and a new instructor in the sheet metal department began September 1, 1938.

There is still a large number of applicants on the waiting list but in most departments boys can now be enrolled only when other pupils graduate or withdraw from the school. The actual membership on November 23 (the last date for which comparative figures are available) was 258, an increase of 13.6% over the membership figure of November 24, 1937. The Trade School increased its membership while the North Quincy High and Quincy High Schools decreased their membership.

The table below shows comparative enrollment figures for the last five years:

	1933-34		1934-35		1935-36		1936-37		1937-38	
	Enrol.	Av. Mem.	Enrol.	Av. Mem.	Enrol.	Av. Mem.	Enrol.	Av. Mem.	Enrol.	Av. Mem.
Auto Mechanics.....	75	53.43	85	58.88	77	54.52	79	54.00	79	55.06
Electrical.....	41	32.92	47	35.42	44	37.63	43	36.13	42	35.27
Machine.....	22	15.56	21	18.40	20	17.26	21	17.28	34	26.97
Machine (Co-operative).....	2	1.	1	.10
Plumbing.....	43	34.69	52	34.14	48	34.27	47	34.94	39	34.76
Sheet Metal.....	23	16.78	25	18.42	22	17.81	21	17.53	19	18.71
Woodworking.....	68	54.62	68	56.84	75	55.14	78	54.08	74	48.54
Total Enrollment	274		299		286		289		287	
Total Average Membership.....		209.00		222.20		216.63		213.96		219.31

The figures for 1934-35 are misleading. During that year we tried to accommodate the large number of applicants by increasing the number of boys allotted per teacher in shop and class. It was an unwise move giving rise to so many additional problems that the membership had to be decreased. Even now the wisdom of the large enrollment in some departments is questionable.

The continued growth of the school and the addition of two more classes has made a teaching load in the subjects taught by the Director impossible for one man to carry. In some departments the teacher of related work has been qualified to teach English and Civics but in most cases since the related work teachers were employed primarily for their trade experience they are not qualified to teach academic subjects like English and Civics. Also it is unwise to expect any teacher to teach steadily for seven hours a day as after a long period the quality of teaching will deteriorate.

The administrative duties have also increased so that Mr. Webster, the Director, is being asked to do tasks beyond the limit of one man's ability. He just cannot be in the classroom teaching, or in the office handling an administrative problem, or about the building supervising at the same time and he cannot teach successfully in two rooms at the same time. The related classrooms are so small that in most cases it is impossible to combine the classes of two departments in academic subjects.

The total cost of running the school for the school year 1937-38 increased slightly to \$46,352.48. With the increased enrollment, particularly from February 1, 1938 on, insufficient money was spent to give the quality of instruction to which the students are entitled. Actually the net cost was less than it was the previous year as the table below will show:

	1936-37	1937-38
Tuition for non-residents	\$10,952.06	\$11,504.02
Cash for products made in the school.....	783.47	726.11
Aid from the Federal Government.....	1,842.31	3,926.67
Aid from the State of Massachusetts	14,834.28	13,606.12
Miscellaneous receipts	138.90	29.25
Total Receipts	\$28,551.02	\$29,792.17
Net cost to City of Quincy	17,005.42	16,569.31

Ever since 1933, due to reduced appropriations, the Trade School has been neglecting to replace worn out and obsolete tools and equipment at an economical rate. Eventually it will cost more to equip the school with up-to-date modern tools, etc. or the boys will receive training with equipment no longer used in industry.

The Continuation School

The table below shows the Continuation School situation for the last ten years.

	1928 1929	1929 1930	1930 1931	1931 1932	1932 1933	1933 1934	1934 1935	1935 1936	1936 1937	1937 1938
Boys	82	72	45	29	13
Girls	65	54	47	42	32	24	25	18	9	9
Total	147	126	92	71	45	24	25	18	9	9
Hours of Service	7996	7148	6132	4056	2208	1524	1560	896	392	360

Although nine different girls were enrolled there were four or less in all but one month. These girls are guided and helped by coming to junior high school one day a week on the day when they can obtain cooking and sewing. Once in a while a different adjustment has to be made to take care of a girl who is doing other than housework.

Practically all costs of the Continuation School are pro-rated charges and would go on even if there was no so called Continuation School. As it is, the city receives a few hundred dollars it would not otherwise have and the few girls between fourteen and sixteen years of age who must leave school to work continue to receive guidance and help from the school.

The total pro-rated charge to the Continuation School for the school year 1937-38 amounted to \$639.50. From the State and Federal Governments Quincy received \$371.75 making the net cost only \$267.75.

Evening Classes

The following table will show that the Evening Academic Classes from October to December 6, 1938 were almost the same as for the same period in 1937.

The total enrollment of 1938 was 73 pupils less than that of 1937 but the average membership was 42 pupils better.

Mechanical Drawing	80
Grammar School Arithmetic	46
Grammar School English	66
Elementary Typewriting	272
Intermediate Typewriting	114
Advanced Typewriting	114
Elementary Stenography	169
Intermediate Stenography	68
Advanced Stenography	89
Intermediate Business English	102
Advanced Business English	200
Intermediate Business Arithmetic	55
Advanced Business Arithmetic	148
Classes for Adult Aliens in English and Citizenship	173

The evening school curriculum should be enlarged, but not at the expense of the day school pupils. Until the City Council ceases cutting the school budget it does not seem wise to start courses in October of one year that we might be unable to pay for in the next year. Evening classes are discontinued for the winter before the Council has passed the budget and adjustments of the Evening School program to the budget can only be made in the ten week term from October first to Christmas.

The enrollment of adult aliens in English and Citizenship was 173, eighteen less than the enrollment in the fall of 1937. Since evening classes were resumed in 1935, only one-third as many aliens have attended evening classes as attended similar classes in 1933. If classes were held in the Quincy Point Junior High School and the South Junior High School as was done before the depression, more aliens would probably enroll.

We should be reaching a larger number of the foreign born in Quincy with an evening program leading toward good citizenship. It is not a question of educating or not educating them—those not enrolled in school are being educated by someone. It is a question of good education versus bad education. The community must accept the responsibility of educating the adult alien in properly organized classes, which cost money, or not complaining when the uneducated alien does not react properly to our democratic form of government.

Evening Vocational Classes

The Evening Vocational Classes always offer a difficult problem to solve. Electrical Code classes and Plumbing classes started in the fall of 1937 were discontinued in January, 1938, because of small attendance and insufficient registrations were received to open these classes in October although a Plumbing class was opened later.

The following table shows the enrollment and membership for the fall of 1937 and the fall of 1938.

	Fall 1937		Fall 1938	
	Enrol.	Av. Mem.	Enrol.	Av. Mem.
Auto Mechanics	20	15.4	18	16.55
Electrical Code	32	18.3
Machine Shop Practice	35	29.28	39	29.2
Plumbing	29	17.65	20	14.42
Sheet Metal Drafting	25	19.3	50	39.4
Display:				
Window and Interior	53	49.44

The Auto Mechanics and Plumbing classes were not started until late because of lack of interest while Machine Shop Work and Sheet Metal Drafting are increasingly popular. The money saved by not having classes in Electrical work was used to pay for another instructor in Sheet Metal Drafting. More men would have been enrolled in both Machine Shop Practice and Sheet Metal Drafting if we had had better facilities and more money to pay for instruction.

The evening class in Display was started at the request of the Quincy Chamber of Commerce and was made possible by the use of Federal and State funds which by new legislation can be used for Evening Extension classes in the Distributive Trades. For this class Quincy will pay about one-fourth of the cost, the State about one-fourth and the Federal government about one-half of the cost.

It is difficult to anticipate the full needs of Evening Vocational classes. On the basis of the enrollment in the fall of 1937 and the attendance up to Christmas, funds to provide for six evening classes seemed to be ample. Actually in the fall of 1938, ten classes were opened and other classes in Machine Shop Practice and Sheet Metal Drafting could have been filled.

The total cost of the Evening Vocational classes for the school year 1937-38 was \$1,077.58. The State reimbursed the City for this

work to the extent of \$481.59 and \$114.40 was collected for tuition making the net cost to the city \$481.59.

Twenty-five men were enrolled in Boston Trade Extension and Apprenticeship Classes during the fall. Fourteen were enrolled in electrical work divided among classes in alternating current, direct current, and code work. The other eleven men were scattered among classes in nine different trades.

Standardized Tests, Mentally Retarded Children and Special Classes

The use of standardized tests has become one of the best means of discovering mentally retarded pupils. Present plans call for the use of group intelligence tests every year in grades one and six and the group testing for intelligence of children in any other grades from two to twelve inclusive for whom there is no intelligence quotient on file.

Standardized achievement tests have been given in grades four to nine inclusive and beginning next spring will be given annually in May in grades three to nine. Detailed reports have already been given to all interested in the results of the standardized tests. The most recent tests indicate very clearly that better teaching has grown out of the use of standardized tests.

One hundred eighteen pupils were referred to clinics for individual examination to ascertain their intelligence. Many more children were referred to the Habit Clinic and Guidance Clinic but for other purposes than obtaining an intelligence quotient. The following table shows the broad general findings as to mentality.

Name of Clinic	Broad Findings as to Mentality				
	Normal or Better	Dull Normal	Three years or more mentally retarded	Case Incomplete	Total Referred
Wrentham Traveling Clinic	7	27	53	87
Habit	5	5	7	17
Guidance	2	9	1	12
Other Clinics	2	2
Totals	12	34	71	1	118

Although fewer children were referred to clinics because of suspected mental retardation they were selected with more discernment.

On December 1, 1938, there were 231 children in the Quincy Public Schools with intelligence quotients of .78 or lower which means that they are or will be three or more years mentally retarded. One hundred fifty-four of the 231 were in special classes as follows:

Opportunity Class for older boys	36
Opportunity Class for older girls	18
Six Ungraded Opportunity Classes	100

Forty-seven of the seventy-seven mentally retarded children not in special classes are in various secondary schools. All of the forty-seven are overage for the grade in which they are located but because of many other factors are adjusting fairly well and are getting great benefits from their social contacts and the discipline of the school.

Thirty known mentally retarded pupils are scattered among the regular classes in nine elementary schools. Many of the thirty should be in a special class but the thirty are so scattered that it is impossible to get a dozen of them within a reasonable walking distance of any one school. All the opportunity classes we now have are filled to capacity so we could not take care of them by transportation with the present number of classes. Most of the retarded children in the elementary schools not placed in special classes are too young to travel by bus or trolley without supervision.

Physically Handicapped Children

By State law every community is required to annually ascertain the number of children of school age and resident therein who are physically handicapped and, if there are five or more children so physically handicapped as to make attendance at a public school not feasible, the School Committee must provide for instruction at home or at such places as the committee may arrange.

In accordance with the laws Quincy during the school year 1937-38 provided for the instruction of eighteen children in a class for handicapped children at the Thomas B. Pollard School and sent teachers to the homes of fifteen children. Nine of the handicapped children were able to return to the regular schools in the fall of 1938. In December 1938 there were twenty-four children in the class for handicapped children and eleven receiving home instruction.

Before a child is admitted to the class for handicapped children or allowed to receive home instruction, a certificate, signed by a physician or the social worker of a hospital, is required, showing that regular school attendance is not feasible. In most cases one of the school nurses visits the home of the handicapped child and when doubt exists as to the proper placement of a handicapped child the Director of Health Education, Mr. Carter, discusses the matter with the child's physician.

Most of the handicapped children receiving either home instruction or who are transported to the class for handicapped children are suffering from various heart ailments or are victims of infantile paralysis. This office and the state supervisor of handicapped children agree that it is not the intent of the law that children suffering from sprains, bone fractures, or convalescing from operations receive home instruction or be transported to school.

No child is changed from home instruction to the class for handicapped children or to regular school attendance or from the handicapped class to the regular school without the approval of the attending physician. Children in the class attend from two to five hours per day—the time depending on the recommendations of the physician and the exigencies of transportation. Handicapped children receiving home instruction receive three hours of personal instruction per week with the visiting teacher assigning work to be done at such times as the condition of the pupil will allow.

As far as I know, Quincy is the only community in Massachusetts transporting and teaching the larger per cent of its handicapped children in a special class. The class has received very favorable comment from the state supervisor of handicapped children who has urged other communities to follow Quincy's example. The success of this class is largely due to the wise guidance of its teacher, Mildred B. Frye, who brings to this work unusual qualifications and the painstaking care with which Mrs. Marcus Wight transports the children.

At the present time the twenty-four children in the class represent all grades from two to eleven inclusive. If more children representing other grades become candidates for instruction in this class it would be doubtful if one teacher could continue to give adequate instruction to so many children over so diversified a range.

The scarlet fever epidemic of last year left many children in a physical condition which forbade regular school attendance and thus increased the enrollment in the handicapped class. It is hoped that the number of handicapped children in Quincy has reached its peak and that time will bring about a decreased rather than an increased enrollment.

Many individuals and organizations in Quincy have given time and money to make the lives of these children happier and more comfortable for which all who are responsible for them are very grateful. The establishment of this class in 1935 is an act for which the Superintendent of Schools and the School Committee may well be proud.

Respectfully submitted,

ALBERT H. COCHRANE,
Assistant Superintendent of Schools.

REPORT OF THE DIRECTOR OF HEALTH EDUCATION

MR. JAMES N. MUIR, *Superintendent of Schools, Quincy, Mass.*

MY DEAR MR. MUIR:

Following is a report of the work done in the Health Education Department for the year 1938.

During the early part of the year we experienced the worse Scarlet Fever epidemic in the history of Quincy. All members of the health education staff made every effort to protect the large number of children in the schools and often were the "target" for irate parents who failed to realize that extraordinary precaution was necessary during this crisis. Most of the cases were so mild that parents failed to call a physician and children were sent to school with early symptoms of the disease and exposed other students. In some cases the school physicians diagnosed the disease and we accepted the finding and acted accordingly. I found it necessary to establish a strict policy regarding the cases in school. In my opinion there is only one way to control an epidemic of this proportion and that is to immediately separate all children who have the least sign of illness from others who are well and keep them out of school during the contagious period. With this premise, all workers were instructed to handle cases in this way. A special exclusion blank was printed and sent home with each pupil excluded because of symptoms of a contagious disease. It stated that the child would not be re-admitted to school until he presented a doctor's certificate or until the contagion period had passed. This policy has been continued for all symptoms of contagion. A car was purchased by the School Department to convey these pupils to their homes.

The schools where the largest number of cases were reported were, Massachusetts Fields, Montclair, Quincy, Atherton Hough, North Quincy High, and Central Junior High.

Physicians and nurses were sent to these schools and all pupils present were given throat examinations two and three times each week. In classes where several cases were reported the pupils were examined daily by the nurses. During the worst part of the epidemic cases were reported as follows:

Week ending January 28	cases 92
Week ending February 4	cases 96
Week ending February 11	cases 107
Week ending February 18	cases 119

Vacation Period

Week ending March 4	cases 89
Week ending March 11	cases 102
Week ending March 18	cases 76
Week ending March 24	cases 70
Week ending April 1	cases 47
Week ending April 8	cases 38

Total number of contagious cases reported for the year:

Scarlet Fever	933
Measles	156

Whooping Cough	15
Poliomyelitis	3
	<hr/>
	1107

The health workers justly deserve the thoughtful and timely recognition given them by the Superintendent of Schools in his last report to the School Committee.

Physical Examinations Not cursory

The physical examinations given to the pupils of the Quincy schools are more complete than in most public schools and comparable to many private schools. All pupils are undressed to the waist during the medical examination, with the shoes removed so that conditions of the feet may be noted. In addition to the regular medical examinations, hearing tests are given with the 4 B Audiometer, and the Betts Telebinocular instrument is used to supplement our eye tests. All candidates for athletic teams are examined at the beginning of each season and beginning in 1939 all of these pupils will be given a chest X-ray to locate any early cases of tuberculosis which might otherwise pass without detection. Health record cards are kept up to date for each pupil. Physical Fitness Tests are given to all pupils in the 7th to 12th grades inclusive and are invaluable in determining the health status and needs of the student. A pre-school clinic was held again last June for free medical advice to parents or children entering school in September.

Summary Reports for 1933 Health Service

1. Medical Examinations	16,277
2. Audiometer Tests	13,190
3. Hearing Defects Recorded	345
4. Physical Fitness Tests*	5,500

* "The P. F. I. Defined" appearing in another section of this report explains these Physical Fitness Tests.

School Nurses

1. Number of pupils inspected for various reasons.....	44,303
2. Field visits by Nurse:	
a. To home	2,230
b. To physicians	52
c. To other agencies	172
3. Office visits, or conferences, in school building:	
a. Parents	741
b. Teachers:	
(1) re health of pupils	4,098
(2) re hygiene of classroom	178
(3) re home conditions	826
c. Pupils:	
(1) re health advice	3,621
(2) re first aid	1,596
(3) re illness and suspected communicable disease....	1,351
(4) re follow-up	885

4. Parents notified re defects of	
a. eyes	511
b. ears	70
c. nose and throat	320
d. teeth	1,282
e. feet and posture	139
f. others	150
5. Corrections reported	1,427
6. Wrentham Clinic cases	82

Tuberculosis Clinics

The following summary report concerns the work done by the Tuberculosis Clinics:

Chadwick State Clinic

Number of children recommended for re-examination.....	196
Number of children re-examined	178
Number of children improved	171
Number of children unimproved	7
Number of children x-rayed	171
Number of children recommended for sanatorium treatment	1

Norfolk County Clinic

Population of grades tested (7-9-11)	3,169
Children Tuberculin tested	2,114
Per cent tested	67
Number reacting to the Test	185
Per cent reacting to the Test	8.75
Number of children x-rayed	362
Number of children examined	62
Adult-type Tuberculosis	3
Children placed in observation group for annual check-up	60
Children examined by special request.....	18

Clinics Conducted in the Schools by the City Health Department

Diphtheria Anti-Toxin—Pre-school children	347
Dental Examinations—1st, 2nd, 3rd grades	3,489
Appointments—regular	2,523
Appointments—emergencies	75
Cases completed	398
Fillings—temporary teeth	524
Fillings—permanent teeth	745
Extractions—temporary teeth	1,234
Extractions—permanent teeth	93

Physical Education

The new Body Mechanics room at the North Quincy High School has made it possible to meet the needs of many more pupils. With this addition we can now have three classes of physical education going on at the same time with additional provisions for special rest cases.

The loss of the Body Mechanics room at the Quincy High School on the other hand has retarded the work started last year. With a

class on both sides of the dividing curtain it is very difficult to give individual instruction to pupils needing this special work. We are attempting to "carry on" but I am afraid the results are not going to be encouraging.

Special Posture Classes are now carried on daily in the elementary schools by special physical education teachers.

All elementary school playgrounds have been permanently marked for various types of games for recess periods. Basketball backstops have been erected in most of the school yards and are a source of joy to the kiddies.

The new shower and locker room at the North Quincy High School is a great improvement and should pay dividends in improved health. It is regrettable that better shower facilities are not available for the girls at the Quincy High School for these girls have had excellent instruction in the importance of bathing while in the Junior High Schools.

Physical Fitness tests were given by the regular staff of Physical Education teachers. These tests are used to classify pupils in physical education and to measure their progress.

The P. F. I. Defined: The Physical Fitness Index is a measure of physical condition. It is calculated by dividing one's achieved Strength Index by a norm of one's sex, weight and age at the time of testing. The average individual less than 21 years old will have a P. F. I. of about 100. Others less than 21 years old will have P. F. I.'s varying from about 40 to 200. Older persons will decline in P. F. I. until, at death their P. F. I.'s will be 000, as will also be their powers to perform physical acts.

What High P. F. I.'s Indicate: Individuals with indices above 100 will have greater physical and mental endurance and precision of movement than those with lower scores. That is, they will be able to keep going longer, more efficiently and at greater speeds, and recuperate faster from fatigue or illness. They will be able to do more work in a given time than others of the same sex, weight and age whose P. F. I.'s are lower. Extremely high P. F. I.'s indicate the same need for study as do low P. F. I.'s.

What Low P. F. I.'s Indicate: The lower the P. F. I. the greater the need for special exercise, diet, rest, and advice by physicians and physical educators. Low P. F. I.'s are the results of physical defects, improper food or eating habits, improper exercise, emotional disturbances, or other physical or mental strains or drains or injuries. Individuals with P. F. I.'s below 85 to 90 ought to engage in supervised remedial activities or rest daily until their indices are 100 or higher. Otherwise, they are likely to decline steadily in physical fitness to even lower levels.

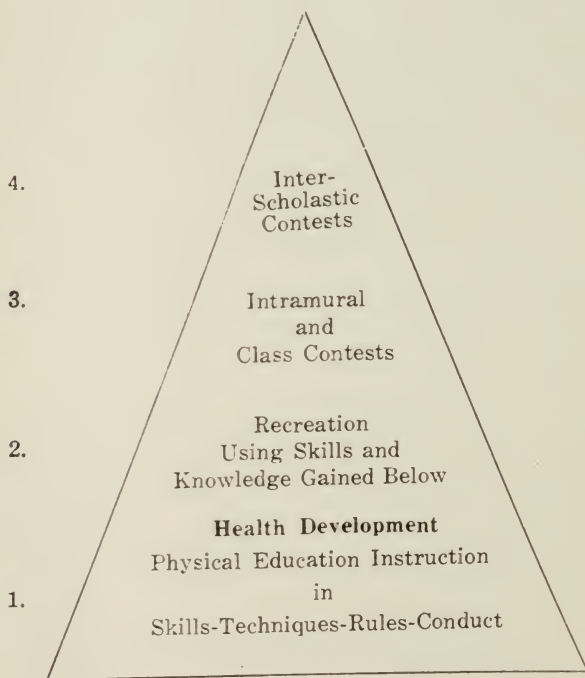

Comparisons: Repeated P. F. I. tests are of inestimable value in determining whether one is gaining or losing in physical fitness and therefore whether one's corrective regime is adapted to one's needs. Many cases are on record of obscure defects and wrong habits, which escaped the attention of physicians and physical educators, being discovered through comparison of P. F. I. records. It is easily possible for individuals of almost any age to raise their P. F. I.'s from 40 to 100 per cent, with proportionate increase in physical fitness, power for service and personal happiness. A comparison of test results from year to year will help the administrator to evaluate the effectiveness of program content and teaching techniques.

Recreation and Athletics

Our diversified program of recreation and athletics has reached many more pupils than would be possible if we concerned ourselves with varsity sports only. The administrator who permits teachers to spend most of their time working with the few highly skilled pupils may be justly criticized. This is precisely what happens, however, where the interscholastic sports program dominates the whole program of Education.

Dr. Alexes Carrel in his book "Man the Unknown" writes, "Athletics, as an end is meaningless. But, as a procedure to acquire health, harmony, and strength of body, athletics is highly significant."

The following diagram illustrates this philosophy. The base of the triangle representing **HEALTH DEVELOPMENT** presents a strong foundation. To invert this triangle, by giving interscholastic activity the major consideration, is to weaken its support and also its educational value.

Recreation and Athletic Activities Sponsored

Varsity Sports

	9th Grade to 12th Inclusive
Football	7th " " " "
Basketball	7th " " " "
Baseball	7th " " " "
Wrestling	10th " " " "
Track	7th " " " "

Intramural and Club Activities for All Pupils—Junior and Senior High Schools

Bowling	Touch Football
Archery	Track
Ping Pong	Basketball
Tennis	Horseshoes
Sailing	Deck Tennis
Winter Sports	Handball
Baseball	Wrestling
Soccer	Horseback Riding
Badminton	Field Hockey
Swimming	Leaders Club

It would be thoughtless on my part to let this opportunity pass without paying tribute to the fine work which is being done by the members of my staff. Physicians, nurses, health service workers, physical education teachers, recreation teachers, faculty managers and coaches have played a large part in the successful functioning of the program.

The ultimate significance of any health program is, however, the improvement of the physical condition of every child through follow-up work. It is the objective of this department to render every possible means to that end. Much of the success of this follow-up depends upon the interest and cooperation of the parents. It is hoped that each succeeding year may bring about an increase in the Health consciousness of parents so that this objective may be expanded and developed into satisfactory fruition.

Respectfully submitted,

JAMES J. CARTER.
Director, Health Education.

APPENDIX A

STATISTICAL DATA

APPENDIX B

LIST OF GRADUATES AND AWARDS

1. Quincy High School

JUNE, 1938

549

Eveleen Abbott	Marjorie Mary Burns
Martha Irene Ahola	Warren Joseph Burrell
Harry J. Aitken, Jr.	Harold A. Cain, Jr.
Elizabeth W. Alexander	Eleanor Ann Caliacco
Gloria Marie Alicandri	Rita Marie Callahan
Fred E. Allen	Oriente Capobianchi
Phyllis Alexandria Allen	Ida Virginia Capone
Lucy Rose Amoroso	Jack G. Cappabianca
Barbara Astrid Anderson	Pauline Amelia Caradonna
Mary Margaret Anderson	Ruth Carlisle
Mildred I. Anderson	Evelyn J. Carloni
Walter C. Anderson	Evelyn A. Carlson
Dorothy Q. Andrews	Robert R. Carmichael, Jr.
Clinton Ray Arsenault	William Carnathan
Dorothy Arsenault	Kathleen Anne Caron
Franklin C. Austin	Madeline Farrington Carter
Robert G. Avery	Barbara M. Cashen
Paul Waldenstrom Bailey	James Cassani
Yolande Baldassini	Catherine Frances Caulfield
Robert Mitchell Balkam	Solino J. Cedrone
Henry Barsella, Jr.	Gina Virginia Cellini
A. Lincoln Bartlett	Rene E. Ceriani
Phyllis M. Bassett	Marion Phyllis Chamberlain
John Warren Bates	Sabatina Anne Chiminello
Ruth Elinor Bates	Guy W. Christiano
Edward Battista	Tony Cirillo
Olga Bersani	Frances B. Clark
Leroy F. Bertoni	H. Dorothy Coffman
Ernest Paul Bertrand, Jr.	Alfred Francis Colella
Harold Charles Bertrand	Edward J. Columbus, Jr.
Aldo Bielli	S. Robert Comparato
Ernest Bishop	John Alfred Componeschi
Paul E. Boland	Myles P. Conaghan
Richard H. Boland	Harriet Ruth Conroy
Francis M. Boodro	Ralph H. Coombs, Jr.
John H. Bowes	Lillian Cooper
Virginia Rose Bowker	Winifred M. Copeland
Paul J. Bresnahan	Rita Mary Corcoran
Claire Brick	Barbara Louise Cosgrove
Edward T. Broderick	Gerard C. Creutz
John Brown	F. Muriel Crosby
Warren Brown	Ruth F. Cummings
Barbara Ann Buckley	William S. Cummings
Bernadette M. Buckley	Jean S. Cunningham
Joseph Matthew Buckley	Bernice Helen Cutler
Althea L. Burchsted	Robert Scott Cutler
Cecilia Theresa Burke	Edmund T. Daley
Mary C. Burke	Anne Catharine Daly

Richard C. Dalton
Sylvia A. D'Amico
Rose Datri
Harriet F. Davies
Gertrude H. Davis
Joanna Dorothea Davis
Richard W. DeBruyn
Julia DeCristofaro
Samuel L. DeCross
Loretta DeGravio
Matthew Paul DeLuca
Paul De Pesa
Henry Devaney
John H. Dialogue
Anna DiAntonio
Ada DiBona
Nicolina DiBona
Reno DiBona
Yolanda DiMartinis
Americo J. DiRado
Fred DiRico
Eleanor Dolores DiSciullo
Rose DiTunno
Robert Edward Dobbyn
Elaine Bernadette Doherty
Francis L. Dolan
Mary R. Donaher
Marie Pauline Donahue
Betty Dorley
Edward J. Downey, Jr.
Raymond F. Downey
James A. Doyle
Catherine Driscoll
Joan Drury
Lawrence D. Duncan
Lyda M. Dunham
Dorothy Ellen Dyer
Clifford C. Dyson
Marguerite Ellard
Robert F. English
Marguerite Erickson
Patricia Estes
Eino Fagerlund
Eleanor Faiella
Yolanda Cecelia Falconi
Agnes Farquhar
William Ferguson
Dorothy M. Flaherty
John J. Flynn
Katherine Foley
Maria Agnes Fontana
Francis Victor Fontana
Barbara Ann Ford
Joseph E. Ford
Roy Forsman
Walter S. Foster
Florence Mary Foye
Mildred Frances Foye
Bella Fragaer
Leslie Milton Francer
Attilio Franceschini
William J. Frazier
Nathaniel Freeman
John H. Frederickson
Marion Ruth Fries
Marion Furniss
Anna Marie Fusco
Dorothy May Gabrielson
Harold A. Gardner
Edith Gates
Ernest E. Gaudreau
James Geddes

Cathleen M. Griffin
Margaret C. Griffin
Vera M. Gronvall
Rosalie Ann Guarcello
Marion Edith Gustafson
Eleanore Marie Guy
Anna Mae B. Hackett
Eleanor Constance Hagerty
Margaret Marie Hagerty
Katherine F. Haggblom
Isabel S. Hajjar
Irene Barbara Halligan
Ann Louise Halloran
Raakel Hamalainen
George S. Hamilton
Paul R. Happel
Harold Lewis Hardy
Mamie Harkola
Edna Hartel
Harry B. Hatch
Howard M. Hatch
Ruth E. Hayward
Viola Heikkila

Eero Helin	Gordon Lamont
Ruth Hope Hendrick	Rita I. Lancy
Ellen Louise Henry	Margaret Larsen
Lawrence L. Higgs	Gordon B. Lauder
Edmund J. Hindmarsh	John Laukkanen
Leona Gertrude Hogan	Eva Louise Lauretto
Eleanor Louise Hogg	Edward Lawrence Leahy
Mary Holloran	Francis D. Leahy
Myrtle Gertrude Holmgren	Walter LeGrand
Evelyn Mavis Mary Holtsclaw	Walter Lehto
Kenneth Howe	Julia May Leonard
Gordon Howley	Edith E. Leppanen
George H. Hoyt	Vernon M. Levinson
Bertha May Hunt	Irving E. Liss
Dennis Joseph Hurley	Ruth H. Lloyd
Frank H. Hurley	George W. Loftus
Adeline M. Igo	Anne Looby
Marion Marie Isbister	Robert F. Lotti
Alice Teschan Jackson	Jack Patrick Loughman
John Jancaterino	Genio John Luciani
Shirley Ruth Janik	Aimo Lukkarinen
Kenneth Gay Jenkins	George M. Lusk
Charles Abbott Johnson, Jr.	Maurice Lyons
George H. Johnson, Jr.	Irene MacCauley
Helen I. Johnson	John McClure
Marjorie Johnson	Ralph C. McCollom
Phyllis Mae Johnson	Edna Ruth McConaghy
Ralph S. Johnson	William F. McCulloch
William A. Johnson	Mary Frances McDermott
Jack J. Jones	Helen McGhee
Coleman J. Joyce	Helen Marie McInnes
John J. Joyce, Jr.	James A. Mackay
Mary Pauline Kallis	June Luise McKay
Margaret Elizabeth Kane	William McKay
Clara Kapsis	Louise M. McKee
Gertrude Kapsis	Donald McKeen
Mary Frances Keenan	Maureen McKenna
Dorothy Margaret Kelley	John D. MacKenzie
Elizabeth Jane Kelley	Margaret D. McKim
Robert T. Kelliher	Ruth C. MacKinnon
Helen M. Kellner	Margaret M. McLarnon
Alfred R. Kemp	Sara I. McLarnon
Lawrence W. Kennedy	John Lawrence McManus
Bernice Janet Kermode	Peter Joseph MacMurray
Hyman Kertzman	Doris G. McNabb
Gladys Kewn	Betty Nairn McNicol
James Cecil Kilrain	Gordon MacPhee
H. Patricia Kimball	Francis McPherson
James King	John D. McWilliam
Robert King	Mary A. Mackey
Fred M. Kingsbury, Jr.	Edward T. Mahon
Robert Kingsbury	Emily Rose Mandelli
Ruth Gladys Koehler	Allan Edward Manty
Marion Koeller	David John Marani
Lahja Kohonen	Lamont Marchant
Frances Irma Kramer	Ethel Marder
Aune Marie Kyllonen	Rose Mary Mariana
Frank J. Lamb	Helen Louise Mason
John Lammers, Jr.	Elsa R. Mattson

Martha Mattson	David Warren Pitman
William H. Maver	Angela Louise Pompeo
David Edwin Meara	Carmela M. Pompeo
Barbara Merrill	Rosina Anne Pompeo
Sophia H. Messina	Rose Mary Poreca
Edwin Erving Milchunes	Jeanette Poulin
Martha Jane Milks	Eleanor Marie Poulos
Anna Louise Mirra	Edward Fisher Pratt, Jr.
Alexander Mitchelson	Florence Isabelle Pratt
Jennie Ida Monti	Anita Mae Prentiss
Donald Huntly Moore	Adele Mary Prunier
Josephine M. Mormino	Joseph Purpura
Belva Merie Morrison	Catherine Ann Pyne
Florence Marie Mortenson	Roger Paul Quilty
Lewis Moscardelli	John James Quinn
Lois R. Mulligan	Carmelo J. Quintiliani
William F. Munroe	Louise Beatrice Quintiliani
Arthur Murphy	Alberta Helen Rae
Catherine Murphy	Sarah Rae
Helen E. Murphy	Mary Ann Rahaim
James Murphy	Pearl Eleanor Raiche
Roy A. Murphy	Edna Patricia Ranalli
John H. Murray	Allen W. Rand
Eleanor Musette	Francis John Ranieri
Edward Myllmaki	Oliver Rautiala
George Francis Nichols	Lawrence Joseph Ready
Wilma Nickerson	Mary Ann Regan
Virginia Nightingale	Edna Gertrude Reilly
Elsie Nimmo	Arthur C. Rennie
William Noonan	Philip L. Ricciuti
Dorothea Eleanor Norton	Francis John Richards
Marion Grace Norton	Lucy M. Rigo
Ruth Elizabeth Nourse	Margaret Jean Ritterhoff
Joan Marie Nugent	Ethel D. Robinson
Frederick Paul O'Brien	Evelyn May Roeder

3. Trade School

JUNE, 1938

32

Auto Mechanic Department

Thomas Buchan	Albert F. Emery
Camillo Joseph Della Barba	Michael Philip Garafalo
Anthony Peter Draghetti	Thomas C. Haslett
Edward Malcolm Ekosta	Raymond W. Jarvio
Rudolph T. Wirta	

Electrical Department

William Dennis Corcoran	Stanley Lewis Frey
John A. DiSalvo	Aldo Joseph Monti
William W. Ford	John T. J. McCarthy
Edward T. Forsberg	Richard E. MacDonald

Machine Department

Lloyd Emil Carlson	George Hatfield
	Earl Wallace Torrey

Pattern Making Department

Karl Eliot Benson	Clifford Dewhurst, Jr.
	Richard A. Martell

Plumbing Department

William L. Estes, Jr.

Sheet Metal Department

Nicholas V. D'Andrea	Frank Olsen, Jr.
Hardwick V. Jancaterino	Francis D. Petrelli
Mario Vincent Lungari	John William Sten
Salvatore Paul Nigro	Paul J. Uvanitte

4. Graduation Awards

JUNE, 1938

In the Quincy High School the following awards were made:

Harvard Club of Quincy Scholarship to George Lusk.

Harvard Club of Quincy—a book to the junior boy who in the opinion of the faculty and his class had contributed most to the school, to Anthony Mollica.

1. SCHOOL COMMITTEE FOR 1939

Chairman

HON. THOMAS S. BURGIN, *Mayor*

Vice-Chairman

MR. HESLIP E. SUTHERLAND

HON. THOMAS S. BURGIN	Term expires Dec. 31, 1940
131 Munroe Road, Quincy	
MRS. BEATRICE W. NICHOLS	Term expires Dec. 31, 1939
45 Elm Street, Quincy	
MR. HESLIP E. SUTHERLAND	Term expires Dec. 31, 1939
50 Spear Street, Quincy	
MR. L. PAUL MARINI	Term expires Dec. 31, 1940
223 Presidents Lane, Quincy	
MR. ROY PROUT	Term expires Dec. 31, 1940
44 Highfield Road, Quincy	
MR. JOHN P. FLAVIN	Term expires Dec. 31, 1941
14 Neponset Road, Quincy	
MR. JOHN H. TAYLOR.....	Term expires Dec. 31, 1941
108 Warren Avenue, Wollaston	

Secretary to School Committee and Superintendent of Schools

JAMES N. MUIR, B.S.

132 Winthrop Avenue, Wollaston

The regular meetings of the School Committee are held at 7:30 o'clock P. M. on the last Tuesday in each month.

2. SCHOOL CALENDAR FOR 1939-1940

First Term

Wednesday, September 6, to
Friday, December 22

Vacation

Friday, December 22, to
Tuesday, January 2

Second Term

Tuesday, January 2, to
Friday, February 16

Vacation

Friday, February 16, to
Monday, February 26

Third Term

Monday, February 26, to
Friday, April 12

Vacation

Friday, April 12, to
Monday, April 22

Fourth Term

Monday, April 22, to
Friday noon (12:00) June 21

Holidays Out During Year: Columbus Day, October 12; Thanksgiving, Wednesday noon (12:00) and remainder of week; Good Friday, March 22; Memorial Day, May 30; Bunker Hill Day, June 17.

REPORT OF DEPARTMENT OF PURCHASE AND SUPPLY

*To the Honorable THOMAS S. BURGIN, Mayor,
Quincy City Hall,
Quincy, Massachusetts.*

DEAR SIR:

The annual report of the Department of the Division of Purchase and Supply for the year ending December 31, 1938, is herewith respectfully submitted.

The Department of the Division of Purchase and Supply was established by an act of the City Council and was passed to be ordained on December 31, 1937. As this was a new department for the City the first appointed purchasing agent, George H. Bonsall, spent the greater part of January and February in setting up a system. The first records of the department are dated February 21, 1938, at which time the department office was opened in the Munroe Building with the Purchasing Agent assisted by one clerk. Later in March the Purchasing Agent found it necessary to employ a second clerk and again in April because of the great volume of detail involved he appeared before the City Council and asked for two additional clerks. An appropriation was passed for one clerk and the work during the balance of the year was divided among the three clerks with the assistance of a fourth from the National Youth Administration.

On May 31, 1938, George H. Bonsall resigned his position and the present Purchasing Agent assumed office as of June 1, 1938.

The system first established has remained the same with exception of the transfer of warrants from this department to the requisitioning departments. The City Auditor requested this change and therefore after July 1st the Purchasing Agent was not responsible for cash discounts as this responsibility reverted to the various departments.

The supplies for all departments in the City of Quincy (excluding medical, surgical and food supplies for the Hospital, food for the Welfare department and books for the Schools and Library) have been purchased through this office. The department received duplicate slips from the hospital and welfare departments on purchases not made by the Purchasing Agent and these were noted and compared with existing prices. Any variance in price was called to the attention of the department.

During the year 8,551 requisitions were received from the various departments and these were divided as follows:

Assessors	53
Auditor	30
Building	26
Cemetery	109
City Clerk	142
Engineering	134
Executive	45

Fire	440
Fire and Police	150
Gypsy Moth	102
Health	165
Highway	2359
Hospital	532
Law	3
Library	92
Park	226
Police	447
Property Management	4
Purchasing	109
Retirement	1
Sanitary	251
School	586
Sealer of Weights	15
Sewer	249
Tax	65
Treasurers ..	82
Water	489
Welfare	151
Wire	30
W. P. A.	1464

After pricing each item listed on the requisitions they were filled either by regular or emergency orders. During the year 7,043 regular orders and 2,690 emergency orders were placed. The division of these orders may be compared in the tables accompanying this report. This table shows that 66½% of the regular orders were placed with Quincy merchants or residents; 27½% of the orders were placed in the Boston area; 3½% with Braintree merchants and only 2½% outside of greater Boston. Eighty-three per cent of the emergency orders were placed in Quincy. With a better knowledge of departmental needs and cooperation in forward planning by department heads the Purchasing Agent hopes to eliminate the "emergency order" in 1939.

1938	No. of Orders	Total Amount	Quincy Orders	Am't of Quincy Orders	Braintree Orders	Am't of Braintree Orders	Boston Orders	Am't of Boston Orders	Outside Area Orders	Am't of Outside Area Orders

EMERGENCY ORDERS

1938

	No. of Orders	Amount	
Quincy	2229	\$17,277.66	
Boston	248	3,571.00	
Outside	25	504.95	
Contract	188	Includes Road Materials, etc.
Totals	2690	\$21,353.61	

Items where the estimated cost exceeded \$500 were advertised for public bidding by this department. In other cases where the cost did not exceed the above mentioned figure but where the Purchasing Agent deemed it advisable to ask for invitation bids, specifications were drawn and in each case after bids were opened the contracts were awarded in the best interest of the City of Quincy. Seventy-six contracts of this type were written during 1938 as follows:

CONTRACTS

Date 1938	Department	Contractor	Items	Amount

May 3	W.P.A.	Pinel Tool Co.	Gates and Grills	990.00
May 17		Quincy Ornamental Iron Works		

On July 1st a supply department was opened and each month new items were added until at the end of the year over one hundred various items (mostly office supplies) were carried by this department. Actual figures show a savings in these items anywhere from 10% to 50%. Each month new items will be added and various types standardized in order to give the requisitioning department the best quality at the lowest cost. Approximately 250 orders were filled from the supply department.

Previous to the establishment of the Purchasing Department, although the Highway Department bought gasoline and oil in bulk, other departments paid posted retail prices on these items. After April 1, 1938, gasoline was purchased at tank car price and dispensed to all city cars and trucks from the municipal garage. At the close of the year the city was paying .065 per gallon plus State Tax for gasoline, a savings for the departments formerly buying outside, of .05c per gallon from the previous year and where one considers that the City departments use approximately 140,000 gallons per year the savings on this item alone offsets the Purchasing Agent's salary. Motor oil (100% Penn.) was purchased at an average of .30c per gallon, anti-freeze alcohol at .35c per gallon and other anti-freezes at wholesale prices. The Purchasing Agent bought automobile tires during the year at costs considerably under prices paid in previous years and in this instance the average savings has been 15%. Printing costs have been cut 25%.

Hardware costs were reduced anywhere from 10% to 20%. Paints and painting supplies showed a reduction of 10% or more. Fencing was bought during the year at most favorable prices. As previously stated office supplies have been purchased at savings ranging from 10% to 50%. It is safe to figure among the hundreds of items bought during the year that the newly established Department of Purchase and Supply has saved an average of 10% on all purchases. This, in itself, would approximate a \$35,000 savings for the City.

One of the most important by-products of the establishment of centralized purchasing in the City of Quincy has been the closer accounting control over expenditures for supplies, materials and equipment. This control was responsible for the notable achievement in 1938 of the City Auditor closing his books without one deficit bill in any one of these accounts. It is all the more worthy of notice when the deficit bill figures for other years are checked: 1934 of \$20,496; 1935 of \$22,630; 1936 of \$6,200; 1937 of \$24,626.

During the seven months service of your Purchasing Agent he has attempted to exhibit a spirit of cordiality and fair play toward vendors showing no favoritism and always bearing in mind his duty to the taxpayers of the City of Quincy.

The cooperation shown by the various departments in the first year of the centralized purchasing system is appreciated by the Purchasing Agent and I take this opportunity of thanking every member of our City Government as well as the hundreds of vendors who dealt with the City, for their help in the success of the Department of the Division of Purchase and Supply during 1938.

Respectfully submitted,

JOHN T. LANE,
Purchasing Agent.
